

Future Quests: Leading the Green Transition

Future Quests unite exceptional global business leaders to explore the forces reshaping business and society. Participants gain valuable insights into how to transform their companies and industries to create a thriving, sustainable future.

Who Should Attend?

These programs are designed for **CEOs, C-suite executives, and high-potential leaders** driving transformational change within their organizations. Attendance is by invitation and nomination only.

Why Attend?

We are living in an era of rapid change, where the climate crisis, digital transformation, and evolving social trends are redefining the global landscape. Leaders who can anticipate these shifts and respond strategically will unlock new opportunities—not just for their organizations, but for industries, society, and the planet.

Join a **Future Quest** to engage with visionary leaders focused on:

- **Seizing opportunities** within the green transition to create innovative new markets.
- **Transforming industries** and businesses to become more resilient, adaptable, and future-fit by building thriving, agile cultures.
- **Leading with purpose and vision** in a world demanding both ethical responsibility and innovative solutions.

The Experience

A Future Quest is a 3-day immersion for C-suite leaders including:

- **Immersive site visits.** Engage with companies at the forefront of innovation
- **Expert-led discussions.** Explore the leading-edge of disruption and collaboration in practice.
- **Peer learning.** Grapple with big questions in a trusting, confidential circle.
- **Your role as a leader.** Identify the leadership capabilities needed for the future and set your own priorities.

Act Now

Join us for one or both of these immersive 3-day events in **The Bay Area** and **Copenhagen**.

San Francisco, California, USA | 2-4 April 2025

The Bay Area is an epicenter of innovation and a leader in the green transition. It boasts a thriving ecosystem of clean energy startups, sustainable tech ventures, climate-focused companies and venture funding. It's also home to the AI revolution with huge implications for energy use and big questions about net costs and benefits for the planet. Our program will provide a unique opportunity to meet leaders focused on driving solutions through entrepreneurial vision and innovative cultures.

\$10,000

Want to learn more? Contact futurequest@leadersquest.org

Copenhagen, Denmark | 15-17 October 2025

Copenhagen is a global leader in sustainability and climate action, aiming for carbon neutrality within this decade. The city pioneers solutions in renewable energy, green urban planning, and circular economy practices. Participants will learn from companies driving sustainable growth and see how collaboration between businesses, government, and innovators creates real impact.

Testimonials

*"The number one thing we observed was how ecosystems are coming together, working collaboratively on game-changing new offerings that will **shape the future.**"*

— Barbara Humpton, CEO, Siemens Corporation

*"I'm leaving with a much clearer understanding of how, as a leader and as an organization, we can drive greater impact by focusing on specific areas where **we can accelerate change.**"*

— Hrach Panossian, Senior EVP and Head of Personal and Business Banking, Canada, CIBC

*"When you bring people together to really discuss and debate, they can be inspired to take the next steps and make those brave decisions to **stay ahead of the curve.**"*

— Adam McDonald, Executive Vice President, Skanska UK

*"This has been a fantastic opportunity to pause and reflect: How do I want to show up? What unique contributions can I make? And how can I recharge before diving back into the day-to-day? **It's been truly energizing.**"*

— Jenny Davis-Peccoud, Global Sustainability & Responsibility Practice, Bain

About

Leaders' Quest immerses leaders in the forces shaping the future, enabling them to transform companies and industries to thrive in a disrupted world.

Our Strategic Partners

TED Future Forum is a community of businesses committed to sector-leading climate action and is part of TED Countdown.

RHR helps CEOs, boards, senior executives, teams, and tomorrow's leaders master the art and science of leadership.

Ambition Loop is a global NGO on a mission to lead and inspire coordinated, transformative action on major challenges across climate change, biodiversity, plastics pollution, food systems, and water.
