

# Trusting Zero Trust

A commissioned study conducted by Forrester Consulting

FORRESTER®

## What are 3 key findings of a recent Forrester study?

Nearly **70%** of respondents found it difficult to maximize remote worker productivity without introducing new security risks

More than **75%** cited the importance of Zero Trust security to combat mounting security challenges

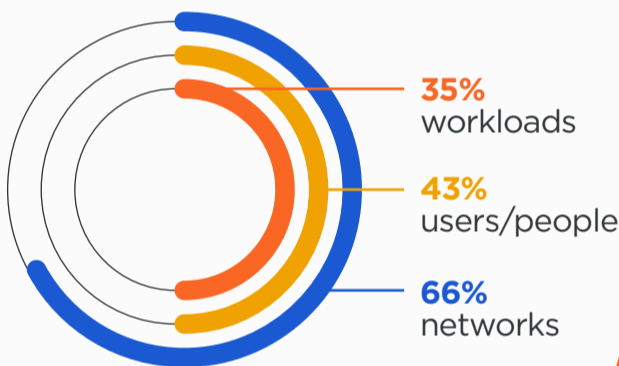

More than **60%** of organizations are in the early stages of their Zero Trust efforts

## Zero Trust and micro-segmentation are not buzzwords or fads

**68%**

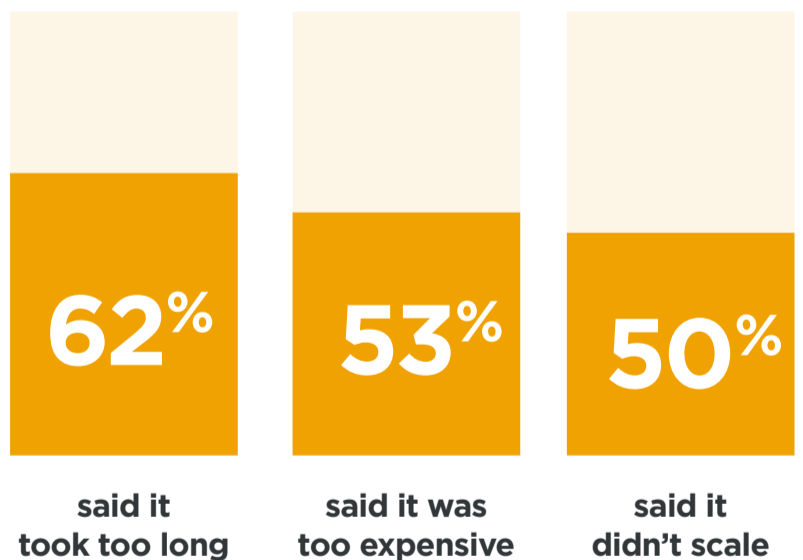

of organizations are increasing Zero Trust budgets and allocating more than one-third of funds to micro-segmentation

### Which of the following does your organization manage with a Zero Trust approach?

Organizations are still working to build Zero Trust security controls for users and application workloads

## Of organizations that tried using data center firewalls and software-defined networking (SDN) for Zero Trust:

## Speed Your Journey to Zero Trust

Learn how Illumio can help you build stronger security for your hybrid cloud environment.
