Core Competencies

DC1 stands as a leading cloud-native data platform, championing sustainability, data integrity, and the power of AI. Rooted in our belief in tackling pressing challenges such as enhancing supply chain resilience, nurturing a circular economy, and confronting sustainability issues head-on, we leverage precise and transparent data.

Our vision is to carve a niche as the preeminent data platform, bridging gaps created by data deficiencies. Through our mission, we aim to spearhead a paradigm shift in data exchange, incentivizing actionable insights and catalyzing substantial, meaningful change on a global level.

Waste & Carbon Tracking

Litter Tracking & Mapping

Asset Tracking

Differentiators

-  Harnessing the capabilities of both cloud and edge technology for enhanced performance and efficiency
-  Facilitate thorough cradle-to-cradle lifecycle tracking for comprehensive oversight and analysis
-  Equip clients with the tools and insights needed to proactively tackle scope 3 emissions
-  WasteX: A robust cloud-based database housing extensive waste disposal data for thousands of products

Past Performance

VCU LitterX Survey

October 2023

Scope of work:
Executed a comprehensive litter scanning survey across the VCU campus utilizing our innovative LitterX app, pinpointing litter hotspots with precision.

James Madison University

February 2024

Scope of work:
Collaborated with JMU to collect waste disposal data during a men's and women's basketball doubleheader, utilizing our innovative GreenScanr app.

Friends of James River Park

April 2024

Scope of work:
Organized an Earth Day litter cleanup in partnership with FOJRP, where we deployed our cutting-edge LitterX app to scan and geolocate litter across Belle Isle.
