# Commodities and Global Markets

Commodities and Global Markets (CGM) is a global business offering capital and financing, risk management, market access, physical execution and logistics solutions to its diverse client base across Commodities, Financial Markets and Asset Finance.

## Our teams

**Commodities** provides capital and financing, risk management, market access and physical execution and logistics services across the power, gas and emissions, agriculture and oil and resources sectors globally. The team also offers commodity-based index products to institutional investors.

**Financial Markets** provides clients with access to a wide range of service offerings across foreign exchange, rates, credit markets and listed derivatives markets. Our clients benefit from strong deal execution and specialist financing solutions that are underpinned by deep technical and fundamental market analysis. The three divisions in Financial Markets are:

- **Fixed Income and Currencies** provides currency and fixed income trading and hedging services as well as financing via securitisation, warehousing and financing solutions across a range of asset classes for corporate and institutional clients globally.
- **Credit Markets** provides warehouse solutions, settlement solution financing and related trading to institutional clients globally.
- **Futures** provides a full range of execution, clearing and financing solutions to corporate and institutional clients, providing continuous 24-hour coverage of major markets globally.

**Asset Finance** delivers a diverse range of tailored finance solutions globally across a variety of industries and asset classes.

**Central** develops and manages cross-divisional initiatives. The team houses various CGM- wide services including the Chief Operating Officer (COO) and Chief Financial Officer (CFO teams), data, legal and other specialist activities and encompasses non-financial risk functions. Aligned to our CFO office is our Equity Derivatives and Trading business which issues retail derivatives in key locations and provides derivatives products and equity finance solutions to its institutional client base and conducts risk management and market making activities.

## What role will you play?

You will partner and engage with clients and internal stakeholders to provide tailored, innovative solutions to boost their opportunities in global markets. You will work in a fast-paced environment, develop your knowledge of market dynamics and produce fundamental market analysis and research.

---
