More about fund fees:

If you invest in Exchange Traded Funds (ETFs) through SoFi Invest (either by buying them yourself or by investing in them through SoFi Invest's automated investments), these funds will have their own management fees.

These fees are not paid directly by you, but rather by the fund itself. While most of these fees are very low, they do reduce the fund's returns and you should be aware of them. Check out each fund's prospectus for details. SoFi Invest does not receive sales commissions, 12b-1 fees, or other fees from ETFs for investing such funds on behalf of advisory clients, though if SoFi Invest creates its own funds, it could earn management fees there. We have SoFi ETFs you can learn more about at sofi.com/invest/etfs.

As always, our priority is helping you invest in your future. If you feel like you've been mistakenly charged a fee or have any other issues, please [shoot us a note!](#)

SoFi Invest may waive all, or part of any of these fees, permanently or for a period of time, at its sole discretion for any reason. Fees are subject to change at any time. The current fee schedule will always be available in your Account Documents section of SoFi Invest. This is not an offer, or solicitation of any offer to buy or sell any security, investment or other product. INVESTMENTS ARE NOT FDIC INSURED, HAVE NO GUARANTEE, AND MAY LOSE VALUE.

Before investing you should carefully consider the Fund's investment objectives, risks, charges, and expenses. This and other information is in the prospectus. A prospectus may be obtained by visiting www.sofi.com/invest/etfs/. Please read the prospectus carefully before you invest. Investing involves risk including the possible loss of principal.
