Dear Narapath Petmanee,

We are very pleased to inform you that Legislative Institutional Repository of Thailand has been certified as a Trustworthy Data Repository by the CoreTrustSeal Standards and Certification Board until 30 May 2025. Congratulations!

Please place the CoreTrustSeal logo on your repository website with the link to the public version of your application. This link can be retrieved from <https://www.coretrustseal.org/why-certification/search-repositories/>.

The CoreTrustSeal logo can be downloaded here: <https://bit.ly/3fTuAKs>

Having been through the application process, we hope you can appreciate that CoreTrustSeal certification is both rigorous and nontrivial; only those data repositories of a sufficiently high standard are certificated.

Any specific comments or notes connected with your certification are listed here:

Finally, please note that certification against the Core Trustworthy Data Repositories Requirements is a necessary first step to become a Regular Member of the World Data System. If your organization is not already (applying to be) a WDS Member, then please consider joining (<https://bit.ly/2RkS1C3>). Membership is free and merely requires adherence to the WDS Bylaws, including the WDS Data Sharing Principles (<https://bit.ly/3wABIXk>).

Best regards,
CoreTrustSeal Secretariat
(On behalf of the CoreTrustSeal Standards and Certification Board)
