DEFINITION

Acquisition: Acquisition of land and other assets for the purpose of development projects in accordance to prevailing Land Acquisition Act 1977 (2034 BS).

Corridor of Impact: Corridor of Impact is minimum width of land required for the construction of roads with the provision of shoulder width, side drain plus safety zone on either side of the road.

Displaced Person: Displaced persons are those who are physically displaced (relocation, loss of residential land, or loss of shelter) and economically displaced (loss of land assets, income sources, or means of livelihood) as a result of involuntary resettlement of land, involuntary restrictions on land use or on access to legally designated parks and protected areas.

Local Grievance Redress Committee: Village Development Committee or Municipality level committee established to assist the affected people, legally constituted committees for land acquisition and project authorities, monitoring of implementation issues and community reactions and grievance resolution.

Poverty Level Income: It refers to the cost of maintaining basic minimum needs. Poverty level income has been defined by different organizations and the government departments, using factors such as per capita calorie requirements and expenditures on housing and other non-food items.

Rehabilitation: The measures taken to mitigate social impacts, including compensation, resettlement and rehabilitation allowances where required.

Replacement Cost: The market value of a project affected assets. For agriculture land, this includes reference to land of equal size, type and productive potentiality in the vicinity of the affected land and land preparation costs where required. For houses and other structures, this includes reference to the market price of materials and labor, and the cost of transporting materials to the building site. The replacement cost further includes the cost of any registration and transfer taxes for land and buildings.

Resettlement: Resettlement denotes the consequence that occurs due to acquisition of land and other assets as well as the entire process and activities related to acquisition and implementation of Resettlement Plan in accordance to prevailing Acts.

Right of Way: Right of way means the land acquired for the project purposes. Generally, government declares 50 meter for National highway and 30 meter for feeder roads.

Severely Affected Family: Family having more than 10 percent loss of total land holding or income is considered as severely affected family.

Temporary Acquisition: Land acquired temporarily by contractors for accessing road or storing the construction materials or for other construction related purposes through a negotiation with the land owners ensuring compensation for a specified period.

Tenant: A person occupying or using land of a titleholder according to the provisions of the Land Act, 1964 (2021 BS).

Titleholder: The person in whose name the project-affected land, structure, business is registered and who is authorized to receive the compensation granted for the loss of business or acquisition of the land and assets.

Vulnerable Persons: The disadvantaged persons such as disabled, women headed households, handicapped, orphan, destitute, independent elderly persons above 60 years of age, landless laborers, wage earners and people living below the poverty level.

EXECUTIVE SUMMARY

1. The Resettlement Plan (RP) has been guided by the ADB Safeguard Policy Statement 2009, Land Acquisition Act of Nepal 1977 and other relevant policies and guidelines. The main objective of the Plan is to identify impacts and measures to mitigate the losses due to the subproject.
2. Okhaldhunga-Salleri subproject road is located in Okhaldhunga and Solukhumbu districts. The subproject road includes improvement and upgrading 57.7 km. road connecting Okhaldhunga, district headquarters of Okhaldhunga to Salleri, district headquarters of Solukhumbu. The existing road has been upgraded into all weather pavements sealed with DBST.
3. The road upgrading works does not have significant negative impacts. A total of 4.53 hectare private land is required for the widening of the existing road to design width. Two private structures have been affected partially due to the road widening work. The physical displacement of affected household is not required. A total of 550 households have been affected by the project, of which 548 households have lost land and two households land with structures. Among the total 382 interviewed displaced households, 24 households have been identified as vulnerable category in the subproject area.
4. Altogether 550 households are affected by the project. Among them 382 households were surveyed during field study. The rest 168 households were not available in the project area during the survey period. The total population of surveyed displaced households is 1,786 with average household size of 4.68.
5. The subproject area has multi-ethnic composition. Brahmin, Chhetri, Janajati, Newar, Sanyasi, and Dalits are different groups present in the subproject area. The educational status of displaced household reveals that about 79 percent population is literate. The literacy rate of male is about 90 percent where the female literacy rate is about 68 percent.
6. Among the total economically active population 50.35 percent is engaged in agriculture followed by service (14.04%), trade (12.54%), wage labor (9.39%), foreign employment (8.86%), and housewife (2.28%). The average annual household income of the displaced household is NRs. 276,682 where the per capita income is NRs. 59,178.
7. This RP has been prepared in close consultation with stakeholders such as district level line agencies, local community and displaced people. The main findings of the consultations undertaken with the displaced people and local stakeholders include appropriate compensation to be provided to the project affected land and assets, employment priority to be given to the displaced people in road construction. Local people have shown their commitment to support the project.
8. The original Resettlement Plan was uploaded in the website of Executing Agency as well as ADB in August 2010 for disclosure. Likely, the Updated Resettlement Plan will be uploaded to Executing Agency and ADB website for disclosure.
9. A VDC level Grievance Redress Committee (GRC) has been established. Displaced people have opportunity to submit their grievances verbally or written to the GRC for resolution. If the grievances are not resolved, they are referred to the District Administration Office. CDO

assesses the grievances and tries to resolve. Again, if the grievances cannot be resolved by CDO, they can be referred to the Ministry of Home Affairs.

10. Cash compensation has been provided to the affected land and structures at replacement cost. Owners have been allowed to take/reuse the salvaged materials for rebuilding structures. Income restoration training was organized to the vulnerable household to support their livelihood. Moreover, provision has been made to provide one time economic rehabilitation grant of NRs. 10,000 to the vulnerable family. Yet, the economic rehabilitation grant has not been distributed. It is in the process of implementation.

11. The total estimated resettlement cost for the implementation of Resettlement Plan is NRs. 40,677,690. This cost includes all the cost related to compensation for land, structures, economic rehabilitation of vulnerable group etc. All the cost related to land acquisition and resettlement has been borne by the Government.

12. Ministry of Physical Infrastructure and Transport (MOPIT) is the Executing Agency. The Project Directorate (ADB), DOR is the Project Implementing Agency (PIA) for this project. The Project Implementation Unit (PIU) has overall responsibility of project implementation. The PIA has established Subproject Office headed by Project In-charge (PIC) with officer rank of Divisional Engineer. The PIC is responsible for implementing the resettlement activities at field level with the help of Resettlement Specialist of Supervision Consultant.

13. The Project Implementation Unit (PIU) and Resettlement Specialist of Supervision Consultant are responsible for internal monitoring. External monitoring is required to evaluate the overall monitoring activities carried out under the internal monitoring. The hiring process of external monitoring agency has been initiated. The independent monitoring agency submits external monitoring report directly to ADB with a copy to Executing Agency to determine whether or not resettlement goals have been achieved.

CHAPTER-1: INTRODUCTION

1.1 General

1. The Resettlement Plan (RP) is guided by the ADB Safeguard Policy Statement (SPS) 2009, Land Acquisition Act of Nepal 1977 (2034 BS) and other relevant policies and guidelines. The main objective of the Plan is to identify impacts and measures to mitigate the losses due to the subproject. The plan also aims to provide effective guidelines to the GON for implementation management, to address the identified resettlement impacts as per the Resettlement Plan and people affected due to the subproject are compensated under the prevailing legal norms of GON in keeping with the ADB, SPS. The RP has been prepared taking into account of the general findings of the field reconnaissance survey, census of displaced people and consultation with various stakeholders in the subproject area, district level agencies and local people.

2. The main objective of the project is to improve connectivity of remote rural areas with markets within the country and neighboring countries as well as enhance the capacity of border roads for smooth traffic for domestic and regional trades. The project includes 6 roads and the main objectives of the consulting service is to carry out detailed engineering design and construction supervision of the following roads under the strategic road network.

Table 1.1: Sub-Regional Transport Enhancement Subproject Roads

S.N.	Project Road	Design Standard	District	Length (Km)
1.	Belbari-Chaurahawa	Double Lane AC	Saptari & Siraha	47.9
2.	Harkapur-Okhaldhunga	Single Lane DBST	Okhaldhunga	41.2
3.	Okhaldhunga-Salleri	Single Lane DBST	Okhaldhunga & Solukhumbu	57.7
4.	Chainpur-Khandbari	Single Lane DBST	Sankhuwasabha	43.6
5.	Bhairahawa Bypass	Double Lane DBST	Rupandehi	3.4
6.	Nepalgunj-Kohalpur	Four Lane DBST	Banke	22.2

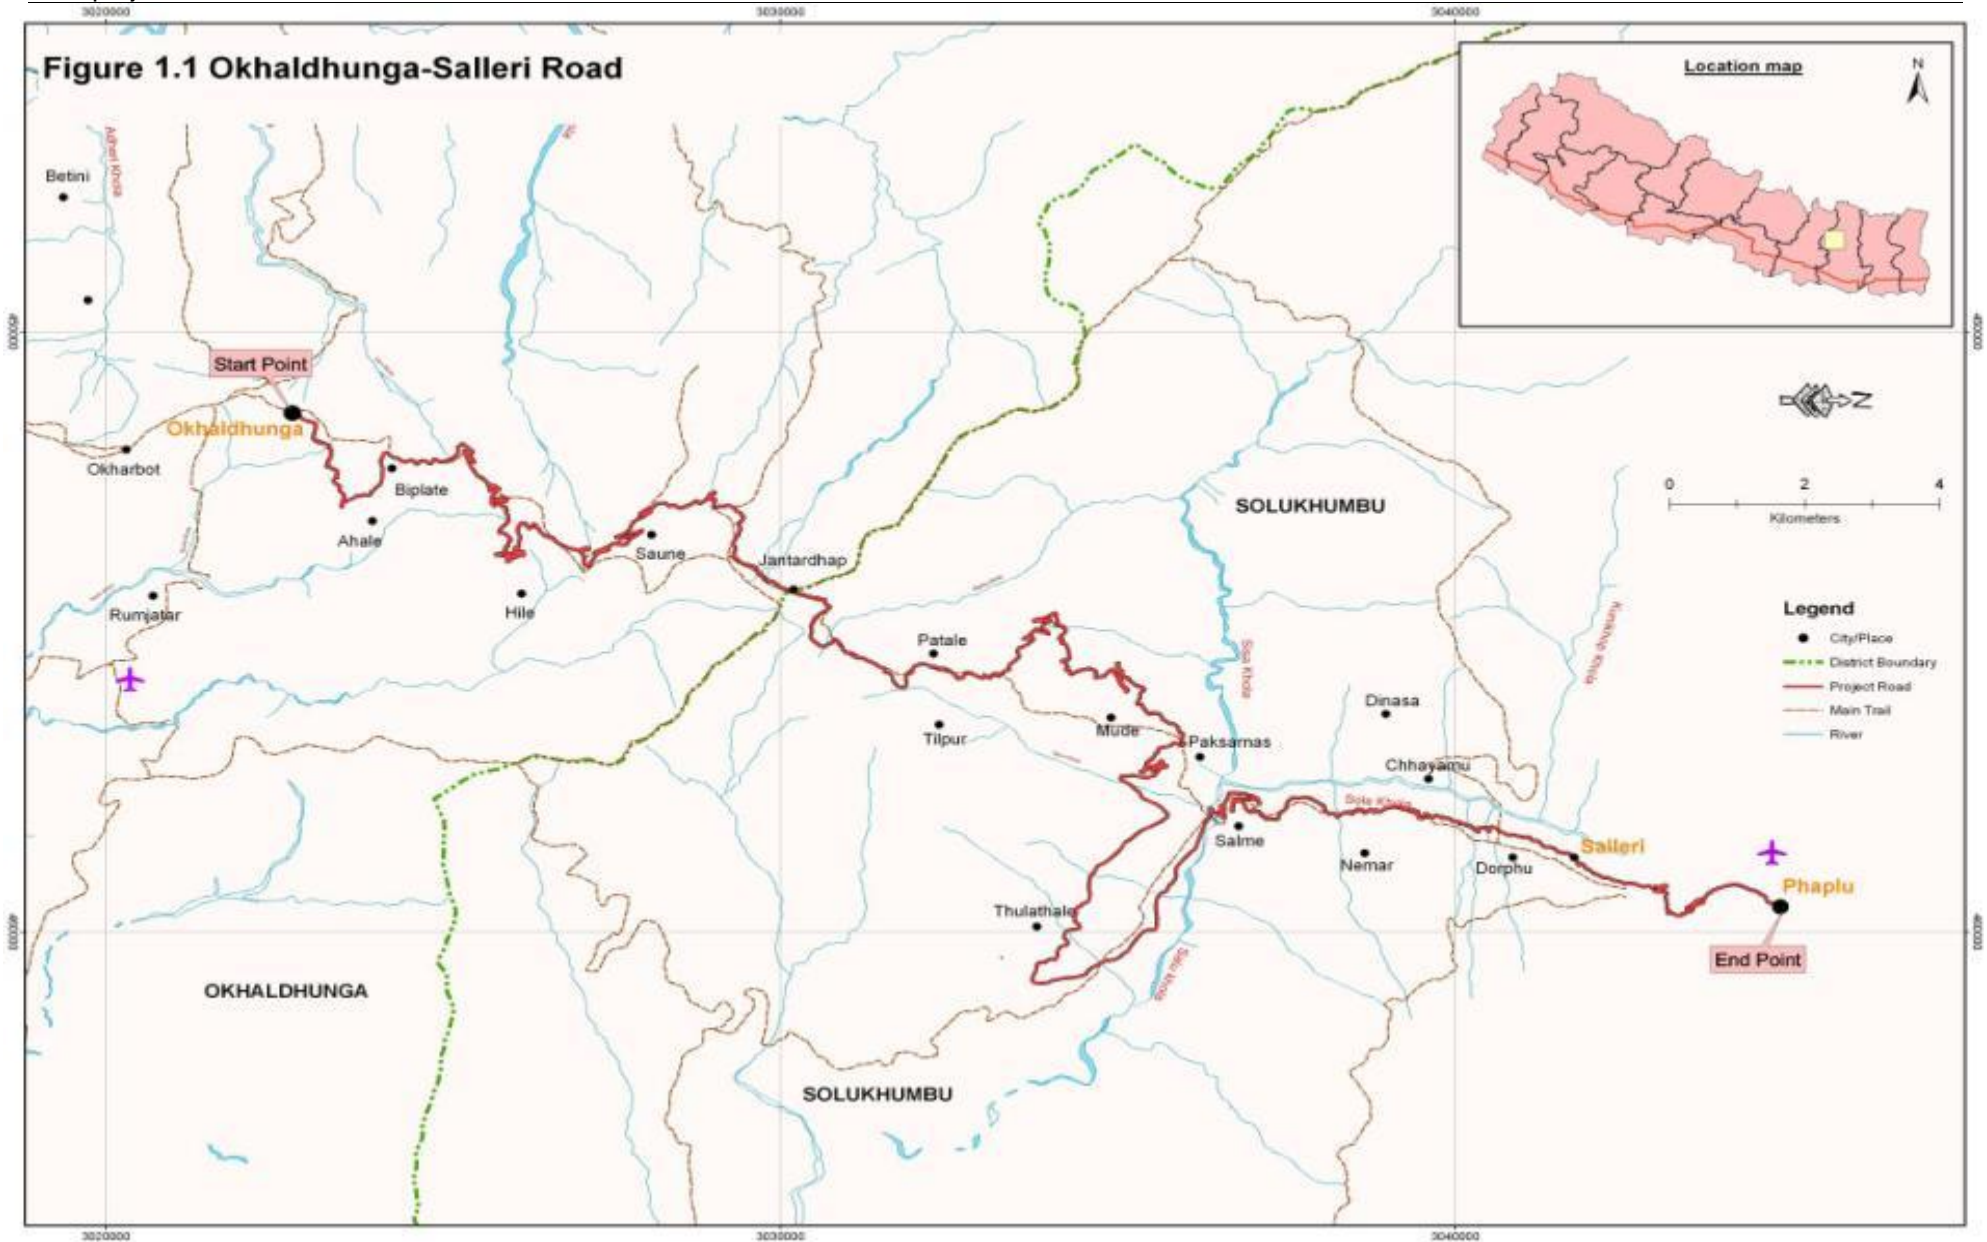

1.2 Subproject Description

3. The Okhaldhunga-Salleri (OS) subproject road is located in Okhaldhunga and Solukhumbu districts. The subproject road includes improvement and upgrading of 57.7 km. of road connecting Okhaldhunga to Salleri, district headquarters of Solukhumbu. The road starts from Ramailodanda of Okhaldhunga district and ends at Phaplu of Solukhumbu district.

4. The subproject road mostly passes through the Ridge of High Mountain and little section passes through the Cliff Mountain and hard rock. The project road is a critical link between highland and lowland facilitating the movement of food, goods and other services. As a result of it, the settlements around the roadsides will increase because of accessibility and other opportunities along the sub-project road leading to the gradual development of various market centers along the road.

5. The major activities include drainage improvement, minor realignment, pavement improvement and widening of the existing road. For these activities about 4.53 hectare private

land has been affected. The road is aligned along the existing road. An average available width of existing road is 5.5 meters. The detailed design requires a footprint width of 6-12 meters in different sections of the road.

1.3 Need of Updating Resettlement Plan

6. The original Resettlement Plan of this subproject road was prepared in September 2010. In this Resettlement Plan, specific information regarding project affected households, land to be acquired, specific list of vulnerable households was lacking. The original record of affected land and assets was not applicable due to the lack of cadastral survey. So, before implementation of project, the detail cadastral survey was conducted in July-August 2011. Based on this cadastral survey, land acquisition notice was published in September 2011. This notice identified 795 parcels to be affected by the project where the affected land was 4 hectare.

7. During project implementation, grievance regarding additional land loss and missing of affected land parcels were registered. Considering to the grievance regarding additional land loss, the assessment of missing plots and additional loss of previously affected plots was carried out in February 2013. This assessment identified additional 36 displaced households with 47 parcels.

8. After the additional land loss assessment carried out in February 2013, other more grievances related to additional land loss were registered. For this, additional land assessment was carried out in September 2013 which identified 15 additional affected households and 32 additional parcels. During verification of absent households and deed transfer process, 7 households with 8 parcels were excluded and merged.

9. Moreover, during project implementation, new census of project affected people was carried out. This census identified the actual list of vulnerable household. In this context, there was need of updating previously prepared Resettlement Plan considering the further project impact. To address the issues identified during project implementation, this updated Resettlement Plan has been prepared.

Table 1.2: Project Affected Household and Land

Original Assessment			Additional Assessment			Excluded & Merged			Total		
HHs	Plots	Area (ha)	HHs	Plots	Area (ha)	HHs	Plots	Area (ha)	HHs	Plots	Area (ha)
506	795	4	51	79	0.55	7	8	0.02	550	866	4.53

Source: Cadastral Survey, July-August, 2011, Additional Land Assessment February, 2013 & September, 2013

1.4 Measures to Avoid or Minimize Impact

10. The subproject construction necessitated minor acquisition of land where the alignment was insufficient to meet the requirement of proposed design. The acquired land mostly comprised small strips of uncultivated land on either side of the road foot print. There was not significant impact on the income of displaced households due to loss of land. Identified resettlement impacts comprised loss of private land, few private structures and trees due to road construction works. As the displaced people have been compensated with replacement cost of their affected assets, the project does not create significant negative impact on their livelihood and economic status.

1.5 Scope of Land Acquisition

11. The road is aligned along the existing road from Okhaldhunga to Salleri with a total length of 57.7 km. An average available width of existing road is 5.5 meter. The detailed design requires a footprint width of 6-12 meters in different sections of the road. The acquisition of 4.53 hectare land is required for widening the road to design width in different sections of the alignment. Almost all interviewed households pose the land ownership certificate. None of the households will be severely affected. Altogether 2 private structures are partially affected due to road upgrading works.

Table 1.3: Project Affected Households and Assets

S.N.	VDCs	Total Households	No. of Parcel	Land (ha)	No. of Structure

Total		550	864	4.53	2

Source: Field Survey, October, 2012, February, 2013 & September, 2013

1.6 Methodology

1.6.1 Cadastral Survey

12. With the leadership of cadastral surveyor from the District Land Survey Office, cadastral survey was carried out. The project team first mapped out the project alignment and corridor of impact (COI) on the cadastral maps. The team, using the detailed engineering design, marked the central line of the road and required land areas to be acquired on the cadastral maps. The cadastral survey was conducted in July-August 2011. Moreover, the cadastral survey for the assessment of additional and missing plots was carried out in February 2013 and for the further additional assessment it was carried out in September 2013. The engineering staff identified upgrading requirements and likely areas of land to be acquired. The affected households were also participated in the survey. The identified landowners and the plot number of the affected land were further verified in the land revenue office at the district headquarters to confirm the land ownership status.

1.6.2 Census Survey

13. Census of affected households was carried out in October 2012 and the census of additional assessment was carried out in February 2013 and November 2013. Complete enumerations of all affected households were recorded. The objective of census is to record the profile of affected people and record of assets loss. Out of 550 displaced households, 382 households (69.45%) were interviewed and remaining 168 households (30.55%) were absent during the survey. They were not residing outside the project area during census.

CHAPTER-2: SCOPE OF LAND ACQUISITION AND RESETTLEMENT

2.1 Scope of Land Acquisition

14. The road upgrading works does not have serious negative social impacts. A total of 4.53 hectare private land is required for the widening of the road to design width. Two private structures are partially affected due to the road upgrading and widening work. The physical displacement or resettlement of displaced household is not required.

15. The project has some negative impacts primarily related to loss of private land. Since the land is acquired for the widening, minor realignment, drainage improvement, the households lose very small strips of land. So, there is no serious negative impact on the displaced people due to the subproject.

2.2 Displaced Household

16. A total of 550 households are affected by the subproject, of which 548 households lose land and two households lose land with structures. Altogether two private structures are affected partially by the subproject.

17. Altogether 2,544 people have been affected from 550 households. Among the total 550 displaced households, 382 were interviewed and 168 households were absent at the time of survey. The average size of the interviewed household is 4.68. It is estimated that the population of absent households is 758.

Table 2.1: Number of Displaced Household and Population

S.N.	VDCs	Total HHs	Interviewed		Absent		Total Population	Affected Land (ha)
			HHs	Population	HHs	Population

Source: Field Survey, October, 2012, February, 2013 & November, 2013

2.3 Loss of Private Assets

18. A total of 4.53 hectare private land has been affected by the subproject. The total project affected land parcel is 866. The subproject road affects two non-residential structures of which one is partially affected.

2.3.1 Loss of Private Land

19. The project affected households owned total 653.76 hectare land. The present road upgrading work requires 4.53 hectare land with 866 parcels. It is thus only 0.69 percent land has been lost by the road upgrading and widening work. The land holding size and area of land acquired for the project is given below. The detail information of affected private land is given in Annex-1.1.

Table 2.2: Land Holding Size and Land Loss of Displaced Households

S.N.	VDCs	Total HHs	Total Land Holding (ha)	Average Land Holding (ha)	Total Land Loss (ha)	Average Land Loss (ha)	Land Loss (%)
1.	Okhaldhunga	16	8.02	0.50	0.18	0.01	2.27

Source: Field Survey, October, 2012, February, 2013 & November, 2013

2.3.2 Magnitude of Private Land Loss

20. Among the displaced households, 66.75 percent households lose less than 1 percent of total land holding where 31.94 percent households lose 1-5 percent. Likely, 1.31 percent households lose 5-10 percent of total land holding. The extent of land loss of the displaced household is given below.

Table 2.3: Land Loss Percentage of Displaced Households

S.N.	VDCs	< 1%		1 to 5%		5 to 10%		>10%		Total HHs
		HHs	%	HHs	%	HHs	%	HHs	%

Source: Field Survey, October, 2012, February, 2013 & November, 2013

21. The above table reveals that none of the households has lost more than 10 percent of their total land holding. All the displaced households are in the category of economically

displaced. None of the household has been identified under physically displaced category. Hence, none of the households are severely affected due to the loss of assets. Moreover, displaced households have not lost more than 10 percent of their earnings due to road upgrading work.

2.3.3 Loss of Private Structure

22. The road upgrading work has affected two non-residential private structures. Among the two affected structures, one is verandah of house and another one is gate. Due to loss of structure, the household has not been physically displaced. The detail information of affected structures is given in **Annex-1.2**.

Table 2.4: Project Affected Private Structure

S.N.	VDCs	Present Use	Area (Sq Feet)	Impact
1.	Salleri	Verandah	245	Partial
2.	Salleri	Gate	172	Full
Total			317	

Source: Field Survey, October, 2012

2.4 Impact on Vulnerable Groups

23. Among the total 382 interviewed displaced households, 24 are identified as vulnerable in the subproject area. The major vulnerability indicators in the subproject area were dominance of female headed households followed by below poverty level and Dalits and aged members households. The type of project affected vulnerable households is given below. The detail list of displaced vulnerable households is given in **Annex-2**.

Table 2.5: Vulnerability Status of Displaced Households

7.	Garma	-	1	-	-	1
8.	Salleri	-	1	7	1	9
Total		1	9	8	6	24

Source: Field Survey, October, 2012, February, 2013 & November, 2013

24. Although the subproject has 24 vulnerable households, none of these households has undergone significant impact in terms of loss of assets and income. The subproject does not have any significant impact to the minority and endangered indigenous people as well. It is pertinent to note that the ethnic groups along the subproject area share common social norms and are integrated into the mainstream.

25. However, based on the government policy and ADB Guidelines' focus on considering the vulnerable group in the development project, the Resettlement Plan (RP) has made provision of livelihood support program to the displaced vulnerable people as female headed households, elderly member households, below poverty level income households and Dalits households.

26. For the livelihood support, 3 months skill development training including sewing-cutting and house-wiring was organized to the vulnerable households during project implementation. Moreover, for the instant support of the livelihood of the vulnerable household, cash assistant of NRs. 10,000 per household will be provided. This cash assistant support program will be implemented after the approval of updated Resettlement Plan.

2.5 Indigenous People

27. All indigenous people are living in their own private land and pose legal ownership. The land is either owned by the government or by the people. Based on the census, field observation and consultation, the majority of indigenous people have lost insignificant amount of their income generating assets. They are also absorbed with other caste groups sharing common social values, norms and culture. Hence, separate Indigenous Plan is not required to address the issue of indigenous people.

CHAPTER-3: SOCIOECONOMIC INFORMATION AND PROFILE

3.1 Profile of the Displaced Households

28. Altogether 550 households have been affected by the project. Among them 382 households were surveyed during field study. The rest (30.55%) of households were not available in the project area during the survey period. These absent households were residing somewhere else outside the project area.

Table 3.1: Number of Displaced Households

S.N.	VDCs	Interviewed Households		Absent Households		Total Households
		No.	%	No.	%

3.1.1 Demography

29. The total population of surveyed displaced households is 1,786 where the population of male is 904 and the population of female is 882. The average household size is 4.68. The population composition of affected households is given below.

Table 3.2: Population Distribution and Family Size of Displaced Households

S.N.	VDCs	Male		Female		Total Population	Total Households	Average HH Size
		No.	%	No.	%

30. The age distribution of the population ranges from less than 5 years, 5-15 years, 16-60 years, and above 60 years. Among the total population, 74.19 percent of the population is within the age group of 16-60 years or economically active population. The proportion of children (below 15 years) is 21.28 percent. The aged or population above 60 years is 4.54 percent. The population of different age group of displaced household is given below.

Table 3.3: Age Wise Population Distribution of Displaced Households

3.1.2 Ethnic Composition

31. The subproject area has multi-ethnic composition. Brahmin, Chhetri, Janajati, Newar, Sanyasi, and Dalits are different groups present in the subproject area. In the subproject area, the dominance is of ethnic indigenous people groups (Sherpa, Rai, Tamang, Magar and Gurung) where the number of households of this group is 200. Although they are being categorized as disadvantaged groups, they are settled along the roadside and mainstreamed into the common society. Newar is categorized as the advanced indigenous ethnic group and the household of this group is 73. Other major caste groups include Brahmin, Chhetri and Sanyasi. Dalits are considered as socially and economically disadvantaged group. Altogether, 7 Dalits households have been affected by the subproject road. The ethnic composition of the displaced households is given below.

Table 3.4: Ethnic Composition of Displaced Households

3.1.3 Literacy and Education

32. The educational status of displaced household reveals that about 21 percent population is illiterate where about 27 percent can just read and write. Nearly 29 percent population is found within 6-10 class education. The people obtaining higher education or above graduate level have been found about 2 percent. The illiteracy rate of male is about 10 percent where the female illiteracy rate is about 32 percent. Women literacy status is quite lower in comparison to male literacy status. The educational status of displaced population is given below.

Table 3.5: Educational Status of Displaced Population (5 Years and Above Population)

S.N.	Educational Status	Male		Female		Total	
		No.	%	No.	%	No.	%

3.1.4 Land Holding Status

33. Among the total 550 displaced households, 382 households were surveyed during field study. Therefore, the land holding size was obtained from 382 households. Based on the verified record of 382 households, 45 (11.78%) households have been found owning less than 0.25 hectare land. The number of households having 0.25-0.50 hectare land is 28 (7.33%). Likely, the households owning 0.50-0.75 hectare land is 67 (17.54%). Similarly, the household having 0.75-1.00 hectare land is 44 (11.52%). The number of households having more than 1 hectare land is 198 (51.83%). The following table shows the landholding size of displaced households.

Table 3.6: Land Holding Size of Displaced Household

3.1.5 Occupational Status

34. Among the total economically active population, 50.35 percent is engaged in agriculture followed by service (14.04%), trade (12.54%), wage labor (9.39%), foreign employment (8.86%), and housewife (2.28%). The involvements of female in agriculture and farm activities

have been reported to be notably higher (70.27%) than that of male (31.45%). Female's high involvement in agriculture maybe considered as one of the indicators of their hardship.

Table 3.7: Occupational Status of Displaced Population

S.N.	Occupation	Male		Female		Total

3.1.6 Households Income

35. The average annual household income of the displaced household is NRs. 276,682 where the per capita income is NRs. 59,178. Annual household income of the displaced households is given below.

Table 3.8: Annual Household Income of Displaced Households (NRs.)

S.N.	VDCs	Total HH Income	Average HH Income	Per Capita Income	Total HHs	Total Population
1.	Okhaldhunga	2,993,900	199,593	33,266	15	90

Source: Field Survey, October, 2012, February, 2013 & November, 2013

3.2 Poverty Status

36. Nepal is one of the poorest countries in the world. Most of the country's population lives in rural areas where poverty is more prevalent and severe. Poverty incidence in Nepal is high. The Nepal Living Standard Survey III, 2010-11 shows that although poverty in Nepal has declined between 2003-04 and 2010-11, approximately one-fourth of Nepalese population are still below the poverty line. The rate of poverty reduction is lower in rural areas compared to urban areas. There is also evidence suggesting that the underprivileged social groups are the most impoverished.

37. Poverty in Nepal is defined in absolute term based on the requirement of minimum subsistence level rather than per capita income. Central Bureau of Statistics (CBS) has used cost of basic needs method for the estimation of poverty line based on current prices per

person per year. Poverty is calculated based on the average annual household income and its adequacy to meet the minimum subsistence needs of the family members. CBS has calculated the poverty line for different 12 areas including national poverty line. The detail on poverty lines calculated by CBS by different domains for 2010-11 is given below.

Table 3.9: Poverty Line in Current Prices Per Person Per Year (NRs.)

S.N.	Geographical Locations	Poverty Line Calculated in 2010-11		
		Food Item	Non-Food Item	Total
1.	Mountains	13,295	6,564	19,859
2.	Urban-Kathmandu	14,610	26,323	40,933
3.	Urban-Hill	11,805	7,772	19,577
4.	Urban-Terai	11,743	9,390	21,133
5.	Rural Hills-Eastern	12,297	4,254	16,551
6.	Rural Hills-Central	12,240	6,448	18,688
7.	Rural Hills-Mid & Far Western	11,772	4,583	16,355
8.	Rural Terai-Eastern	11,333	5,524	16,857
9.	Rural Terai-Central	11,257	6,283	17,540
10.	Rural Terai-Western	10,600	5,398	15,998
11.	Rural Terai-Mid & Far Western	10,998	6,321	17,319
12.	All Nepal	11,929	7,332	19,261

Source: Poverty in Nepal (2010-11), CBS, September, 2012

38. As an approach to assess the poverty status of interviewed households, the respondents were asked about the different source of income. As per the government poverty line, minimum per capita required to secure above poverty level in the subproject districts is NRs. 16,551. On this basis, the minimum household income above poverty level was determined by multiplying the per capita amount by the average family size.

39. To identify the Below Poverty Level (BPL) income household, CBS criteria of consumption requirement for minimum subsistence (2,220 Kcal per day) was applied. Based on this, altogether 6 households are found to have fallen under BPL out of 382 census households in this subproject road.

3.3 Gender Status

40. The status of women in the subproject area has been found to be lower than the male's. Most of the females in the area, as in other rural area of the country are mainly responsible for caring and bearing children, and overall management of day to day household activities including farm work. About 70 percent females are engaged in agriculture where the male involvement is about 31 percent. The subproject districts have higher Gender Development Index (GDI) than the national average. The National average is calculated as 0.452 where the GDI of subproject districts is 0.461 (Okhaldhunga) and 0.479 (Solukhumbu). The GDI is calculated based on life expectancy, educational attainment and income in accordance with the disparity in achievement between women and men. In the subproject area, female literacy rate is 67.57 percent where the male literacy rate is 90.45 percent. The female literacy rate of the

area is higher than the national female literacy rate of 57.40 percent. Literacy status of male and female in the subproject area and country is given below.

Table 3.10: Literacy Status in the Subproject Area and Nepal

S.N.	Location	Total (%)	Male (%)	Female (%)
1.	Subproject Area	79.20	90.45	67.57
2.	Nepal	65.90	75.10	57.40

Source: Field Survey, October, 2012, February, 2013, November 2013 & National Population Census, 2011

41. The subproject road affects small amount of land for the road upgrading. None of the households has lost significant amount of agriculture and other land causing adverse impact on their household income. Due to non-significant amount of land loss, the subproject does not create economical as well as other social problems in the existing living pattern of the affected household. Women have not been affected negatively due to resettlement impacts of the subproject road. Likely, the status of women has not been changed due to small area of land acquisition.

CHAPTER-4: PUBLIC CONSULTATION AND INFORMATION DISCLOSURE

4.1 Introduction

42. This Resettlement Plan has been prepared in close consultation with stakeholders such as district level line agencies, local community and displaced people. The study team visited and consulted with different government organizations, displaced people, key informants and other relevant people of the project area. Furthermore, consultation meetings were organized in all the major settlements to identify the compensation and social issues related to the road project. The information provided by the local community was recorded. Some of the basic objectives of such consultation include:

- Information dissemination to the people about the subproject in terms of its activities and scope of work;
- Understanding the perceptions of the local people;
- Generate idea regarding the expected demand of the local people;
- Assess the local people's willingness to get involved with the subproject;
- Enumerate the measures to be taken during the implementation of the subproject.

4.2 Disclosure of Resettlement Plan

43. A summary of Resettlement Plan information was disseminated to the project affected people during Local Grievance Redress Committee formation and it was further dissemination during site visit and consultation. The original Resettlement Plan report was uploaded in the website of Executing Agency as well as ADB in August 2010 for disclosure. This Updated Resettlement Plan report will be uploaded to Executing Agency and ADB website for disclosure.

4.3 Participants in Public Consultation

44. Altogether 8 public consultation meetings were held in different major settlements in this subproject road. During public consultation meeting, 105 participants were involved. The number of participants involved in public consultation meeting is given below. The detail of public consultation meeting minute is given in **Annex-3**.

Table 4.1: Number of Participants in Public Consultation Meeting

S.N.	VDCs	Settlement	No of Participants
1.	Okhaldhunga	Ramailodanda	13
2.	Bigutar	Chitre	13
3.	Barnalu	Biplate	10
4.	Jantarkhani	Thade	14
5.	Kerung	Patale	11
6.	Tingla	Ramite	13
7.	Garma	Jorboudha	18
8.	Salleri	Salleri	13
Total			105

4.4 Issues Discussed in Public Consultation

45. Most of the issues discussed in public consultation were related to the appropriate valuation and compensation of land and other assets. People have been ready to provide their land and assets with reasonable compensation. Local people have been aware and eager to be employed during the road construction. The community people have committed to support the project during construction period. The major issues discussed in the public consultation are given below.

Table 4.2: Public Consultation Matrix

Issues Discussed in Consultation	Measures to Resolve the Issues	Responsibility
Public utilities should not be disturbed due to road project. If any disturbance occurs, it should be managed properly.	Consideration has been given to manage and rehabilitate the public utilities if it is disturbed by the project.	DOR/SC/ Contractor
Employment priority should be given to the displaced people as well as locals.	Employment priority has been given to the displaced people and locals.	DOR/SC/ Contractor
Local people provide full support to the project and help to resolve possible local problems during construction.	Local support has been appreciated and locals have been consulted to solve the possible local problems.	DOR/SC
Appropriate compensation should be provided to the project affected assets.	Compensation of project affected assets has been given based on the market value.	DOR/CDC
Local people should be consulted and participated during road construction.	Local people have been consulted and participated during construction.	DOR/SC/ Contractor

46. The main issue raised in the consultation meeting was employment priority to the displaced people as well as local people. In section 8 (Particular Condition of Contract) of Condition of Contract document, it has been mentioned that to the maximum extent possible, the contractor's labor shall be drawn from the area of influence of the road, defined as within 2 hours walk of the place of work. Every effort shall be made to establish a gender balance within the local labor force (sub-clause 6.26 of particular condition of contract). Following this, project affected and local people have been involved in road construction to the extent possible.

47. The employment opportunities have been given to the interested project affected people in road construction. During road construction altogether 34 displaced households with 40 people were employed. The employment status of displaced people is given below.

Table 4.3: Displaced Persons Employed During in Road Construction

S.N.	VDC	No. of HHs	No. of People	Man/Months
1.	Bigutar	6	9	9
2.	Barnalu	5	5	7
3.	Jantarkhani	15	17	169
4.	Kerung	4	4	22
5.	Tingla	3	3	7
6.	Salleri	1	2	17
Total		34	40	231

4.5 Further Consultation and Participation

48. In order to have effective implementation of the project, several meetings and dissemination of project information have been carried out in the community. The Resettlement Specialist of Supervision Consultant has arranged such meetings.

CHAPTER-5: GRIEVANCE REDRESS MECHANISM

5.1 General

49. There are provisions of compensation for losses or any damages during land acquisition under the Land Acquisition Act of Nepal 1977. The Act allows displaced people to file their grievances to the Chief District Officer (CDO) and raise objection against acquisition by a notice to the Ministry of Home Affairs and to get redressed under the Land Acquisition Act 1977. Various complaints and problems that have arisen during implementation of the project include the following:

- Project displaced persons not listed in the compensation list;
- Losses not identified correctly;
- Compensation/assistance inadequate or not as per entitlement matrix;
- Dispute about ownership;
- Delay in disbursement of compensation/assistance; and
- Improper distribution of compensation/assistance in case of joint ownership.

5.2 Grievances Redress Committee

50. Local Grievance Redress Committee (LGRC) has been formed at the VDC level to facilitate the resettlement activities of the project and ensure that each affected household is informed of the project activities and entitlements. LGRC is mainly functioning for disseminating information related with project and acting as a forum for resolution of constraints about project. Thus LGRC is functioning as the liaison between displaced people or community in order to make the grievances smooth.

51. In order to resolve the grievances at local level, a VDC level Local Grievance Redress Committee has been established under the chairmanship of VDC Chairperson. The other members include representative from Project, representative from Supervision Consultant and two representatives from displaced persons (one male and one female). The Local Grievance Redress Committee comprises:

- VDC/Municipality Chairperson
- Representative from Project
- Representative from Supervision Consultant
- Two representatives from displaced person (one man and one woman)

52. LGRC meets regularly, at least once a month or as per the requirement. The committee thoroughly reviews the grievances submitted or expressed verbally by displaced people or community and assign the responsibilities to relevant agencies on implementing the decisions of the committee. If the displaced people are not satisfied from the decision of the LGRC, they have their right to take the grievance up to the Ministry of Home Affairs (MOHA).

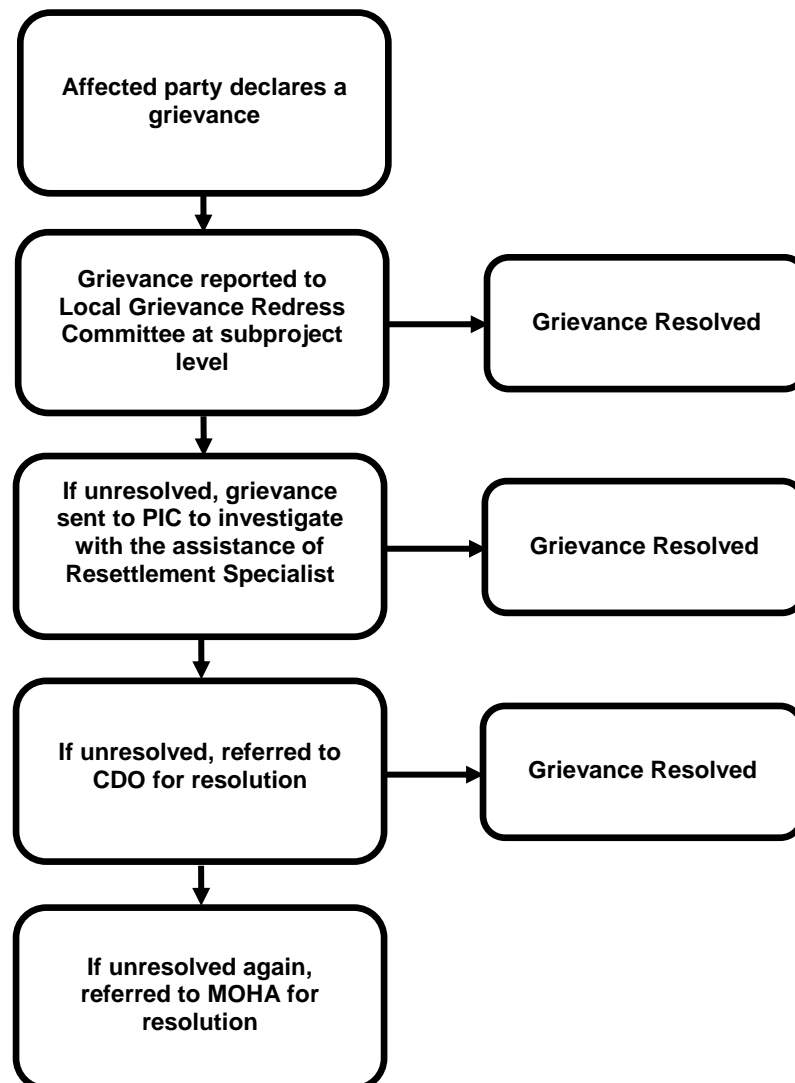

5.3 Grievance Resolution Procedure

53. Displaced people or community can submit their grievances verbally or written to the GRC for resolution. The grievances have been assessed and if required solutions have been recommended. If the grievances cannot be resolved at project level, it is referred to the District

Administration Office. CDO assesses the grievances and tries to resolve discussing with Project In-charge. Again, if the grievances cannot be resolved by the CDO, it is referred to the Ministry of Home Affairs.

54. The Ministry of Home Affairs normally requires decision making on a complaint within 15 days, unless further information is required, or unless the complaint has to be resolved in, a court of law. The grievance resolution procedure is given below.

Figure 5.1: Grievances Resolution Procedure

5.4 Grievance Recorded During Implementation

55. Most of the grievances recorded during project implantation were related to additional land loss by road widening works. Up to February 2013, a total 126 applications regarding land loss were recorded. Likely, up to September 2013, altogether 50 applications regarding land loss were recorded. All the applications were verified and relevant applications were assessed for the compensation. Beside this, other complaints including drainage outlet, demand of

additional drainage, flood management were registered in this subproject road. The list of grievances recorded during project implementation is given below.

Table 5.1: Grievance Matrix and Mitigation Measures

S.N.	Issues	Mitigation Measures Applied	Responsibility
1.	Up to February 2013, a total 126 applications demanding compensation of affected land were registered	All the applications were verified and assessed with the support of Cadastral Surveyor and technical staff of project. During field verification 76 plots were identified to have been affected including 47 new and 29 previously affected and having more loss. Compensation was provided to the affected land.	Project/SC/ CDC
2.	Upto September 2013, altogether 35 applications demanding compensation of affected land were registered	All the applications were verified and assessed with the support of Cadastral Surveyor and technical staff of project. During field verification 22 plots were identified to have been affected including 20 new and 2 previously affected and having more loss. Compensation was provided to the affected land.	Project/SC/ CDC
3.	After the CDC's decision on compensation rate from km. 41+600 to km. 47+820 of Tingla and Garma VDCs, project affected people of this area registered their grievance to review the compensation rate	The rate decided on 29 April 2012 was reviewed by CDC meeting on 19 December 2012 based on the recommendation of site visit team including PIC, Land Revenue Office, Land Survey Officer and Resettlement Specialist.	Project/SC/ CDC
4.	Local people of Chitre Bazar of Bigutar and Barnalu VDC demanded drainage management during rainy season and building of footrail head attached with road in the area	This issue was discussed in LGRC meeting in the presence of representative of SC and contractor; the issues were assessed by the project team, temporary drainage management work was done. Moreover, head of footrail attached with road was constructed as per demand of local people.	Project/SC/ Contractor
5.	Local people of Thade area of Jantarkhani VDC raised issue regarding protection of water pipeline and protection of water reservoir	This issue was discussed in LGRC meeting, it was assessed by the project team, consideration was given to protect water pipeline. The measure was applied to protect drinking water reservoir.	Project/SC/ Contractor
6.	Local people of Thade area raised the issue regarding drainage outled shifting from the designed location	This issue was discussed in LGRC meeting and the suggestion of local people was incorporated.	Project/SC/ Contractor
7.	Kim Bahadur Basnet and Karna Bahadur Basnet of Tingla VDC registered their grievance regarding more land of their affected parcel and exclude plots 174 and 175 being far from road alignment	This issue was verified with the support of technicians of project and cadastral surveyor. After site verification, the land area of their plots increased. Previously affected plots 174 and 175 were excluded. This issue was settled in the presence of local people.	Project/SC/ CDC
8.	Dal Bahadur Basnet of Tingla VDC registered his complaint	This issue was discussed with CDO for the appropriate measures either cancelling	Project/CDC

S.N.	Issues	Mitigation Measures Applied	Responsibility
	regarding shifting present road alignment from previously acquired alignment and he has demanded additional compensation or cancellation previously acquired alignment	previously acquired alignment or providing compensation for the present alignment. The PIC and CDO have assured to settle this case based on the appropriate legal procedure.	
9.	Mangal Singh Tamang of Salleri VDC registered grievance regarding shifting road alignment from km. 54+250 -54+400 where local people donated land to DDC and not acquire his land.	This issue was discussed with the affected people and CDO as well. PIC has shown commitment to address this issue during road construction time at that place based on the design demand of proposed road.	Project/SC/ CDC

CHAPTER-6: POLICY AND LEGISLAL FRAMEWORK

6.1 General

56. The government of Nepal has propagated different laws and legislations for different sectors as prescribed by the constitution of Nepal. There are different laws interrelated to each other such as for construction of road there are independent acts like road act, forest act, land act and the property right mentioned in the constitution.

57. The Interim Constitution of Nepal 2007 has affirmed that the state shall give priority to the protection of environment, prevention of further damage due to physical development. With respect to property rights, the constitution establishes property rights to every citizen of Nepal whereby every citizen is entitled to earn, use and sell, except for public welfare. The state does not acquire individuals' property without compensation.

58. Public Road Act 1974 prohibits the construction of permanent structures in a defined distance from the rural road i.e. the road agency has the authority over everything within the Right of Way (ROW). The act makes provision for cases where the road projects temporarily require land and/or other properties during construction, rehabilitation and maintenance. A compensation determination committee determines compensation in case of loss of assets. The act empowers Department of Roads (DOR) to acquire any land on temporary basis during construction and upgrading. The act does not provide for leasing of land. DOR requires paying compensation for any damages caused to buildings, crops and trees.

59. Land Acquisition Act 1977 (2034 BS) specifies procedures of acquiring land and payment of compensation. The Act empowers Government to acquire any land, on the payment of compensation for public purposes. The legal provision and practices ensure that people have right to get compensation for any type of losses due to development activities to safeguard the economic future of all affected people. Land Acquisition Act ensures assessment, valuation and compensation for any acquisition of private properties.

60. Since eighties, development projects in Nepal have also been guided by the respective policies of several bilateral and multilateral funding agencies like ADB and WB on case-to-case basis according to the need of projects. This practice contributed to result variations on entitling compensation and other assistances to the displaced people for the losses of their assets. In consideration to such underlying issues and policy gaps, Government of Nepal has drafted a National Policy on Land Acquisition, Compensation and Resettlement in Development Projects in 2006 with the technical assistance of ADB. However, the policy has yet to be approved. It is therefore, until now, Land Acquisition Act 1977 is the core document to guide on the matters related to resettlement in the country.

6.2 Land Acquisition Act

61. Highlights on some of the key resettlement and compensation provisions as stipulated in Land Acquisition Act 1977 have been briefly illustrated as follows:

- Government can acquire land for any public purpose (Clause 3 & 4 of the Land Acquisition Act);
- Land Acquisition Officer (LAO) is responsible to identify, survey, and notification to the concerned parties and other works related to acquisition (Clause 5 & 6);

- The LAO determines the amount of compensation for the damaged property while conducting initial survey works (Clause 7);
- Within 15 days after the preliminary actions, the LAO has to confirm the required land and submit other details of the required property to the Chief District Officer (CDO);
- The CDO is to publish public notification with details of the affected property after receiving the report of the preliminary activities (Clause 9);
- Any grievances to disable land and property acquisition could be reported to Home Ministry within 7 days of public notification to CDO. Home Ministry is to decide on the grievances within 15 days as a capacity of district court (Clause 11);
- Preliminary hearing of grievances/cases related to the Act is done by CDO. Appeal to such hearing could be made to the appeal court within 35 days (Clause 40);
- Upon addressing the grievances CDO can hold land for acquisition (Clause 12);
- Compensation for the acquired land/property is to be decided by a Compensation Determination Committee (CDC) comprising of Chief District Officer, Land Revenue Officer, Project In-charge, and representatives of the District Development Committee. The compensation to be paid in cash and separate compensation rates could be fixed for the partially affected land or completely affected land (Clause 13);
- Official tenant to be paid compensation as per the prevailing laws (Clause 20);
- Unpaid Government tax could be deducted from the compensation amount (Clause 21).

6.3 ADB Resettlement Policy

62. According to ADB Safeguard Policy Statement (SPS) 2009, and Guidelines for Involuntary Resettlement, it is mandatory for all ADB assisted Projects to recognize and address the Resettlement and Rehabilitation (R&R) impacts of all the Displaced Persons (DPs) irrespective of their titles and requires for the preparation of an appropriate Resettlement Plan in the case where involuntary resettlement exists. ADB Safeguard Policy Statement is the guiding rule to identify impacts and to plan measures for mitigating various losses occurred due to resettlement impacts. Some of the key provisions of ADB Safeguard Policy Statement and Guidelines on Involuntary Resettlement are:

- Where Involuntary Resettlement is unavoidable, the impact should be minimized by exploring project and design alternatives;
- Enhance or at least restore the livelihoods of all displaced persons in real terms relative to pre-project levels;
- Improve the standards of living of the displaced poor and other vulnerable groups;
- Gender analysis is required to identify related resettlement impacts and risks;
- Resettlement Plan should be prepared in full consultation with displaced persons, host communities, and stakeholders;
- Preference should be given to land based resettlement for displaced persons whose livelihoods are land-based. However, if the land is not the preferred option or the land is not available at reasonable price, the DPs are provided opportunities for employment, or self employment in the project works, in addition to the reasonable cash compensation for land and other assets lost;
- Cash compensations for the loss of structures, other assets and incomes should be based on full replacement cost;
- Absence of formal legal title to land or non-recognized or recognizable claims to such land by the DPs should not be a bar to compensation;
- The rate of compensation for land, structures and other assets should be calculated at full replacement cost based on fair market value; transaction cost; interest accrued; transitional and restoration cost, and other applicable payments, if any.

- All compensation payments and related activities must be completed prior to the commencement of the civil work;
- Special attention to be paid to the needs of vulnerable groups especially those below the poverty line, the landless, the elderly, women and children and indigenous people and those without legal title to land.

6.4 Resettlement Principles and Assistance

63. Land Acquisition Act 1977, Clause 16 (a) stipulates to consider Government Guidelines, decisions, and circulations issued time to time with regard to valuation of assets and compensation determination. Accordingly, the resettlement principles adopted for this subproject also recognizes both, the Land Acquisition Act 1977, and ADB Safeguard Policy Statement 2009 and Involuntary Resettlement Policy. In order to bridge the gaps between the Government and ADB Policies, the resettlement principles adopted in this project provide compensation and resettlement assistance to all Displaced Persons (DPs) and their affected assets in accordance to Land Acquisition Act 1977 also considering other relevant Government Acts, policies and practices being adopted in the implemented and ongoing road projects. Based on the above policy features, the principles of resettlement and rehabilitation for this subproject entails the followings:

- The negative impacts of the project has been avoided or minimized as much as possible applying appropriate measures;
- Where the negative impacts are unavoidable, the measures are applied to restore the living standard of project affected people;
- Project affected vulnerable groups were identified and assisted to improve their standard of living;
- Cash compensation at replacement costs based on current market rate has been provided to the project affected people;
- Cash compensation for all affected structures has been provided by the project at replacement cost;
- Resettlement and rehabilitation assistance has been provided to the eligible displaced persons during project implementation;
- Appropriate mechanism has been established at the district as well as local level to ensure speedy resolution of grievance and disputes.

6.5 Cut-off Date

64. In case of land acquisition, the date of publication of preliminary notification for acquisition as provisioned by Land Acquisition Act 1977 has been treated as the cut-off date of 1 October 2011. For the non-titleholders such as squatters and encroachers, the cut-off date is the date of project census completed for this updated Resettlement Plan. For this, the cut-off date is defined as the latest census completion date of 30 November 2013.

CHAPTER-7: ENTITLEMENT, ASSISTANCE AND BENEFITS

65. This chapter describes the entitlement policy that has been applied to the subproject. Land Acquisition Act 1977, compatible with the ADB Safeguard Policy Statement 2009, guides Resettlement Plan (RP). The entitlement matrix provides details regarding the application of the principles, definition of entitled persons, and entitlements.

7.1 Loss of Private Land & Assets

66. Cash compensation has been provided to the affected land and structures based on replacement cost. Displacement allowance has been provisioned to the fully affected owners. Owners have been allowed to take/reuse the salvaged materials for rebuilding structures.

7.2 Income Restoration Assistance

67. Additional assistance has been provisioned to the displaced vulnerable household. Such household receives one time economic rehabilitation grant of NRs. 10,000 for restoring their livelihoods. Moreover, income restoration training was organized to the vulnerable household to support their livelihood. The cash assistance to the vulnerable household has not been distributed. It is in the process of implementation.

7.3 Unanticipated Adverse Impact

68. The project implementation authorities deal with any unanticipated consequences of the project during and after project implementation according to the principle of entitlement matrix. A detailed entitlement matrix has been given in the following Table.

Table 7.1: Subproject Entitlement Matrix

Type of Losses	Application	Definition of DP	Entitlements	Result in Action	Responsibility
A. Land Acquisition					
Loss of agricultural/ residential/ commercial land by landowners	Additional land and other assets required for construction and improvement works beyond the existing road	Person(s) with land records verifying ownership	<ul style="list-style-type: none"> ▪ Cash compensation based on replacement cost determined by Compensation Determination Committee (CDC). ▪ Subject to the availability of land, Displaced Persons (DPs) have option for replacement land of a similar productive quality instead of cash compensation. ▪ All fees, taxes and other charges as applicable under the relevant laws, incurred in the relocation and resource establishment are borne by the project. 	Compensation for lost assets	DOR/CDC
Loss of land temporarily for the use of contractors during construction	Land acquired temporarily by contractors	Person(s) with land records verifying ownership	<ul style="list-style-type: none"> ▪ Contractors are to negotiate a contract agreement on the rental rate with the owner for temporary acquisition of land. ▪ Project and the contractor ensure that persons other than the owner affected as a result of temporary acquisition are compensated for the temporary period. ▪ Land should be returned to the owner at the end of temporary acquisition period, and restored to its original condition or improved as agreed with the DP. 	Compensation for temporary loss of assets	DOR//SC/ Contractor
B. Vulnerable Assistance					
Loss of income due to project activity	Household income affected as a result of road construction	Women-headed households, household, elderly headed, occupational caste (Dalits) and below poverty level income households	<ul style="list-style-type: none"> ▪ One time economic rehabilitation grant of NRs. 10,000. ▪ Skill development training program organized by Supervision Consultant. ▪ Temporary employment in the project construction work to DPs with particular attention to DPs who are considered as vulnerable group. 	Income restoration assistance	DOR/SC/ Contractor

Type of Losses	Application	Definition of DP	Entitlements	Result in Action	Responsibility
C. Loss of Private Structures					
Loss of private structures	Private structures affected by road construction	Owners of the structure	<ul style="list-style-type: none"> ▪ Cash compensation for loss of structures at replacement cost. ▪ Owners of affected structures are allowed to take/reuse their salvageable materials for rebuilding/rehabilitation of structure without deducting any costs. ▪ In case of relocation, transfer allowance to cover cost of shifting materials is to be paid on actual cost basis or on current market rates. 	Compensation for lost structure	DOR/CDC
D. Unanticipated Adverse Impact Due to Project Intervention or Associated Activity					
The EAs and project implementation authorities deal with any unanticipated consequences of the project during and after project implementation in the light and spirit of the principle of the entitlement matrix.					

CHAPTER-8: RELOCATION AND REHABILITATION STRATEGY

8.1 Need for Rehabilitation

69. In resettlement planning relocation, rehabilitation and income restoration are required if there is significant resettlement impact due to acquisition of cultivating land in large scale, displacement of structures, loss of business, displacement of vulnerable households, and relocation need of community assets/properties etc.

70. As the findings of detail census in the subproject locations show, there is insignificant impact on land and structures. Among the total 550 displaced households, 24 households are identified as vulnerable.

Table 8.1: Vulnerability Status of Different Displaced Households

S.N.	Vulnerable Categories	No. of Households
1.	Aged Headed Household	1
2.	Female Headed Household	9
3.	Dalits Household	8
4.	Below Poverty Level Household	6
Total		24

Source: Field Survey, October, 2012, February, 2013 & November, 2013

8.2 Rehabilitation Strategy

71. The rehabilitation strategy followed for this subproject is guided by the entitlement matrix provided in the subproject Resettlement Plan. The following specific measures have been provisioned in this Resettlement Plan for rehabilitating and restoring the significantly affected assets and displaced persons.

8.2.1 Rehabilitation Strategies for the Affected Land

72. DPs having impact on land have been compensated at replacement cost to be determined by the Compensation Determination Committee (CDC).

8.2.2 Compensation for Affected of Structures

73. Cash compensation has been provisioned for loss of structures at replacement value fixed by CDC. Owners are allowed to take/reuse the salvaged materials for rebuilding structures.

8.2.3 Income Restoration Assistance

74. Beside the compensation for land and structures, income restoration assistance to the vulnerable family will be provided. Moreover, for the livelihood support to the vulnerable household, skill development training has been provided.

8.2.4 Unanticipated Adverse Impact

75. The project implementation authorities deal with any unanticipated consequences of the project during project implementation according to the principle of entitlement matrix.

CHAPTER-9: RESETTLEMENT BUDGET AND FINANCING PLAN

76. All cost related to land acquisition and resettlement budget has been borne by the Government. The Executing Agency (EA) ensures that adequate funds are delivered on time for timely implementation of Resettlement Plan. Executing Agency guarantees to meet unforeseen obligations in excess budget estimates. This chapter provides cost estimates for the Resettlement Plan activities described in preceding chapters under the following items:

- Direct compensation cost for the acquisition of land;
- Cost associated with the loss of structures;
- Cost associated with the loss of trees;
- Cost associated with the rehabilitation measures to DPs;
- Cost associated with the Resettlement Plan implementation.

9.1 Cost of Private Land

77. According to the detailed engineering design, a total of 4.53 hectare land was required for widening the subproject road. The Compensation Determination Committee meeting on 17 November 2011 in Okhaldhunga district and the CDC meeting in Solukhumbu district on 29 April 2012 decided the land rate for compensation in Okhaldhunga-Salleri subproject road. Furthermore, the rate decided 29 April 2012 was reviewed by CDC from km. 41+600 to km. 47+820 of Tingla-6, Tingla-7, Garma-6 and Garma-7 of subproject area on 19 December 2012. The unit rate decided by the CDC of this subproject road is given below.

Table 9.1: Unit Rate of Affected Land

S.N.	VDCs	Description	Rate/Ropani (NRs.)
1.	Okhaldhunga	Okhaldhunga-2 zero point plot no. 880 to north plot no. 138	1,750,000
2.	Okhaldhunga	Beside above mentioned area of Okhaldhunga VDC	260,000
3.	Barnalu	All the affected plots of Barnalu VDC	260,000
4.	Bigutar	All the affected plots of Bigutar VDC	260,000
5.	Jantarkhani	Jantarkhani-2 south plot no. 712 to north plot no. 733	450,000
6.	Jantarkhani	Beside above mentioned area of Jantarkhani VDC	260,000
7.	Kerung	Kerung Dhap area plot no. 1194 to plot no. 1184	260,000
8.	Kerung	Kerung Dhap area plot no. 1181 to plot no. 1167	350,000
9.	Kerung	Kerung-3 plot no.1166 to Kerung-2 plot no. 939	260,000
10.	Kerung	Kerung-2 Pattale area plot no. 1767 to plot no. 706	700,000
11.	Tingla	Tingla-9 plot no. 165 to Tingla-6 plot no. 577	300,000
12.	Tingla	Tingla-6 plot no. 577 to Tingla-7 plot no 907 (except plots: 679,1043,1037,1046,1042,1039,924&923)	200,000
13.	Tingla	Tingla-7 plot no. 679, 1043, 1037, 1046, 1042, 1039, 924 & 923	80,000
14.	Garma	Garma-6 plot no. 384 to plot no. 373	300,000

S.N.	VDCs	Description	Rate/Ropani (NRs.)
15.	Garma	Garma-6 plot no. 372 to plot no. 335	200,000
16.	Garma	Garma-6 plot no. 659 to plot no. 390	260,000
17.	Garma	Garma-6 plot no. 389 to plot no. 387	200,000
18.	Garma	Garma-6 plot no. 392 to plot no. 416	300,000
19.	Garma	Garma-6 plot no. 417 to plot no. 432 and Garma-7 plot no. 331 to plot no. 329	200,000
20.	Garma	Garma-7 plot no. 330 to plot no. 51	400,000
21.	Garma	Garma-7 plot no. 50 (km. 47+900) to Chhulyamu Lumjekhola	600,000
22.	Salleri	Chhulyamu Lumjekhola to Salleri-7 plot no. 976	400,000
23.	Salleri	Salleri-5 plot no. 945 to plot no. 2094 Sergakhola	1,500,000
24.	Salleri	Salleri-5 Sergakhola to Salleri-4 and Salleri-2 plot no.536 and plot no. 277	450,000
25.	Salleri	Salleri-2 plot no. 1557 to Salleri-2 plot no. 667	1,500,000
26.	Salleri	Salleri-2 plot no. 668, 669, 670, 1863, 1860	650,000
Note: 1 ropani land equivalent to 0.0509 hectare			

78. Based on the decision of Compensation Determination Committee, the cost for land acquisition is given below. The total cost for the compensation of affected land is NRs. 33,764,985. Compensation budget has been allocated. But the distribution process of additional assessment carried out in September 2013 has not been completed.

Table 9.2: Compensation Cost for Private Land

S.N.	VDCs	Land Loss (Hectare)	Amount (NRs.)
1.	Okhaldhunga	0.18	2,614,880
2.	Bigutar	0.09	437,734
3.	Barnalu	0.34	1,748,906
4.	Jantarkhani	0.15	791,538
5.	Kerung	0.97	6,158,603
6.	Tingla	1.51	8,077,424
7.	Garma	0.71	4,922,928
8.	Salleri	0.59	9,012,972
Total		4.53	33,764,985

79. The compensation distribution work of Okhaldhunga-Salleri subproject road has almost been completed except additional assessment carried out in September 2013. Still, some cases of absentee, land certificate mortgaged in bank, death of land owner, dispute on land ownership have been noticed during compensation payment process. The process is ongoing to settle such cases and distribute compensation. The status of compensation payment and remaining cases is given below.

Table 9.3: Status of Compensation Payment and Remaining Cases

S.N.	Description	Plots	Amount (NRs.)
1.	Compensation paid	594	23,604,405
2.	Compensation process	31	1,334,596
3.	Absentees	197	7,228,146
4.	Land certificate in bank	4	82,272
5.	Pending legal process	40	1,515,566
Total		866	33,764,985

9.2 Cost of Private Structure

80. The compensation rate for the affected structure was estimated according to the type of structures. Altogether two private structures including varanda of house and gate have been affected by the project. The cost estimation was done with the consultation of local construction contractors and the community key stakeholders. The affected structures have not been demolished yet. During road construction, the affected structures will be acquired after the payment of compensation.

Table 9.4: Estimated Cost for Private Structure

S.N.	VDC	Type of Structure	Present Use	Area (SQF)	Amount (NRs.)
1.	Salleri	Semi-Modern	Verandah	245	300,000
2.	Salleri	Semi-Modern	Gate	172	200,000
Total				417	500,000

9.3 Rehabilitation Program to Vulnerable

81. Based on the census data, altogether 24 households were identified under vulnerable categories. Livelihood support training program was organized to the interested vulnerable households. The entitlement matrix provisions cash assistance of NRs. 10,000 per household for the instant support of their livelihood. Still, the distribution of economic rehabilitation assistance to the vulnerable household has not been completed. It is in the process of implementation.

Table 9.5: Rehabilitation Assistance to Vulnerable Household

S.N.	Vulnerable Categories	No. of HHs	Rate	Amount (NRs.)
1.	Aged member household	1	10,000	10,000
2.	Female headed household	9	10,000	90,000
3.	Dalits household	8	10,000	80,000
4.	Below poverty level household	6	10,000	60,000
Total		24	10,000	240,000

82. As a part of income restoration program for rehabilitation of the project affected people, three months livelihood support training (house-wiring and sewing-cutting) was conducted. During training need assessment, 17 households showed interest to participate in training out of 24 vulnerable households. During training program implementation only 5 households from vulnerable category participated and others declined training. The training program was

designed for 17 households and the remaining 11 households were participated from non-vulnerable displaced persons. Among 17 participants, 6 male and 11 female were been involved in training.

Table 9.6: Cost for Skill Development Training

S.N.	Item	No of Participants	Amount (NRs.)
1.	Sewing-cutting training	11	557,600
2.	House wiring training	6	365,000
3.	Other relevant activities and logistics	-	388,000
4.	Management/handling charge@12%	-	157,272
Total		17	1,467,872

9.4 Resettlement Plan Implementation Cost

83. There are also several RP implementation activities that need to be carried out at subproject level. Some of such activities are: public consultation and information dissemination, organizing CDC meetings, field verification, organizing and mobilizing Local Grievance Redress Committee, deed transfer and so on. In order to ensure such expenses, RP implementation cost has also been calculated and incorporated in resettlement budget.

Table 9.7: Estimated Cost for Resettlement Plan Implementation Activities

S.N.	Description of Tasks	Quantity	Rate (NRs.)	Amount (NRs.)
1.	Information dissemination campaign	LS	150,000	150,000
2.	Organizing CDC meetings	12	10,000	120,000
3.	Organizing LGRC meetings	40	10,000	400,000
4.	Public consultation meetings	LS	120,000	120,000
5.	Mobilization DLSO for deed transfer	LS	160,000	160,000
6.	Mobilization DLRO for deed transfer	LS	160,000	160,000
Total				1,110,000

9.5 Summary of Compensation and Resettlement Costs

84. The summary of resettlement implementation cost includes all the expenses required to compensate for the affected assets including rehabilitation costs and other financial assistance. The summary cost contains additional 10 percent contingency. The summary cost for the compensation and Resettlement Plan implementation is given below.

Table 9.8: Summary of Compensation and Resettlement Cost

S.N.	Cost Items	Amount (NRs.)
1.	Compensation cost for private land	33,764,985
2.	Compensation cost for private structures	500,000
3.	Rehabilitation assistance to vulnerable household	240,000
4.	Skill development training to the vulnerable household	1,467,872
5.	Resettlement plan implementation	1,110,000
6.	Contingencies (10%) of the cost	3,708,286
Total		40,791,143

CHAPTER-10: IMPLEMENTATION ARRANGEMENTS

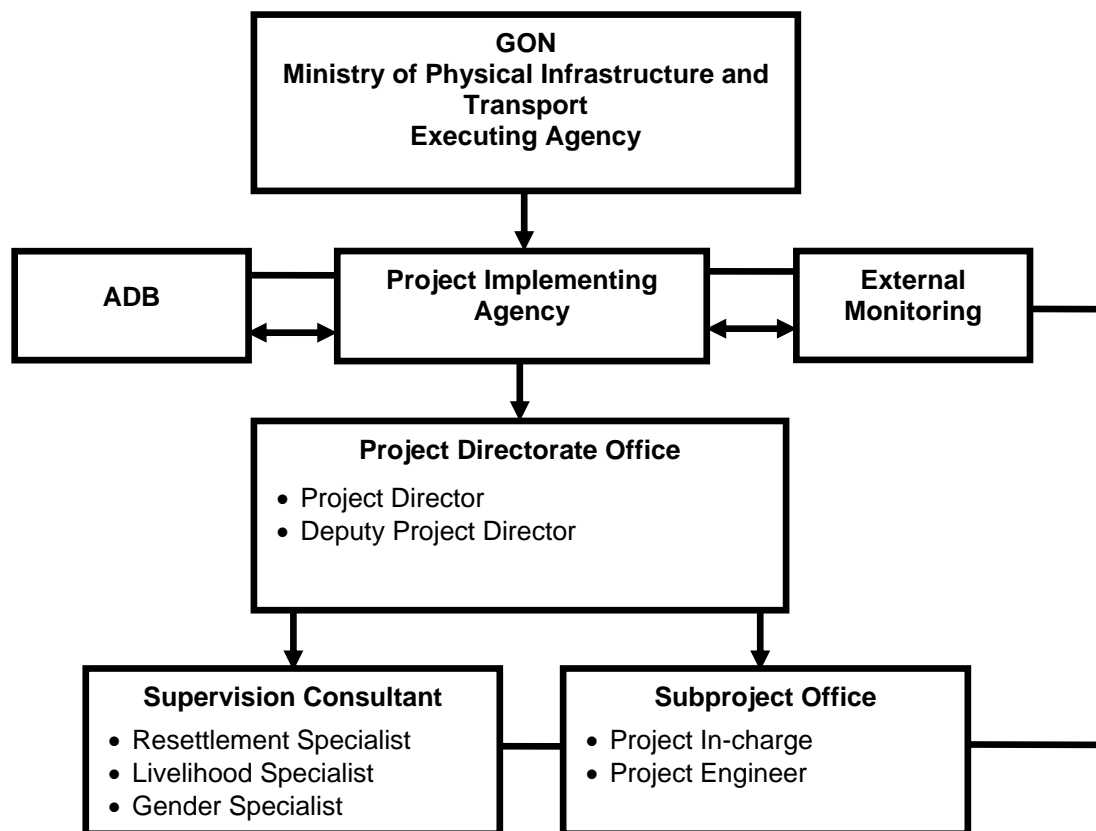

10.1 Institutional Setup

85. Ministry of Physical Infrastructure and Transport (MOPIT) is the Executing Agency (EA). The Project Directorate (ADB), Department of Roads (DOR) is the Project Implementing Agency (PIA) for this project. The PIA has been stationed at central level, and Subproject Office has been established at project implementation level. The Project Director of the project implementation unit (PIU) has the responsibility for coordinating and monitoring project, hiring Supervision Consultant, contractor and external monitor. The PIU has overall responsibility of project implementation.

86. The PIA has established Subproject Office for the subproject level headed by Project In-charge (PIC) with officer in rank of Divisional Engineer. The PIC is responsible for implementing the resettlement activities at field level with the help of Resettlement Specialist of Supervision Consultant.

87. The Resettlement Specialist of Supervision Consultant plays a crucial role implementing the Resettlement Plan. The Resettlement Specialist assists the PIA in implementing Resettlement Plan and other social mitigation plans regarding road construction. Furthermore, the Resettlement Specialist supports the PIC for resolution of grievances and implementation of Resettlement Plan, whereas the PIC is responsible to implement the Resettlement Plan.

Figure 10.1: Organizational Framework for Resettlement Activities

10.2 Implementation Schedule

88. The subproject started in December 2011 and the expected completion date of project is December 2014. The Project In-charge (PIC), Contractor, and Supervision Consultant have been mobilized and road construction activities are ongoing. Resettlement Plan implementation activities have been started from June 2012. Generally, civil works contracts will not be awarded unless required compensation payment is completed. In the context of this subproject road, compensation distribution process as well as income rehabilitation measures have been continued even after civil works have begun.

89. Still, the task of compensation distribution to the absentees and other legal pending cases is ongoing. Furthermore, distribution of rehabilitation assistance to the vulnerable households has not been completed. Moreover, the task of hiring external monitoring agency has been initiated. All the Resettlement Plan implementation activities will be completed before subproject completion.

Table 10.1: Resettlement Plan Implementation Schedule

S.N.	Activities	Time Period	Responsibility	Status
1.	Detailed Design and Survey	August 2010	Consultant	Complete
2.	Preparation of Resettlement Plan	September 2010	Consultant	Complete
3.	Notice for Land Acquisition	September 2011	DAO, Okhaldhunga & Solukhumbu	Complete
4.	Establishment of Subproject Office	January 2012	DOR	Complete
5.	Formation of Compensation Determination Committee	February 2012	DOR/CDO	Complete
6.	Determination of Compensation of Affected Assets	February 2012	DOR/CDO	Complete
7.	Additional Notice for Land Acquisition	April 2012 & September 2013	DAO, Okhaldhunga & Solukhumbu	Complete
8.	Mobilization of Supervision Consultant & Contractor	January 2012	DOR	Complete
9.	Updated Resettlement Plan	March 2014	Consultant	Complete
10.	Formation of Local Grievance Redress Committee	June 2012	DOR/SC	Complete
11.	Compensation Distribution of Project Affected Assets	June 2012	DOR/CDC	Ongoing
12.	Income Restoration Training to Vulnerable Household	October 2013	DOR/SC	Complete
13.	Rehabilitation Assistance to Vulnerable Household	March 2014	DOR/SC	In Process
14.	Information Dissemination and Public Consultation	Project Period	DOR/SC	Regular Process
15.	Transferring the Land Ownership	June 2012	DLRO/DLSO/DOR	Ongoing
16.	External Monitoring of RP Implementation	April 2014	DOR	In Process

CHAPTER-11: MONITORING AND REPORTING

90. The resettlement activities have been monitored internally by Department of Roads (DOR), and external evaluation will be conducted through an independently appointed agency, to provide feedback to management on implementation and to identify problems and successes as early as possible.

11.1 Internal Monitoring

91. The Project Implementation Unit (PIU) and Resettlement Specialist of Supervision Consultant have been responsible for internal monitoring. The monitoring activities such as the compensation for the loss of assets, identification of vulnerable group has been made during the implementation of the project. The Resettlement Specialist of Supervision Consultant provides feedback and suggestions for the effective implementation of Resettlement Plan. PIU maintains record of all activities related to the resettlement in the database with the help of Resettlement Specialist. Subproject Office is responsible to keep record of land acquisition and compensation payment data for field level monitoring.

11.2 External Monitoring

92. External monitoring is required to evaluate the overall monitoring activities carried out under the internal monitoring and to submit an external monitoring report to determine whether the resettlement goal has been achieved. External monitoring will be carried out through outside researcher or consulting agency or through independent consultants. The PIU has initiated the process of hiring external monitoring agency. The key objective of external monitoring include:

- Assess social and economic impact of land acquisition and economic rehabilitation of the Displaced Persons;
- Verify the objective of enhancement or at least restoration of income levels and living standard of the Displaced Persons have been met;
- Suggest modifications on Resettlement Plan implementation and economic rehabilitation, where necessary, to achieve the principles and objectives as set before;
- Make final ex-post evaluation to ensure that all Resettlement Plan implementation activities have been completed; and
- Maintain all the records including financial.

11.3 Reporting

93. Resettlement Specialist of Supervision Consultant is responsible for monitoring the resettlement activities and submits monthly Resettlement Plan implementation progress report to DOR. DOR submits quarterly and semi-annual reports of Resettlement Plan implementation to ADB with the help of Resettlement Specialist of Supervision Consultant.

94. The independent monitoring agency will submit external monitoring report by the end of December 2014 directly to ADB with a copy to Executing Agency to determine whether resettlement goals have been achieved or not. The external monitoring agency will also carry out a final ex-post evaluation to ensure that all resettlement activities have been completed.

Annex-3:
Minutes of Public Consultation Meeting

छलफलका निर्णयहरु :

१. प्रस्तावित सडक निर्माणको कारण भैरहेको सार्वजनिक सेवासुविधामा कुनै अवरोध हुन नहुने तथा अवरोध आएमा यी सेवासुविधाको यथोचित पुनर्स्थापनाको व्यवस्था हुनु पर्ने ।
२. सडक निर्माणको समयमा आयोजनाबाट प्रभावित तथा स्थानीय वासिन्दाहरुलाई रोजगारीमा प्राथमिकता दिनु पर्ने ।
३. प्रस्तावित सडक निर्माणको समयमा आईपर्ने सबै प्रकारको अवरोध एवं समस्याहरुलाई समाधान गर्न स्थानीय वासिन्दाले सहयोग पुर्याउने ।
४. सडकले प्रभावित गरेको घर संरचना तथा जग्गाको उचित मुवाब्जा दिनु पर्ने ।
५. सडक आयोजना निर्माण गर्दा स्थानीय वासिन्दाहरुको सहभागिता तथा सुझावलाई आयोजनाले मनन गर्नु पर्ने ।

A series of handwritten signatures and stamps in black ink, arranged horizontally. The signatures are stylized and vary in length. There are several circular stamps interspersed among the signatures, some containing text that is difficult to read due to the handwriting. The overall appearance is that of a formal document or agreement.
