SPEECHES

Kathy Kleiman had a wonderful and exciting book tour visiting high schools, colleges, graduate programs, computer science teacher meetings, STEM fairs, technology companies, and conferences across the country. If we had to name one highlight (and there were many), it would be incredible honor of keynoting the 50th Conference of SIGGRAPH, the premiere computer graphics conference, Los Angeles in August 2023 and speaking with high school students studying cybersecurity, web design, and programming at Everett High School near Boston!

Here is the list of the incredible places we talked about *Proving Ground*. Thank you for your interest and incredible questions!
