 - Universities, research institutes, hospitals etc.
- Resources
 - Budget: 600 million euros annually
 - Personnel: 360 in Finland and abroad
 - Public agency under the Ministry of Employment and the Economy

Tekes

Our strategic priorities
for 2012 and onwards

Smart cities & Intelligent Environments

Planning has started concerning future actions
in the smart city context:

- Smart energy systems and sustainable material economy
- Safety and security of the living environment which makes good use of digital systems
- User-oriented products, services and processes

Witty City

Why a Smart City programme is needed?

- Urbanisation continues globally
 - Cities grow, shrink and transform
 - Growing demand for smart city solutions
- The full potential of new innovations and knowledge is not taken into account in investments
 - Improve cooperation between users, public and private sector
- User needs are not taken into consideration well enough
- Finnish companies are small actors in global markets
 - Enabling technologies have been developed and tested, but there is growing need for integrated solutions

Witty City

Finland is a forerunner in smooth, ecological everyday services and technologies.

Tekes promotes the cooperation of **users, enterprises and public** actors in the interface of innovation and investment.

Finland is a desired **test environment** and Finnish companies are able to compete in growing global markets.

Witty City

- The new Tekes approach puts the Cities in the centre.
- The Cities are leaders and owners of an urban system, and thus integrators of research and innovation.
- R&D&I projects are funded and demonstrations are an essential part of each project – urban living labs.
- The network of (European) cities is promoted – how?

What is a Witty City?

- For citizens a Witty City offers safe and clean living environment
 - Smooth transportation, comfortable work and leisure
 - Well-being and health-related services readily available
- For municipalities a Witty City is based on local conditions and strengths
 - A vibrant business community
 - Modern, integrated services and solutions
 - Implemented in accordance with sustainable development and energy efficiency together with users
- For companies a Witty City acts as a development platform
 - A Witty City enables development of new solutions directed at the international markets

Goals of the programme

- To encourage cities to open their investments and urban development projects to test beds for companies
 - To help innovative SMEs to get first commercial references for new solutions and modes of operations
- To integrate innovatively knowhow from different disciplines and industries
 - New business and cooperation networks to create integrated solutions
 - Renewal of industrial branches, new business and earnings models
- To focus on demand side innovation
 - Especially to bring supply and demand together
- To create ability and readiness for international business
 - Networks and references for new solutions
- Witty city offers smooth, seamless everyday services
