

# #123forEquity Pledge to Act to Eliminate Health Care Disparities

## About the Pledge Campaign

The American Hospital Association (AHA) launched the #123 for Equity Pledge to Act Campaign in July 2015, building upon the National Call to Action to Eliminate Health Care Disparities. With two years of progress, the pledge now urges hospital and health system leaders to continue to develop and implement strategies to increase the collection and use of race, ethnicity, and language preference and sociodemographic data; advance cultural competency training; and increase diversity in leadership and governance. In addition, a fourth goal has been added to improve and strengthen community capacity.

To accelerate progress toward eliminating health disparities, increasing quality of care and advancing diversity and inclusion in health care, all hospitals are being called on to make these efforts a priority. Please consider endorsing the pledge today, and join us as we encourage and support hospitals and health care systems to achieve their health equity goals.

## Pledge Commitment

**I pledge to take action on the AHA’s National Call to Action to Eliminate Health Care Disparities’ goals to ensure that quality and equitable health care is delivered to all persons.**

**I pledge to take action on at least one of the following goals. The goals selected below will be completed in alignment with the strategic goals of my organization.**

- Increase the collection, stratification and use of race, ethnicity, language preference and other sociodemographic data to improve quality and safety
- Increase cultural competency training to ensure culturally responsive care
- Advance diversity in leadership and governance to reflect the communities served
- Improve and strengthen community partnerships

# #123forEquity Pledge to Act to Eliminate Health Care Disparities

Through the #123forEquity pledge, we are challenging every hospital leader to commit to equity and quality of care by taking the following three steps:

## 1. Take the Pledge

Pledge to begin work toward achieving the National Call to Action goals to help ensure quality and equitable health care for all persons in every community.

## 2. Take Action

Implement strategies that are reflected in your strategic plan and supported by your board and leadership. Provide updates on progress to the AHA and your board in order to gauge progress and develop tools/resources to support your work.

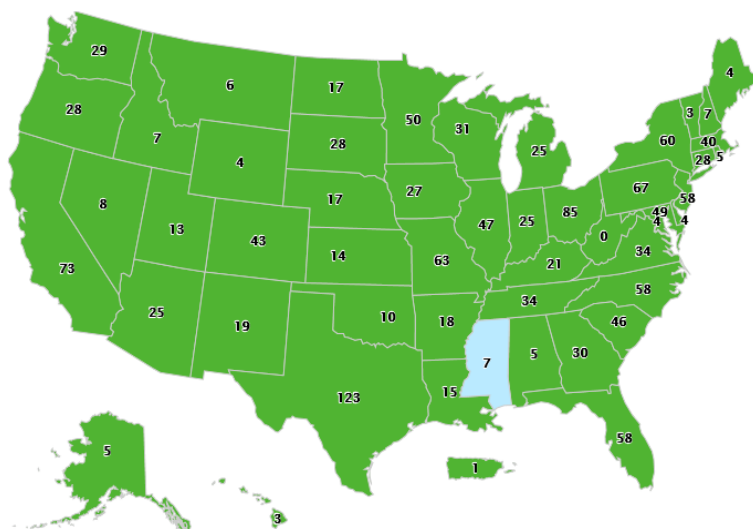

## 3. Tell Others

Achieve the goals, be recognized and tell your story. Share your learnings with others through conference calls and other educational venues, including social media, to accelerate progress and demonstrate to the public our collective commitment.

## Recognizing the Field

Each year, the AHA honors hospitals and health systems who are making progress by featuring their commitments, achievements and stories. These outstanding organizations are recognized nationally and invited to speak about their progress at meetings and conventions throughout the year.

Read about the hospital and health systems who have been honored at [www.equityofcare.org/award](http://www.equityofcare.org/award).

### AHA National Call to Action Partners

Through the AHA’s National Call to Action to Eliminate Health Care Disparities that was started in 2011, five associations formed a partnership to move the needle on the progress hospitals could make to provide quality and equitable care to every person in every community.
