

Unlocking Plant Data to Improve Productivity

Sight Machine and Microsoft are helping manufacturers improve profitability, productivity and sustainability with production data across the enterprise and value chain.

Sight Machine on Azure provides a single data foundation for operations and analysis. Our streaming platform continuously transforms OT data into useful information in real time, so that you can make better, faster decisions. With system-level visibility and dynamic insights into production needs, operators, engineers and operations leaders can visualize, analyze and share transformed data, providing an engine for productivity enhancements.

A Single Data Foundation for Agile Factories

Dynamic Data Modeling

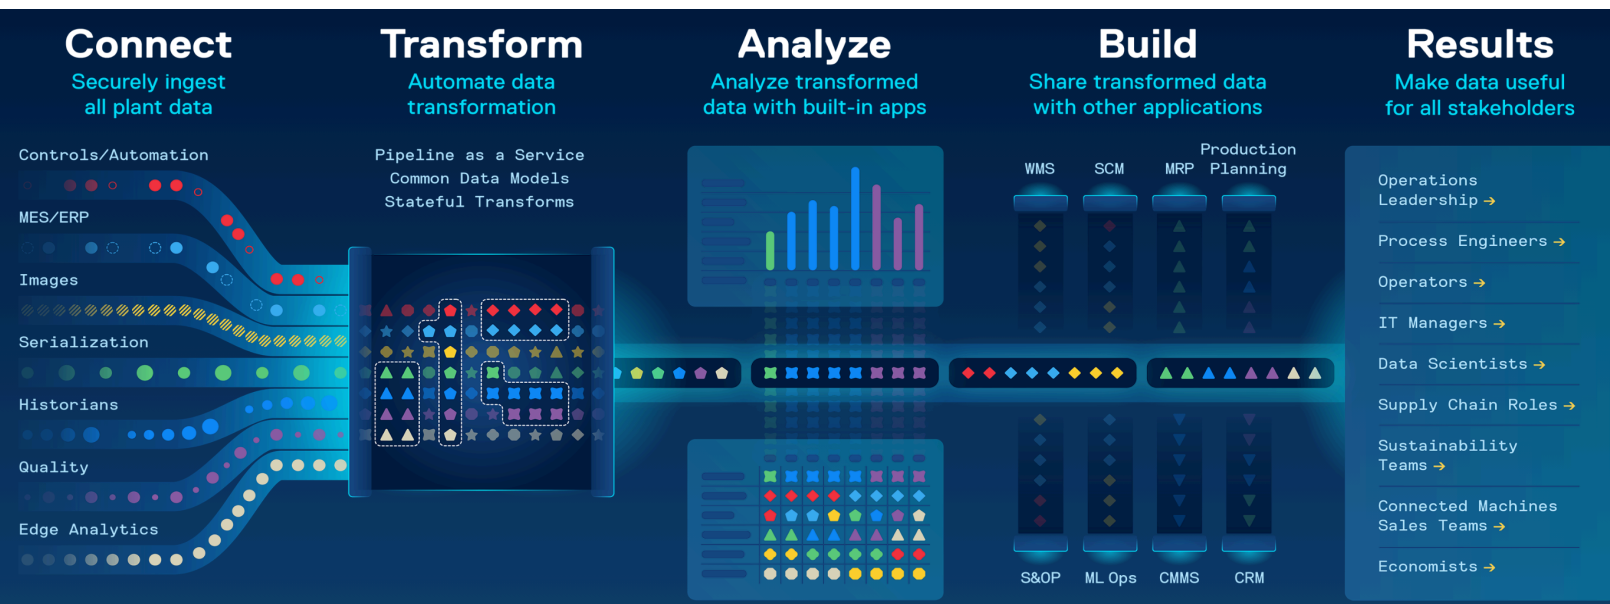

Single stream-processing pipeline and common data models automate real-time data transformation

Top Floor to Shop Floor Insights

Single trusted and dynamically updated view of production for every stakeholder to turn insights into action

Supply Chain Resiliency

Transformed data can be shared with enterprise applications to extend value chain opportunities

Powering and Scaling Impact

Global Automotive
\$2M Annual cost reduction

International Dairy Producer
10M Line throughput increase

Industrial MFG
19% Asset downtime decrease

Unlock your plant data to build more agile factories and accelerate your transformation to a truly digital organization today.
