

Ignite Innovation as Test Technician at Intersoft Electronics!

Intersoft Electronics is a Belgian engineering company active in the domain of air traffic control (ATC) and air-defence radar. It is our mission to create and deliver cutting edge solutions in these fields and enable our customers to achieve comprehensive and reliable radar coverage leading to safer airways. Our products and services are used worldwide!

Test Technician

Why Choose Intersoft Electronics?

Are you someone who thrives on challenges, values teamwork, and enjoys a dynamic work environment? At Intersoft, we offer more than just a job – it's a place to boost your life and make a real impact.

Your Role:

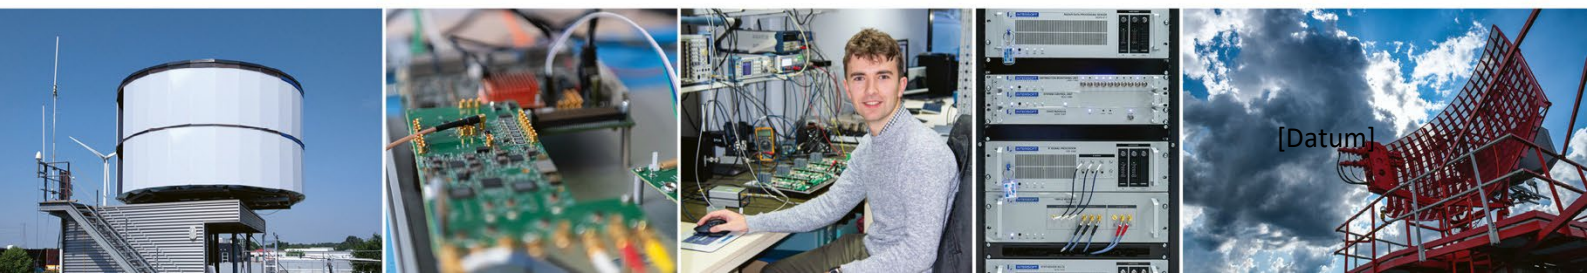

As an Electronics Production and Maintenance Technician, you play a crucial role in the production process and quality assurance of electronic devices. Your responsibilities include:

- Receiving assembled boards and conducting initial tests.
- In case of test failures, proactively performing troubleshooting and resolving issues.
- After the assembly of subcomponents from production, conducting tests again.
- In the event of test failure, clear communication with the production department and discussion of findings.
- Drafting detailed test reports.
- Meticulous reporting in accordance with applicable ISO standards to ensure quality standards.
- Responsible for the calibration of devices to meet specifications.
- Upon the return of devices from customers, conducting recalibration, repairs, and resolution of bugs.
- Repeated tests after the maintenance phase.
- Accurate recording of all necessary information in files and reports.
- Providing active support to engineers and R&D in testing and developing new products, including prototyping.
- Detailed documentation of all performed tests in reports and templates.
- Providing technical internal support to colleagues abroad.

Your Talents:

- Bachelor-level, showcasing analytical and problem-solving skills.
- Demonstrate a genuine interest and enthusiasm for the field of technology, with a proactive approach to stay informed about industry trends.
- Have specific knowledge in MS Electronics, enabling efficient and effective performance in the designated role.
- Proficient in both English and Dutch, with the ability to communicate effectively in a multicultural and multilingual work environment. Additional language skills are considered a valuable asset.

Together we make the sky safer

What We Offer:

- Congestion-free working environment, flexible working hours and the option to work up to 2 days at home
- Cool business activities with nice colleagues
- A varied job in a stimulating, high-tech working environment
- Opportunities to develop and learn to your fullest
- Permanent position with a market-based salary, group insurance, meal vouchers, ...
