REPORT NOTES AND EXCLUSIONS

**** Plumbing, Electrical, Appliances, are not included in this estimate ****

At ITEL, we take very seriously the responsibility of determining whether or not cabinets should be repaired or replaced. We hire experienced professionals - we call them Cabinet Repair Analysts - that have many years of experience performing cabinet repairs and can tell the difference between cabinets that can be repaired and cabinets that need to be fully replaced.

One of our Cabinet Repair Analysts has examined your cabinets and has determined that your cabinets can be effectively repaired. The results of this analysis can be found in ITEL's Repair Analysis Report, which includes the following:

- 1) An examination of whether the damaged cabinets can be properly repaired and restored
- 2) A detailed breakdown of the methods, procedures, and costs to perform the repair and restoration work.
- 3) A search to ensure that our cabinet repair partner, Renovar, has a qualified, experienced repair professional in your area that is available to perform your repair.

We offer a premier cabinet repair and restoration service and we have repair professionals located across the United States. Our experienced artisans are principally focused on restoring damaged cabinets back to their pre-loss condition or better.

Renovar
