

Compliance Statement to ODS Regulation (EC) 1005/2009 for its semiconductor products in brand ams and OSRAM

Ozone depleting substances (ODS) are chemicals that when released in the environment, destroy the earth's protective ozone layer - including: Chlorofluorocarbons (CFCs), Halons, Carbon Tetrachloride (CCl₄), Methyl Chloroform (CH₃CCl₃), Hydrobromofluorocarbons (HBFCs), Hydrochlorofluorocarbons (HCFCs), Methyl Bromide (CH₃Br), Bromochloromethane (CH₂BrCl).

We, upon review of the material composition and declaration forms and based on the best available information provided by our suppliers, declare that our products do not use ozone depleting substances or its mixture or isomers of such substances mentioned in Annex A, Annex B, Annex C, Annex E or Annex F of the Montreal Protocol above the legal threshold limits. As our semiconductor products are "articles", not chemicals, we see no risk to cause releases that would impact the atmosphere in a normal product application and use.

More facts on the uses and risk management, and final rules for the PBT Chemicals can be viewed here:

- The EU Ozone Regulation [Ozone Regulation | Climate Action \(europa.eu\)](#)
- Montreal Protocol Handbook [14th Ed. \(2020\)](#)

We continue to monitor our semiconductor products and the supply chain for the requirements posed by the regulation. For other inquiries, please visit our webpage: [\(Product stewardship | ams OSRAM \(ams-osram.com\)\)](#) or contact your respective sales representative for the material declarations of specific semiconductor products.

The information provided in this statement represents our knowledge and belief as of the date that it is provided. We base our knowledge and belief on information provided by third parties and make no representation or warranty as to the accuracy and shall have no liability for the consequences of use of such information. We have taken and continue to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. We and our suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.
