

Backup SaaS application data, including Mail, Calendars, Contacts, Tasks, Groups, Teams, OneDrive, SharePoint, and more.

Key Features of Backup for Microsoft 365

- 
Backup Retention
 Automate all your Microsoft 365 backups, including Mail, Calendar, Contacts, Tasks, SharePoint Online, One Drive, Office Groups, and Teams.
- 
Recover Anytime
 Quick data recovery from any point in time, with granular level restore.
- 
Intuitive and Insightful
 Simple and easy-to-use web-based interface for multi-user access and to gain relevant insights into email analytics.
- 
Secure and Private
 Data is AES-256 encrypted in transit and at rest and is stored in SOC2, FISMA, ISO 27001, and SSAE-16 compliant data centers.
- 
Powerful Search
 Fast search supporting search across backups, emails, and products, and enables export of the search to .PST.
- 
Optional Archive Functionality
 Create retention policies for users, searches, and messages, create audit logs, compliance tags, and more.

Effortlessly backup and restore all business-critical Microsoft 365 data with a reliable solution that protects against modern security threats and helps meet strict regulatory compliance requirements.

Why Backup Microsoft 365 Data?

According to Microsoft's Services Agreement (Sec.2), the ability to access and recover your data in the cloud is your responsibility. Backup of Microsoft 365 data helps ensure business continuity in the event of any data loss scenario. NovaBACKUP's SaaS Backup option secures distributed data including Outlook emails, OneDrive documents, SharePoint files, and Teams conversations to meet strict compliance requirements for HIPAA, GDPR, Can-Spam and other regulations.
