

Litchfield National Park

Bird List

Litchfield National Park is home to an amazing array of bird species. Some 169 have been recorded within the Park. This list includes birds which have not yet been recorded on the Park but have been recorded in close proximity.

Legend

* Occur in wet season only (late September to April)

Occur in dry season only (April to September)

Each species has an estimated abundance and habitat code adjacent to their name eg. C/WL meaning this bird is common in a woodland habitat.

Estimated Abundance Codes;

C - Common, requiring little effort to locate this species.

UC - Uncommon, can be found however may require extended walks.

R - Rare, not likely to find them.

V - Vagrant, very few records.

Habitat Codes;

WL - Woodland

M - Monsoon Forest

FP - Flood Plain

Wet - Wetland

A - Aerial

ESC - Escarpment
