

Reduce File Storage TCO with Amazon EFS and Amazon FSx

David Stein

Storage Business Development, AWS

Agenda

- Challenges with on-premises NAS
- AWS File storage services and use cases
- TCO examples
- Getting file data into AWS
- Wrap up and Q&A

Challenges with On-Premises File Storage

Challenges with on-premises storage solutions

Time

Cost

Complexity

- Procurement

- Capital Expense

- Expertise

- Delivery

- Provisioning

- Availability

- Installation

- SW & maintenance

- Backup & DR

- Configuration

- Warranty renewals

- Scalability

- Physical

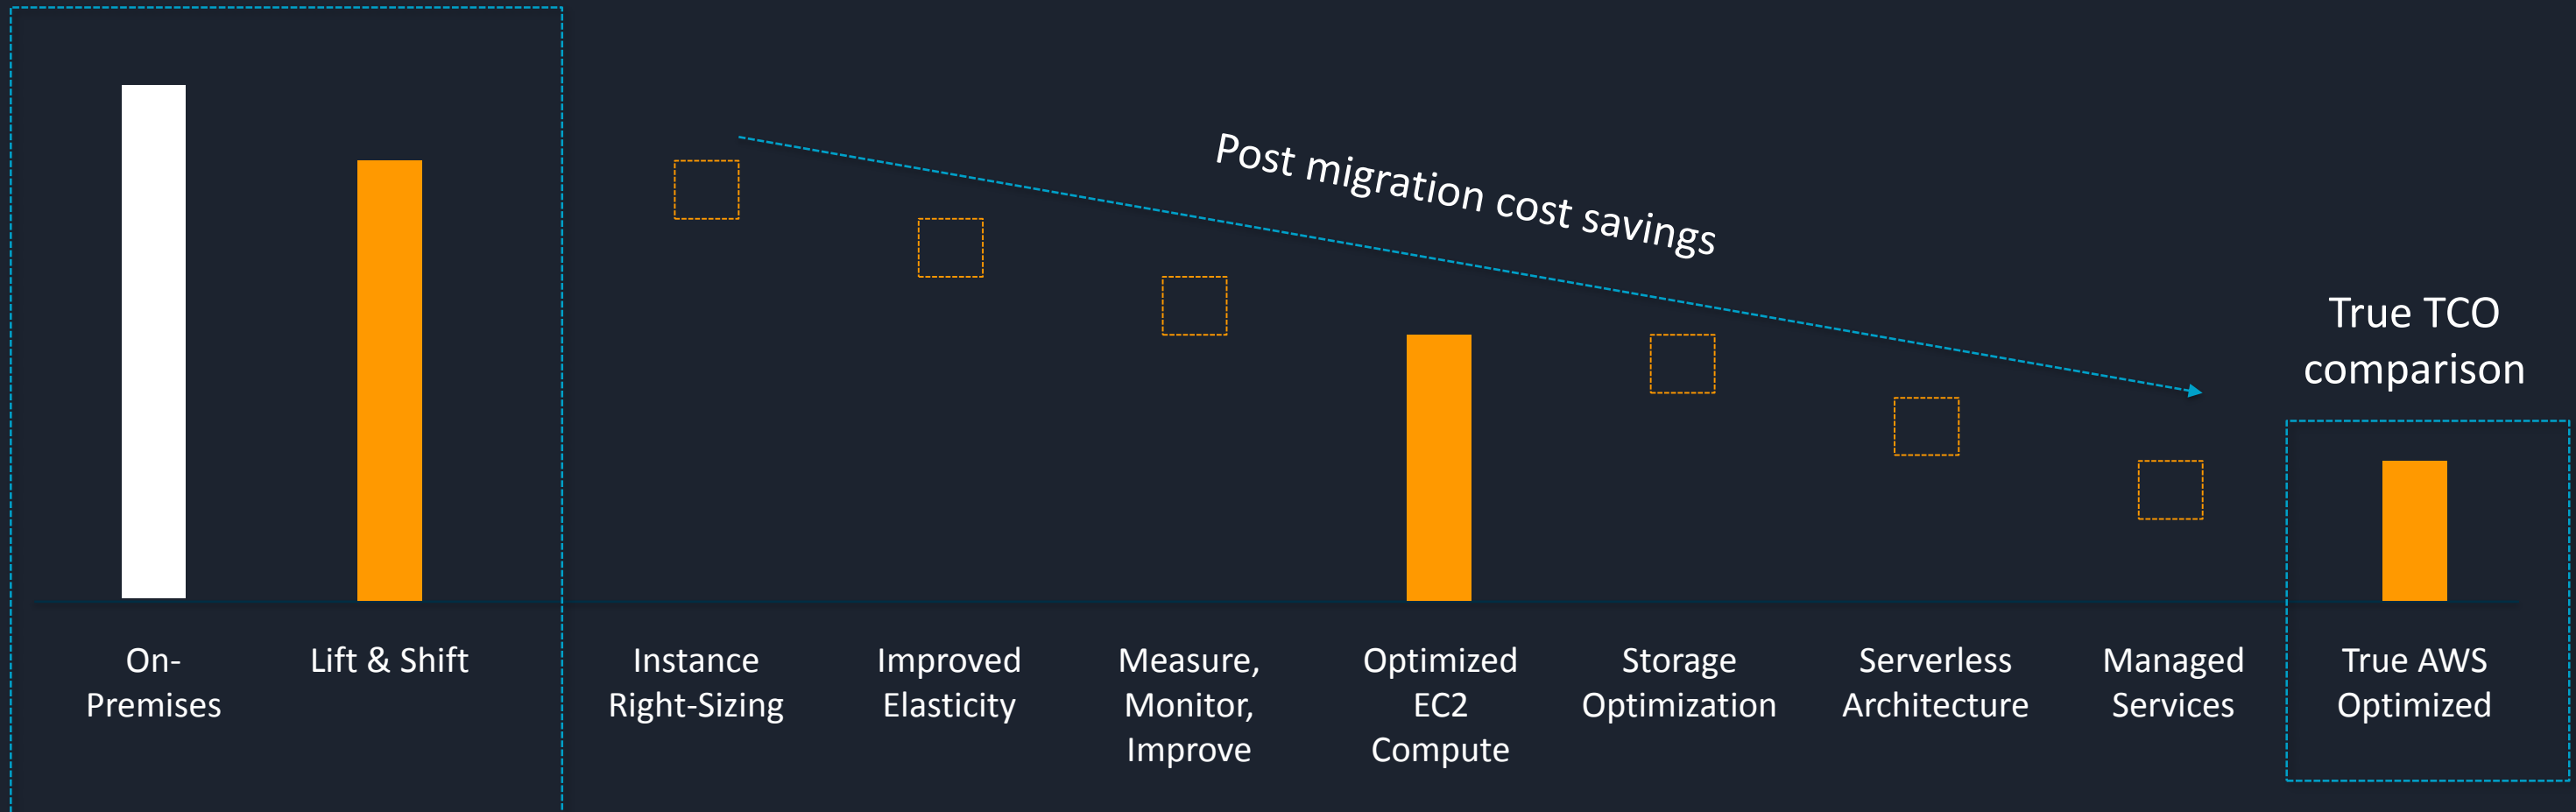

- Security & Compliance

What if there's a Hardware failure?! More Time! More Cost! More Complexity!

Cost savings improve through optimizations

Typical TCO comparison

AWS File Storage services and Use Cases

AWS has been helping enterprises for 13 years

Increase agility

Accelerate innovation

Strengthen security

Reduce cost

Storage portfolio breadth & depth

Block storage

Amazon
EBS

File storage

Amazon
EFS

Amazon FSx for
Windows File Server

Amazon FSx for
Lustre

Object storage

Amazon
S3

Hybrid

AWS Storage
Gateway family

Transport and edge

AWS DataSync

AWS Transfer for
SFTP

AWS Snow Family

Backup

AWS Backup

Fully managed cloud file systems

AWS provides file system options that help you easily address the diverse needs of your file-based applications and workloads

FILE SYSTEMS FOR BUSINESS WORKLOADS

Amazon EFS

Fully managed cloud-native file system for Linux-based applications

LINUX-BASED WORKLOADS

Amazon FSx for Windows File Server

Fully managed Windows file servers for business applications

WINDOWS-BASED WORKLOADS

FILE SYSTEM FOR COMPUTE-INTENSIVE WORKLOADS

Amazon FSx for Lustre

Fully managed Lustre file system for high performance workloads

COMPUTE-INTENSIVE WORKLOADS

AWS file storage innovations and features to optimize cost

File storage

EFS Infrequent Access price reduction

EFS Lifecycle Management policies

EFS Provisioned Throughput

EFS Encryption in Transit

EFS, FSx in US West (N. California),
Asia Pacific (Singapore, Tokyo), Europe (London)

EFS in Europe (Paris), Asia Pacific (Mumbai, Seoul) and Central Region
(Canada)

FedRAMP compliance

FSx Windows direct integration with on-premises Active Directory

Inter-VPC/account/Region access via VPC Peering/Transit Gateway

FSx Windows support for Shadow Copies

Integration with AWS Managed AD across VPCs and Accounts

FSx in Europe (Frankfurt, Stockholm), Asia Pacific (Sydney)

FSx SOC compliance

FSx for Lustre lower minimum file size to 1.2TB

Data transfer

DataSync can now transfer data to and from SMB file shares

DataSync supports Amazon VPC endpoints

AWS Transfer for SFTP now supports AWS PrivateLink

Storage Gateway Hardware Appliance

Storage Gateway tag-on-create & tag-based access control

Tape Gateway in 2 new regions

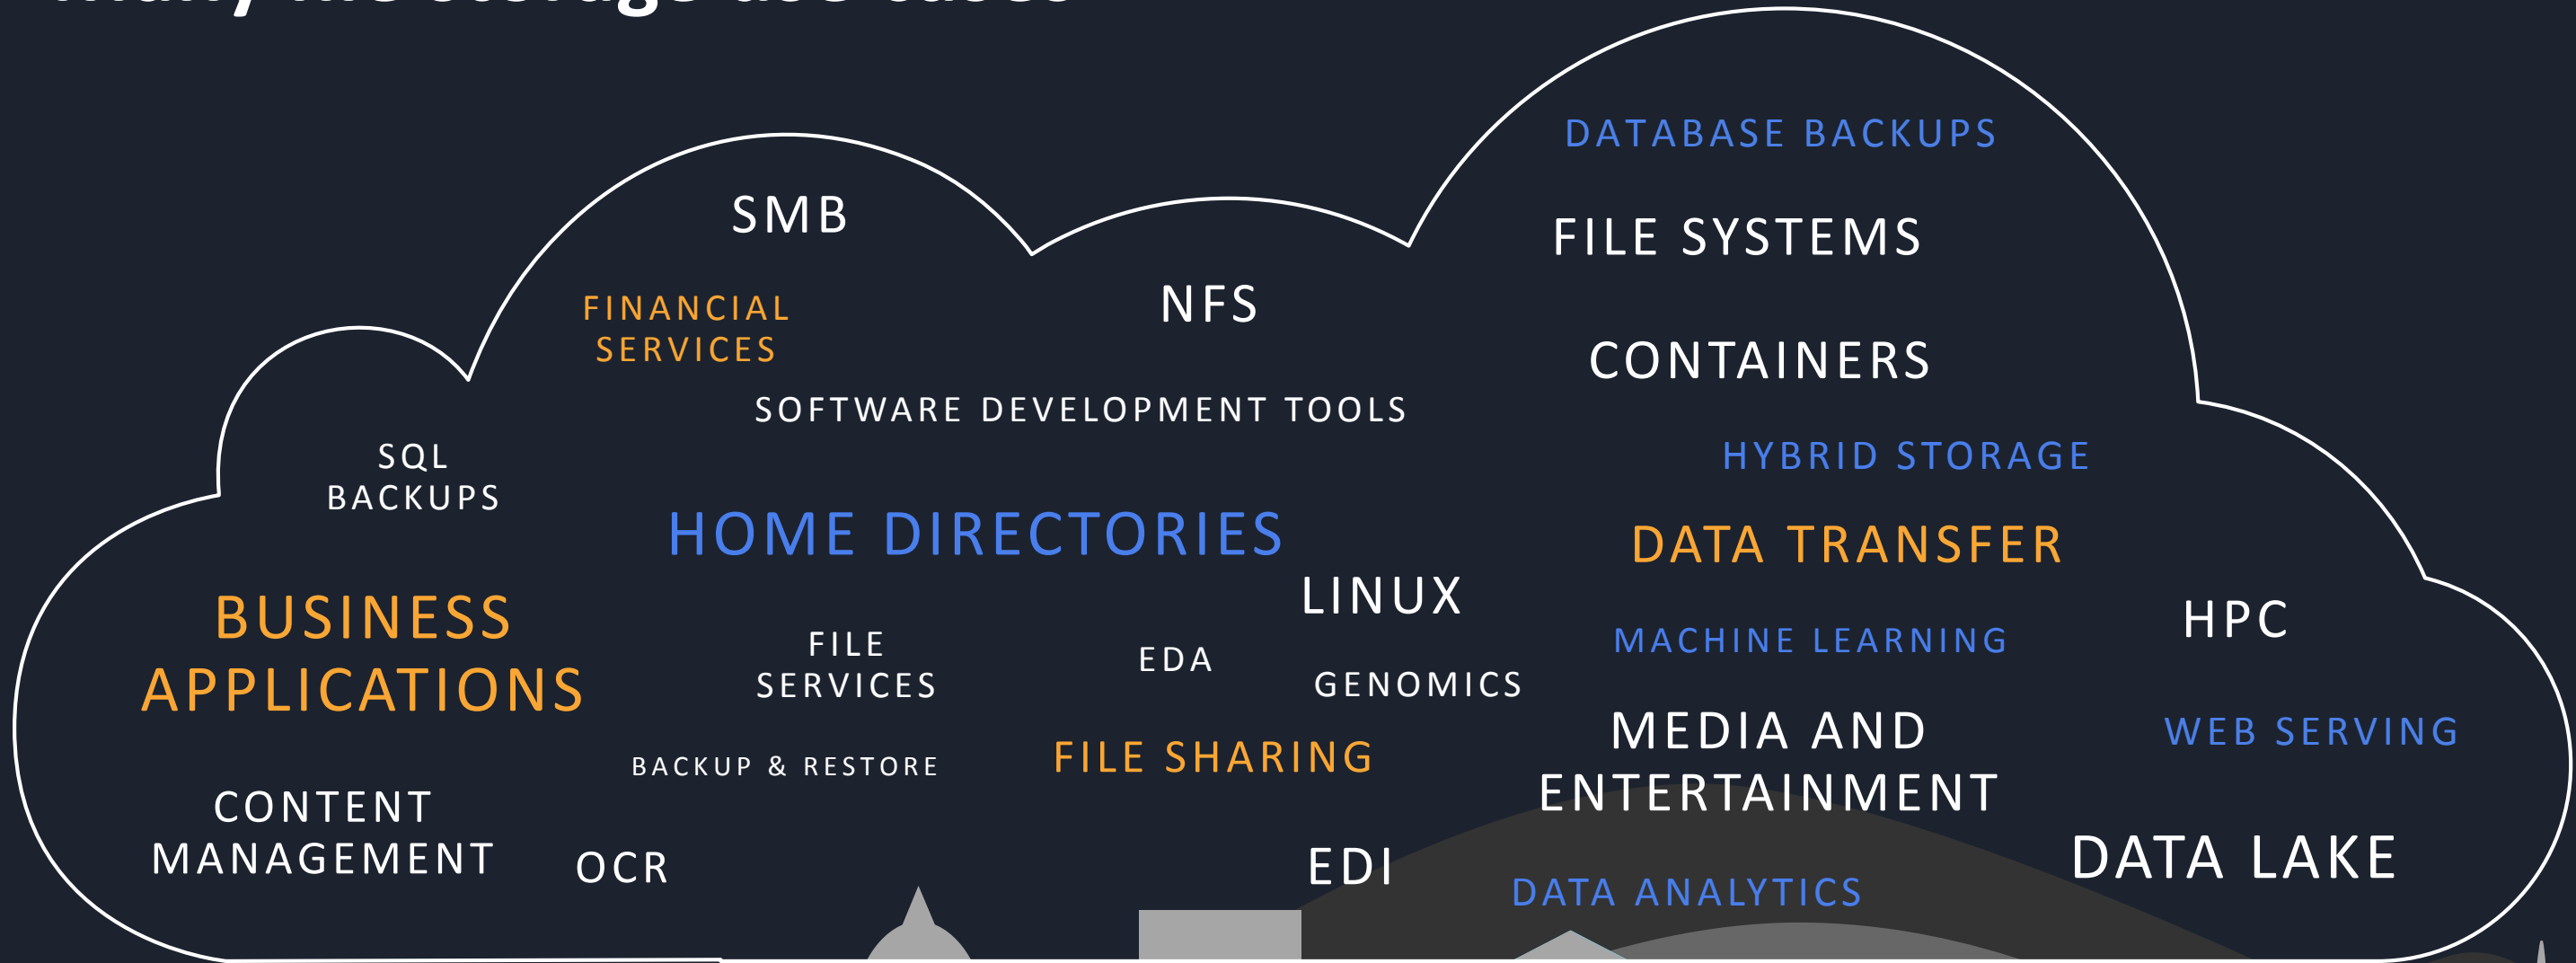

Snowball Edge Compute Optimized

AWS Transfer for SFTP now supports AWS
CloudFormation and host key import

File Gateway SMB support

Many file storage use cases

Amazon EFS

Amazon EFS

Scalable, elastic, cloud-native Linux file system

10 GB/sec & 500K

Elastic and scalable

IOPS

Performance

Storage classes

Shared access

Highly durable and available

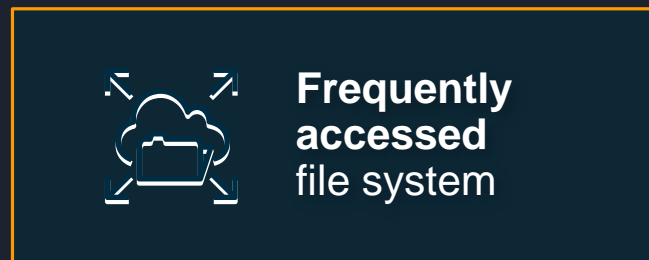

Secure and compliant

EFS Infrequent Access

Automatically lower cost storage for EFS file data as it becomes less frequently accessed

NEW! **92% savings** for files accessed <1 time per month

EFS Standard

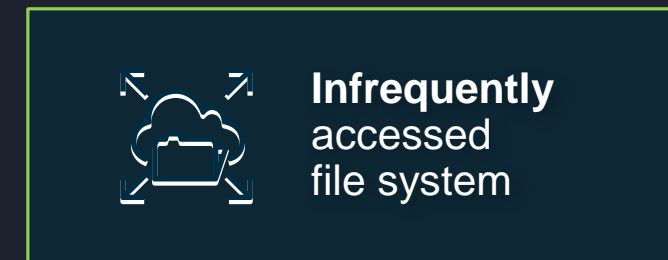

EFS Lifecycle Policy

14, 30, 60, 90 day policy options

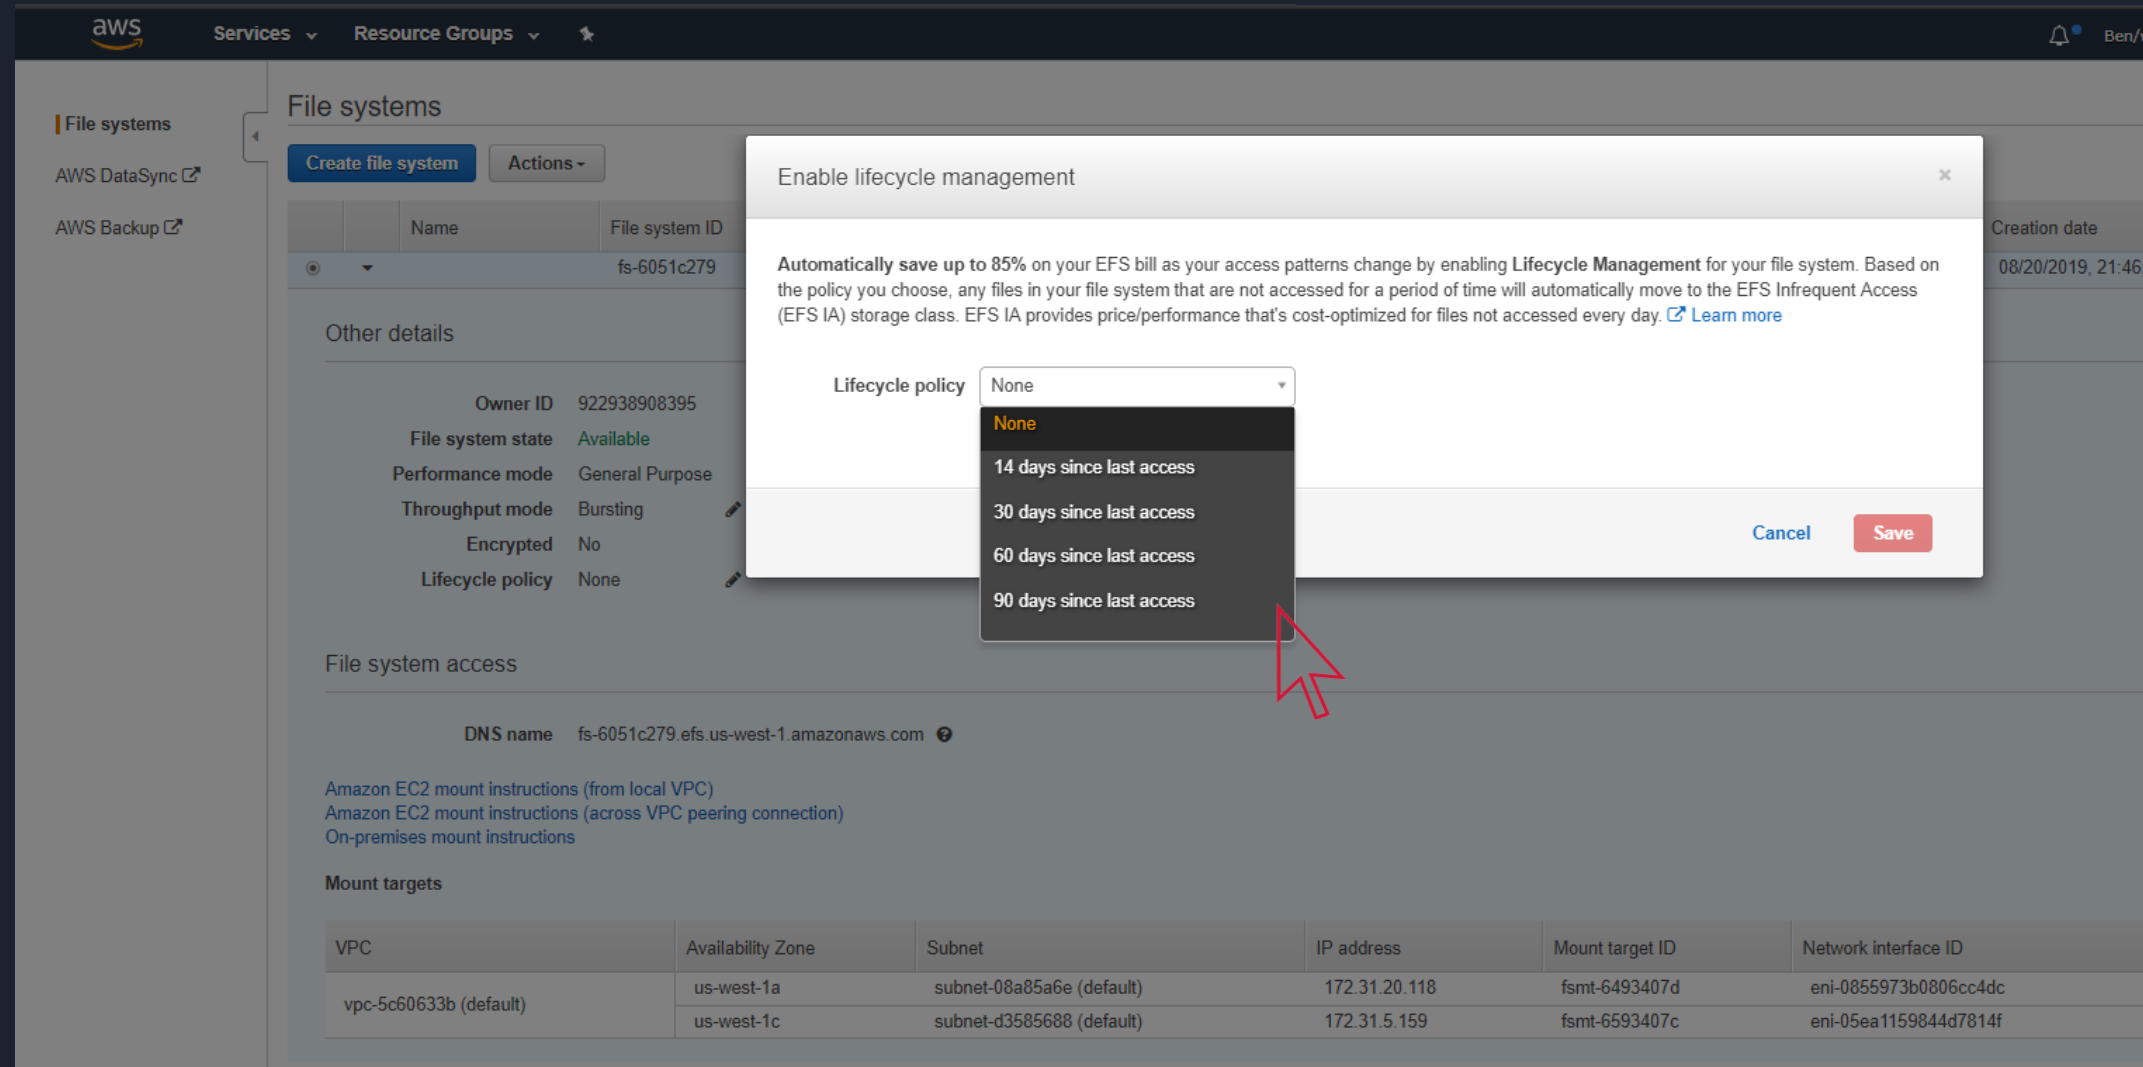

EFS IA

Saving 92% is as easy as 1-2-3 clicks

Amazon EFS IA

Enable lifecycle management

Automatically save up to 85% on your EFS bill as your access patterns change by enabling **Lifecycle Management** for your file system. Based on the policy you choose, any files in your file system that are not accessed for a period of time will automatically move to the EFS Infrequent Access (EFS IA) storage class. EFS IA provides price/performance that's cost-optimized for files not accessed every day. [Learn more](#)

Lifecycle policy:

- None
- 14 days since last access
- 30 days since last access
- 60 days since last access
- 90 days since last access

Cancel Save

File systems

Create file system Actions

Name	File system ID	Creation date
	fs-6051c279	08/20/2019, 21:46:1

Other details

Owner ID: 922938908395
File system state: Available
Performance mode: General Purpose
Throughput mode: Bursting
Encrypted: No
Lifecycle policy: None

File system access

DNS name: fs-6051c279.efs.us-west-1.amazonaws.com

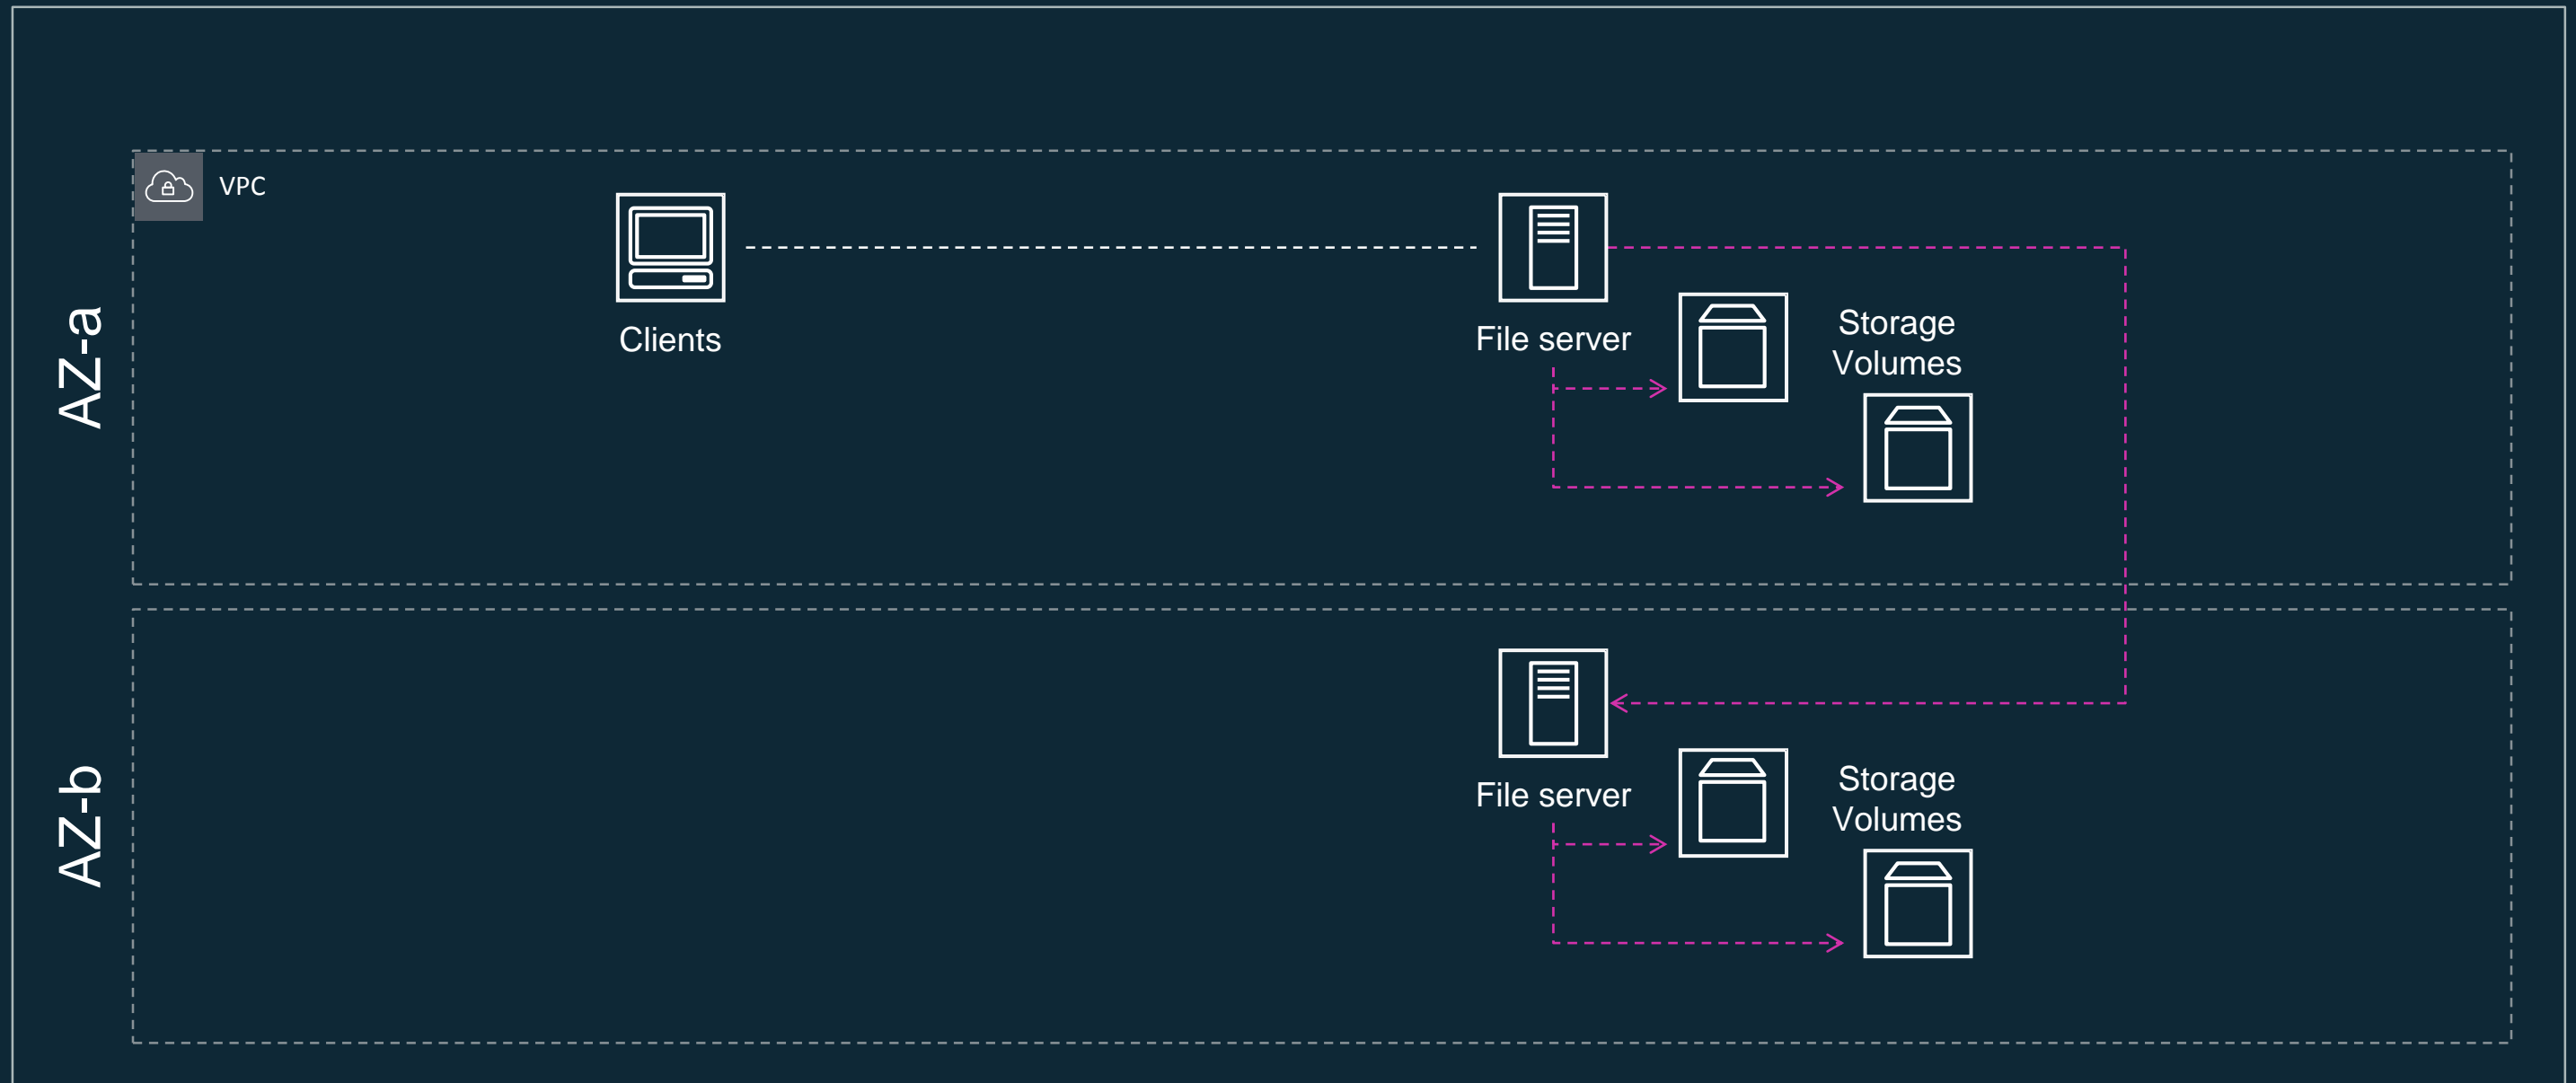

Amazon EC2 mount instructions (from local VPC)
Amazon EC2 mount instructions (across VPC peering connection)
On-premises mount instructions

Mount targets

VPC	Availability Zone	Subnet	IP address	Mount target ID	Network interface ID
vpc-5c60633b (default)	us-west-1a	subnet-08a85a6e (default)	172.31.20.118	fsmt-6493407d	eni-0855973b0806cc4dc
	us-west-1c	subnet-d3585688 (default)	172.31.5.159	fsmt-6593407c	eni-05ea1159844d7814f

Before Amazon EFS... DIY shared file storage

TCO example

Amazon EFS

Amazon EFS cost:

Standard storage class (100 GB * \$0.30/GB-month*):	\$30 per month
Infrequent Access storage class (400 GB * \$0.025/GB-month*):	\$10 per month
Infrequent Access data access (400 GB*1*\$0.01/GB*) =	\$4 per month
TOTAL:	\$44 per month

DIY – provisioning 600 GB of Amazon EBS (i.e., ~85% utilization)

Storage (2x 120 GB EBS gp2 volumes):	\$24 per month
Storage (2x 480 GB EBS sc1 volumes):	\$24 per month
Compute (2x m5.xlarge instances):	\$281 per month
Inter-AZ data transfer costs (est.):	\$130 per month
TOTAL	\$459 per month

*US N. Virginia pricing

**Amazon
EFS is
~90% less
than DIY**

EFS Infrequent Access Customer Success

"Switching to EFS IA was very easy and reduced operations costs significantly. We have some legacy applications, and EFS enabled us to quickly lift and shift them to the cloud without interruption of operations. With the roll out of EFS IA, we've saved as much as \$10k per month on our cloud NFS costs."

— Ian Cooke, Computational Scientist and CTO, [Dagan](#)

"Implementing EFS IA with Lifecycle Management was really easy. We enabled Lifecycle Management through a few clicks in the console, and EFS did the rest. Infrequently accessed files began migrating to lower priced storage transparently, per the selected policy, without any impact to our users or applications."

— Justin Falk, Director of IT, [OnePacs](#)

Almost 2/3 of Windows instances running on public cloud run on AWS

Worldwide Windows Public Cloud IaaS Instances by Cloud Provider, 2017

Note: Includes Windows instances deployed in the public cloud IaaS market during 2017 Source: IDC estimates, 2018

Amazon FSx for Windows File Server

Amazon FSx for Windows File Server

Fully managed Windows file server, built on Windows Server

**Native Windows
compatibility**

**Fast and flexible
performance**

**Enterprise
Ready**

**Broad
accessibility**

Fully managed

**Secure and
Compliant**

**Cost
Effective**

Native Windows compatibility and features

Native Windows compatibility

NTFS

Native SMB
2.0 to 3.1.1

Integrates with
Microsoft AD and
supports
Windows ACLs

DFS Namespaces
and
DFS Replication

Windows Server

Direct integration with on-premises AD environments

Easily Lift-and-Shift File Storage

Extend existing Windows environments without added complexity

Retain access control to existing users without any modifications

Automatically replicate data between on-premises file servers and Amazon FSx

Amazon FSx for Windows File Server pricing

Storage capacity:	\$0.130 per GB-month
Throughput capacity:	\$2.200 per MBps-month
Backup pricing:	\$0.050 per GB-month

Example TCO

1024 GB of storage
8 MBps of baseline tput

+ 500 GB of backup

1024 GB-months x \$0.130/GB-month = \$133/mo
8 MBps-months x \$2.200/MBps-month = \$18/mo

Total: \$151/mo (\$0.147/GB-mo)

+ 500 GB-months x \$0.050/GB-month = \$25/mo

Total: \$176 (\$0.172/GB-mo)

Amazon FSx for Windows File Server Customer Feedback

*With Amazon FSx we have a **managed solution** that eliminates the need for us to manage the tasks associated with operating file storage, including performing backups and applying software patches." - Greg Bell, Senior Systems Administrator*

"We were able move our Windows file-based application to AWS quickly and solved a critical performance issue. Based on our successful lift-and-shift experience, we're looking to move more of our legacy applications requiring Windows native compatibility, to Amazon FSx."

*We no longer need to worry about maintenance of the file system environment or patching of the underlying servers. This is allowing the team to **focus on more business-critical parts of our application structure.**" John Waller, Senior Engineer, DocXellent*

Amazon FSx for Lustre

Fully managed Lustre file system for compute-intensive workloads

Massively scalable
performance

Seamless access to
your data repositories

Fully managed

Native file
system interface

Cost-optimized for
compute-intensive workloads

Secure
and compliant

Moving file data into AWS

More Options for Data Transfer

AWS
Direct Connect

Amazon
Kinesis
Firehose

Amazon Kinesis
Data Streams

Amazon Kinesis
Video Streams

Amazon S3
Transfer
Acceleration

AWS
Storage
Gateway

AWS
Snowball

AWS
Snowball Edge

AWS
Snowmobile

AWS
DataSync

AWS
Transfer
for SFTP

AWS DataSync for EFS or S3

Online transfer service that simplifies, automates, and accelerates moving data

Fast

Parallelized transfer, 10Gbps per agent, scale-out with multiple agents

Automated

No scripts, does validation, filtering, throttling, scheduling

One-time migrations or on-going transfers

Flexible

Multiple protocols (NFS, SMB) & destinations (S3, EFS)

AWS Integrated

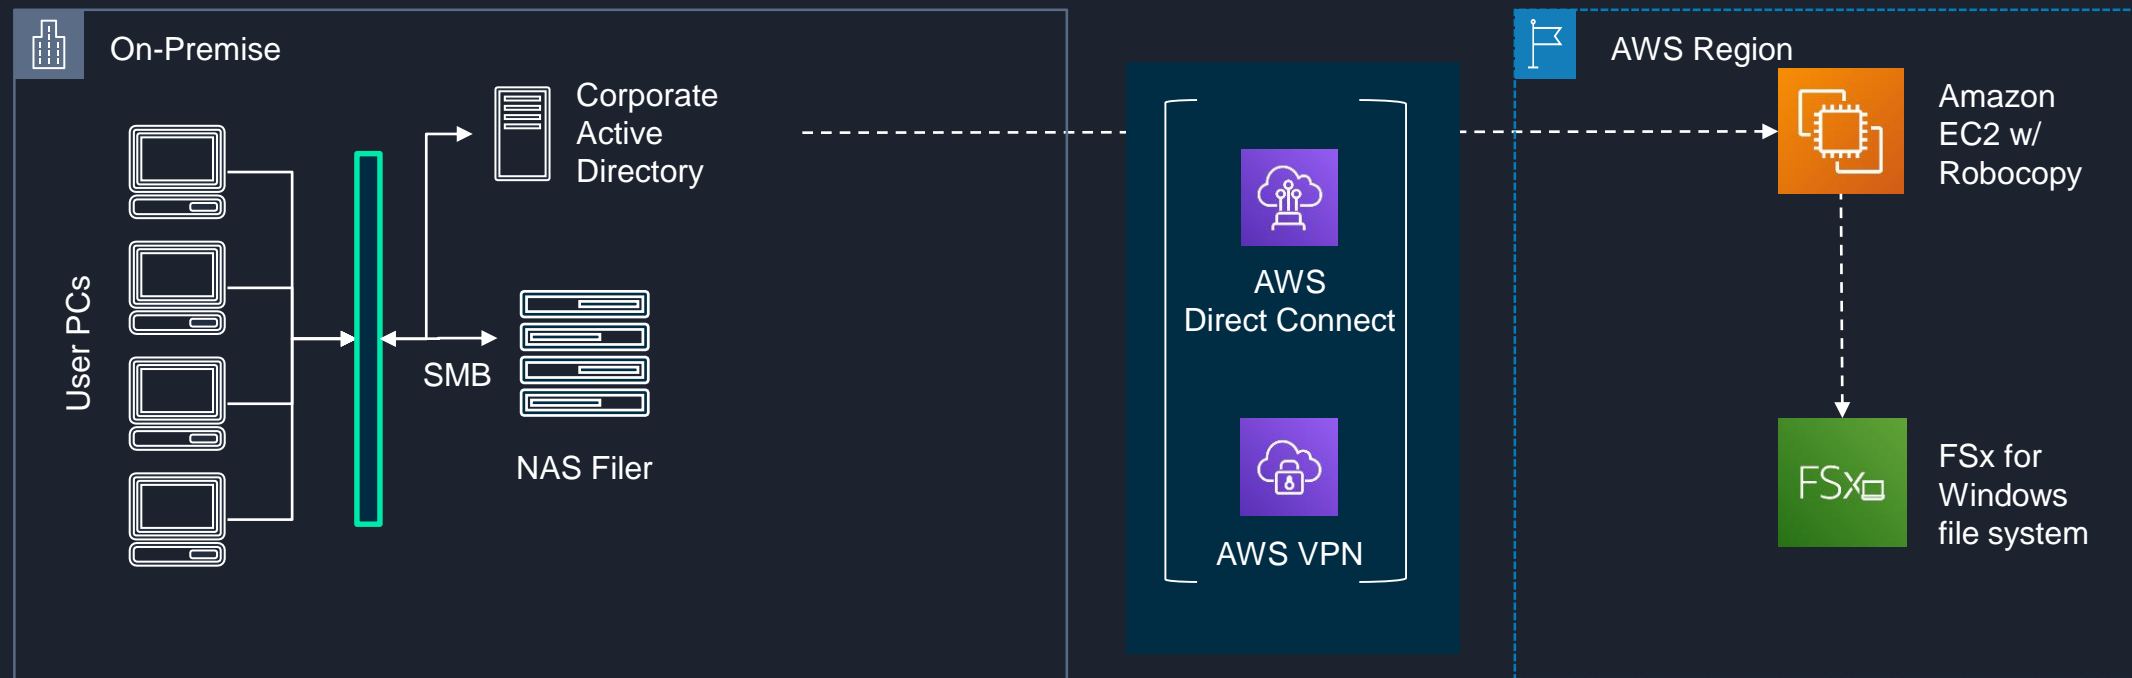

Secure and compliant

Migrate home directories to FSx for Windows

Amazon FSx

Option 1: Robocopy

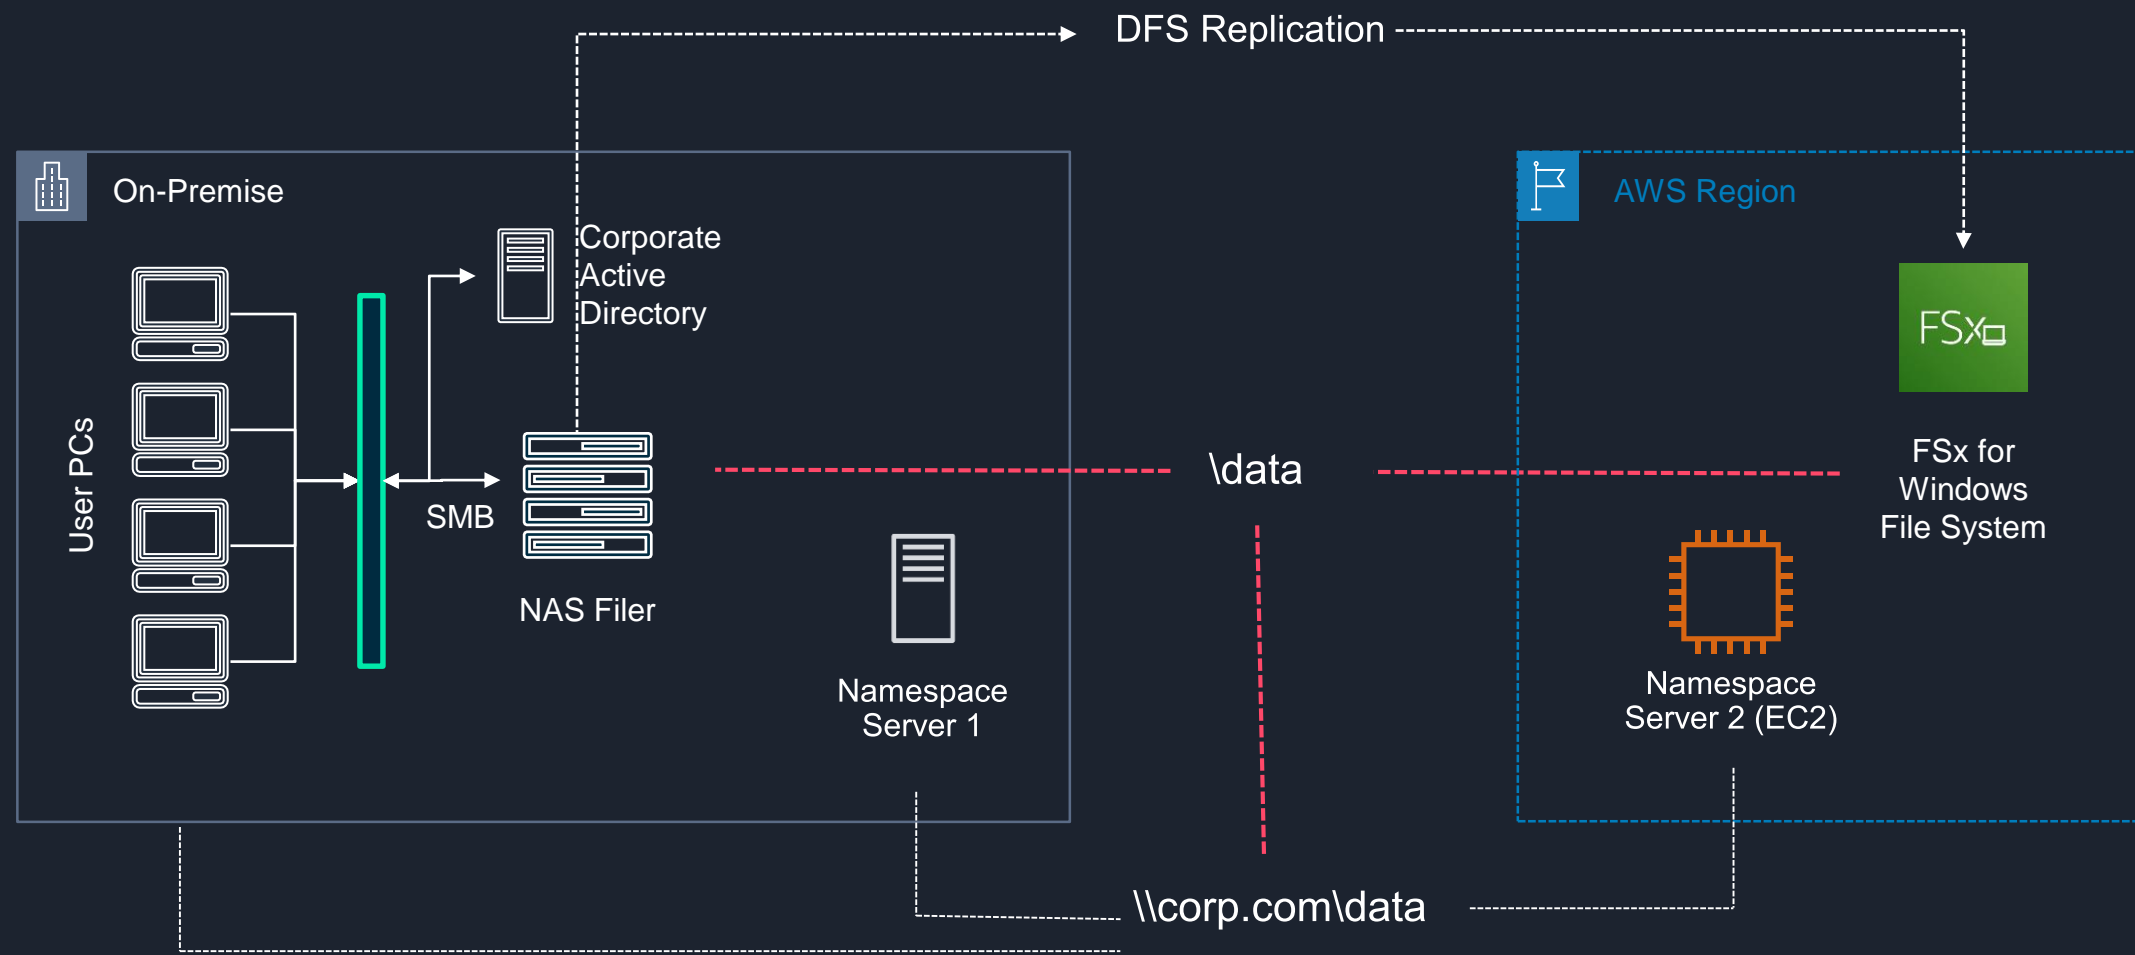

Migrate home directories to FSx for Windows

Amazon FSx

Option 2: DFS replication and DFS namespaces (New!)

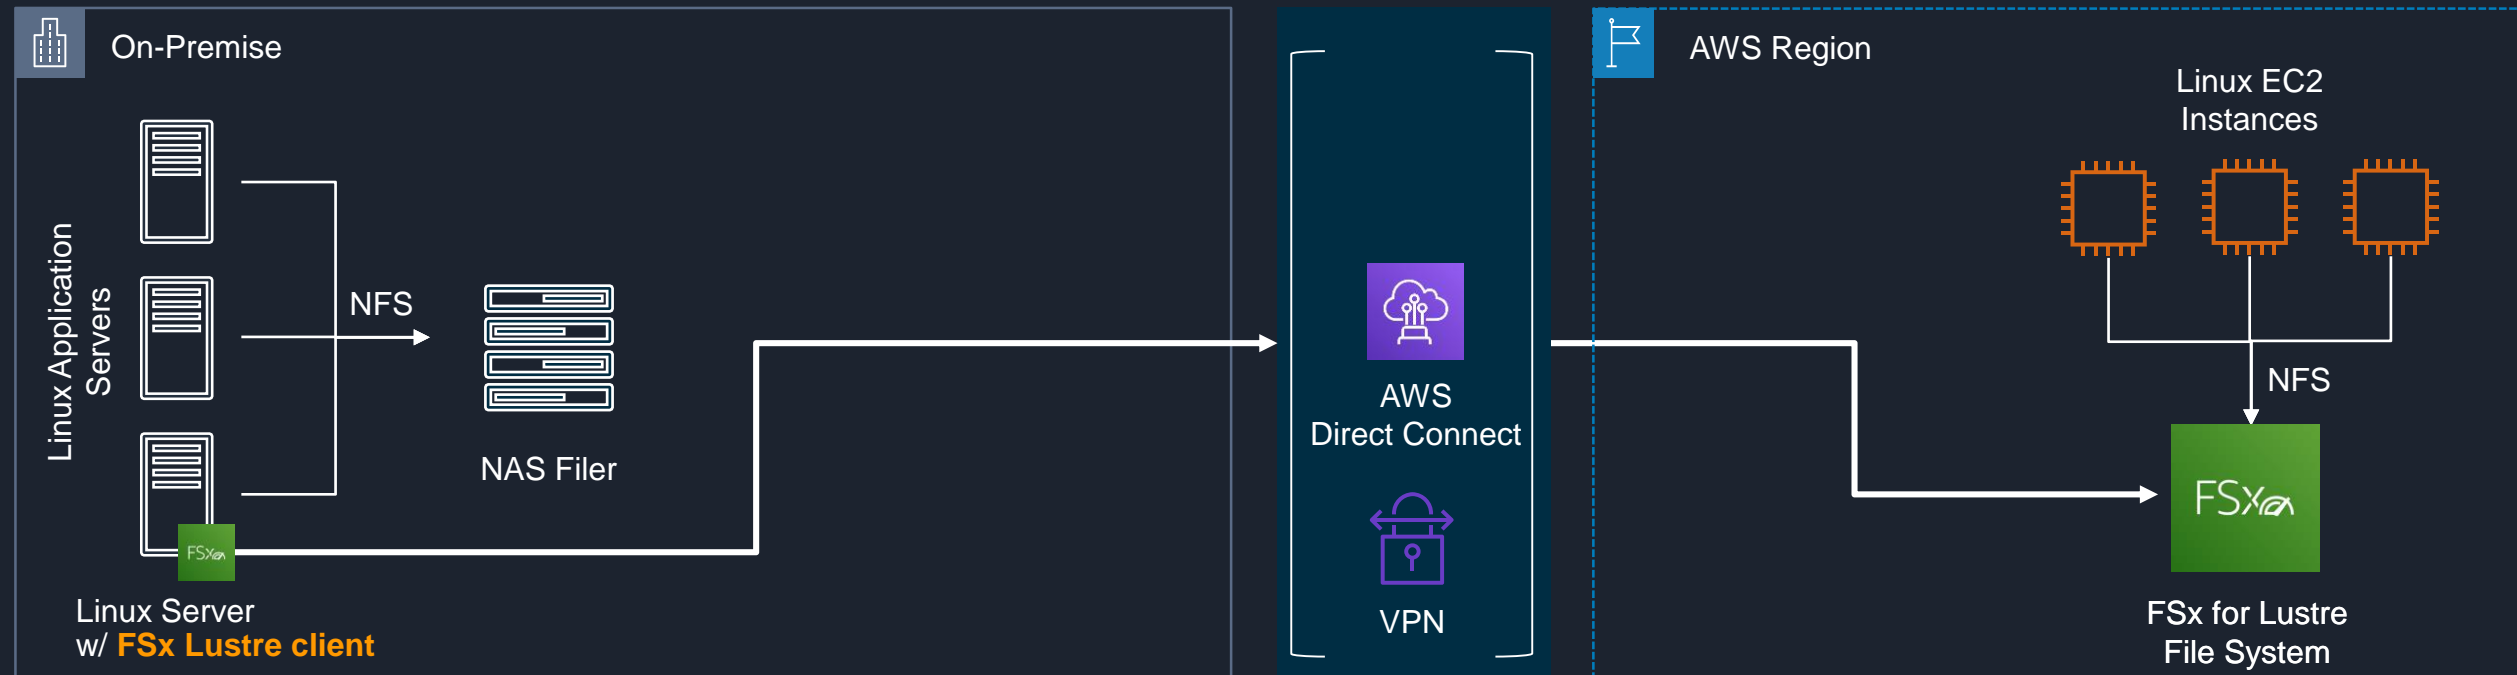

Migrate high-performance workloads to FSx for Lustre

Option 1: On-prem DX or VPN access

Amazon FSx

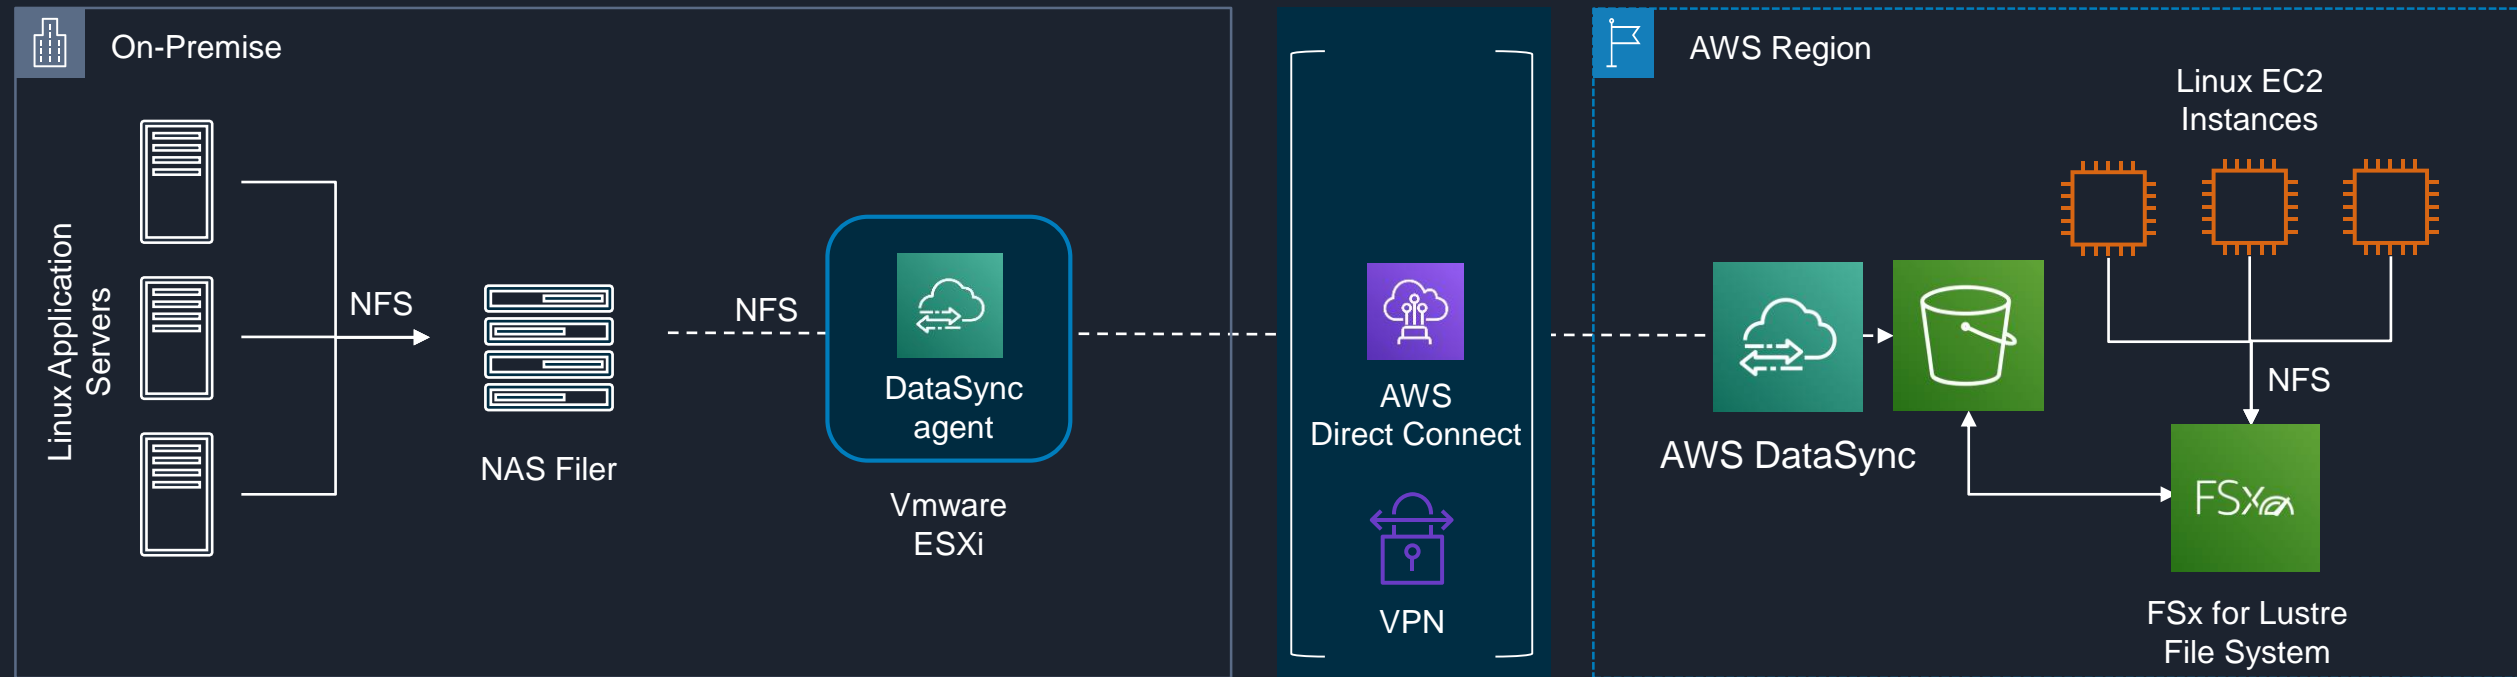

Migrate high-performance workloads to FSx for Lustre

Option 2: Use DataSync

Amazon FSx

Spend less money

Cost-
effective

Pay \$0.04 per-GB of data copied, with no minimum commitments or upfront fees

E.g., transferring 100 GB into EFS costs \$4

Service infrastructure is fully managed and scaled based on usage

Agents automatically updated and patched

Getting Started Resources

The screenshot shows the AWS Pricing Calculator website. At the top left is the 'aws pricing calculator' logo. To the right are 'Feedback' and 'English' dropdown menus. A blue banner below the header contains the text: 'AWS Pricing Calculator' followed by 'The AWS Pricing Calculator is currently building out support for additional services and will be replacing the [Simple Monthly Calculator](#).' The main content area features the heading 'AWS Pricing Calculator' and the sub-heading 'Estimate the cost for your architecture solution.' Below this is a paragraph: 'Configure a cost estimate that fits your unique business or personal needs with AWS products and services.' To the right of this text is a white box with the heading 'Create an estimate' and the text 'Start your estimate with no commitment, and explore AWS services and pricing for your architecture needs.' Below this text is an orange button labeled 'Create estimate'. At the bottom of the page, there is a white bar with the text 'How it works' on the left and a link 'What is the AWS Pricing Calculator?' with an external link icon on the right.
