*Primary Examiner* — Jack Reickel

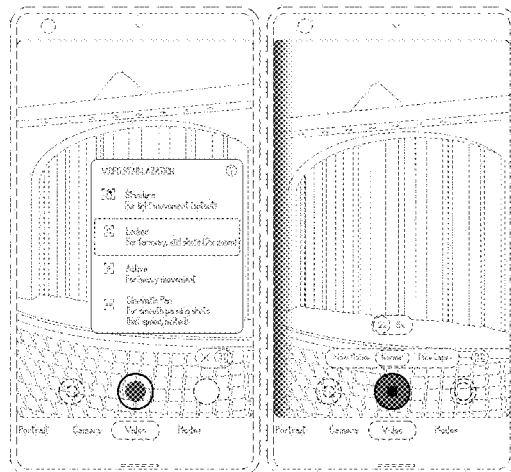

FIG. 18 is a third image in the sequence thereof; and FIG. 19 is a fourth image in the sequence thereof; and, FIG. 20 is a fifth image in the sequence thereof.

The appearance of the transition is sequential from FIG. 1 through FIG. 5 in the first embodiment, from FIG. 6 through FIG. 10 in the second embodiment, from FIG. 11 through FIG. 15 in the third embodiment, and from FIG. 16 through FIG. 20 in the fourth embodiment.

The process or period in which an image transitions to another image forms no part of the claimed design.

The shaded regions, and their respective density of shading, portray contrast of one area of the claimed design from another, and are part of the claimed design. The orientation of the shaded regions on the screen as well as mirror-images thereof are within the scope of the claimed design.

The longer-incremented broken-lines showing a portion of an electronic device and the intermediate-length broken-lines showing of a display screen boundary, as well as the still shorter broken-lines showing unclaimed features, are included for the purpose of illustrating environmental structure and form no part of the claimed design. The boundaries shown for the electronic device and the display screen provide a context of the claimed design as being on an article of manufacture, and are not intended to be limiting of a scale of the claimed design relative to the display screen.
