(54) Abstract Title: **System and method for reviewing received digital content**

(57) Disclosed is a system and method for reviewing received digital content (305 of Figure 3). A user history information (330) attached to the digital content file includes a user identifier. The user identifier may identify a true identity (360, 365) or identify an alias name of a user of the digital content using a public key decryption. The user may seek to initiate a relationship with another users to share digital content of common interest (340, 345).
