

GRIND & DENSIFY IN ONE EASY STEP

Get power-trowel and polish jobs done 40% faster. Ideal for traditional walk-behind grinders or power-trowel machines.

PROSOCO is introducing an exclusive and revolutionary new product that cuts significant time out of the grinding and polishing process and gets contractors onto their next jobs faster. Consolideck's **First Cut with Densifier** makes the grinding and polishing process more efficient while densifying the concrete at the same time.

To learn more about First Cut with Densifier please [click here](#).

MAXIMIZE EFFICIENCY

Lifts and suspends slurry solids away from diamond tooling, allowing for efficient removal of the concrete surface during grinding. While it suspends solids, it also hardens concrete.

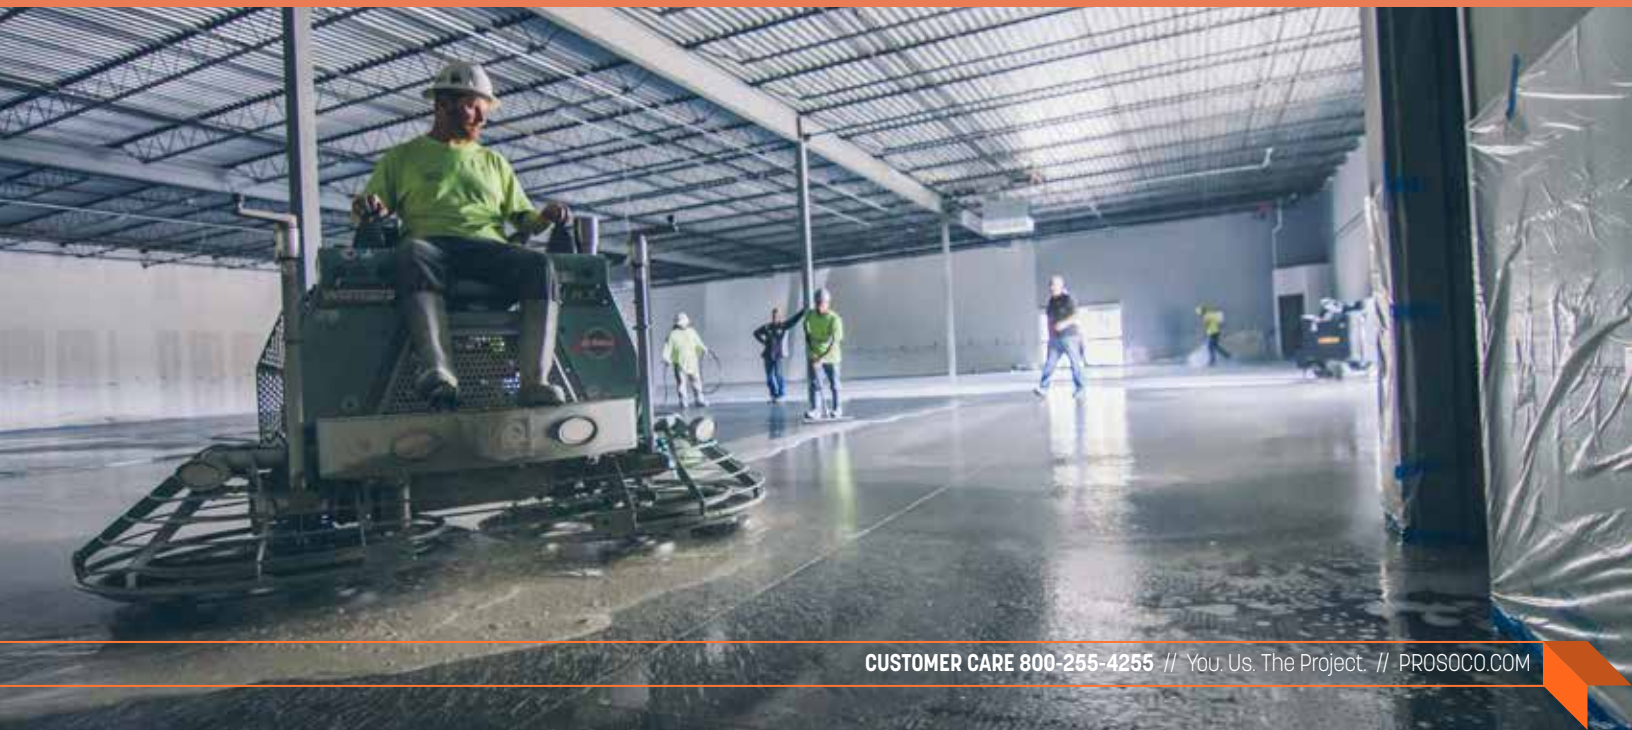

SAVE TIME

Saves you time and labor. No more standing around waiting for floors to dry, either before or after densification. Post-grinding cleanups are easier and faster.

SAVE MONEY

Gets jobs done faster, saves on costs. Suspends solids, shrinks the cost of diamond tooling. Saves labor dollars, eliminates a separate densification application.

**2 steps,
1 product.**

First Cut with Densifier eliminates the need to wait for a floor to be dry and clean before densifying, and it can be used with traditional walk-behind grinders or power-trowel machines.

“On a 15,000-square-foot floor, you can save 4 to 5 hours with this product.”

- Jason Benjamin, Kansas City concrete contractor

Always test to ensure desired results. Contact PROSOCO customer care for additional options.

**WE ARE
WHERE
YOU ARE.**

PROSOCO's nationwide network of field reps and technical advisers from coast to coast are here to help solve your biggest problems, your smallest problems and everything in between.
