

# 2-N-1 COLOR ENHANCEMENT & WATER REPELLENCY

Color Enhancer VOC is a solvent-based blend of high quality siloxanes modified to provide excellent water repellency and color enhancement to interlocking concrete, fired clay, porous tile, and many types of natural stone surfaces.

## INVISIBLE

Contains no film forming components like acrylics or pigments for enhancement

## LASTING

Penetrates and reacts with the surface to form a chemical bond, providing long-term durability while maintaining the substrate's natural breathability

## VERSATILE

For use on most masonry surfaces, both vertical and horizontal. Available in most states and districts with more restrictive AIM VOC regulations

# Beautiful, lasting protection

- Helps control efflorescence, and moisture and traffic-related staining
- Simplifies the cleaning process
- Treated surfaces “breathe” – does not trap moisture

# WE ARE WHERE YOU ARE.

**PROSOCO's nationwide network** of field reps and technical advisers from coast to coast are here to help solve your biggest problems, your smallest problems and everything in between.
