

# PROJECT SUMMARY

Bangladesh

## PROJECT NAME

Low-carbon and Resilient Waterway Transport

## GRANT OBJECTIVE AND ACTIVITIES

The project supports Bangladesh, an [NDC Partnership](#) member, in achieving priority NDC mitigation and adaptation objectives in the waterway transport sector. It is facilitating the development of Bangladesh's first GHG emission inventory in the Inland Water Transport Sector with scenario analyses functionalities. Other key activities include developing a low-carbon sector strategy and business plan, design and implementation of green waterway pilots and building capacity to mainstream climate resilience in waterway transport. The pilots engage the private sector and aim to demonstrate the technical and financial feasibility of scaling up systems and technologies to advance climate targets in the sector.

## COUNTRY FOCAL POINTS

Ministry of Environment & Forests and its Climate Change Cell, Ministry of Shipping, Inland Water Transport Authority

## WORLD BANK GROUP PRACTICE

-  Transport
