

PROJECT SUMMARY

Jamaica

PROJECT NAME

Energy and Climate Partnership of the Americas (ECPA) Support and Energy Resilience

GRANT OBJECTIVE AND ACTIVITIES

The grant supported the Government of Jamaica, a member of the [NDC Partnership](#), in hosting the Fourth Ministerial Meeting of Energy and Climate Partnership of the Americas (ECPA), which took place in Montego Bay on February 27-28, 2020. Support for the event included assessment of climate risks for Jamaica's power sector. In particular, the grant will support the planning and implementation for side events focusing on energy resilience, renewable energy, and energy efficiency. All topics of the ECPA side events were priorities identified in the NDC for Jamaica and most countries in the region. In addition, climate risk screening was conducted to identify relevant risks in the power sector, which will further inform adaptation measures to be included as part of the NDC update.

COUNTRY FOCAL POINTS

Ministry of Science, Energy and Technology (MSET), Ministry of Economic Growth and Job Creation (MEGJC), The Planning Institute of Jamaica (PIOJ)

WORLD BANK GROUP PRACTICE

Energy and Extractives
