

PROJECT SUMMARY

Dominican Republic

PROJECT NAME

Decarbonization pathways for the Dominican Republic: Enhancing the Institutional Framework of the Current NDC

GRANT OBJECTIVE AND ACTIVITIES

The project will assist the government of the Dominican Republic, a member of the [NDC Partnership](#), to enhance the institutional framework for sustained climate action and investment. The World Bank support the development of a climate governance architecture across multiple national and subnational government institutions, along with involvement of the private sector. The new coordination framework is expected to help promote and unlock both public and private sector investments and provide avenues for feedback on climate policies. This project is being supported through the NDCP Climate Action Enhancement Package (CAEP).

COUNTRY FOCAL POINTS

National Council for Climate Change and the Clean Development Mechanism (CNCCMDL), Ministry of Economy Planning and Development (MEPYD), Ministry of Environment and Natural Resources (MENR), Ministry of Energy and Mines (MEM)
