

# CYBERSECURITY AND BREACH RESPONSE

GODFREY & KAHN

*When major incidents arise or cybersecurity regulations change, Godfrey & Kahn can help you navigate complex issues and crises.*

In today's interconnected world, sophisticated cyber-attacks are the rule, not the exception. Effectively managing cybersecurity risk, planning for attacks and implementing strategies to prevent data breaches are critical to both risk mitigation and compliance with global cybersecurity and breach notification laws. What's more, creating cybersecurity acumen in your organization requires trusted advisors, training and buy-in from the board room down.

Our cybersecurity attorneys routinely assist businesses like yours with:

Data breach response

Vendor due diligence

Global information security programs

Internal and external threats, including computer crimes

Incident response plans

Regulatory enforcement, pre- and post-breach

Tabletop exercises

Cybersecurity governance

Cyber risk assessments

Our team is a trusted advisor to entities across all verticals. We're proud to be a Breach Coach® by NetDiligence®, a certification that recognizes law firms that have demonstrated excellence in data security and privacy. Breach Coach law firms must handle at least 50 breach incidents per year and serve as thought leaders for the entire cyber industry.

When a breach occurs, our cybersecurity attorneys assemble a team of advisors, including forensics, notification, public relations and cyber extortion negotiation professionals to help address the crisis and mitigate the risks to your business and reputation. We have experience assisting clients with hundreds of data breaches and other cyber incidents, including drafting and sending notices across the globe. Our data breach assistance is designed to be prompt, risk-based and practical.

## Attorney Certifications:

Certified in Cybersecurity  
An (ISO) Certification

If you are the victim of a cyber incident, contact us at [incidentresponse@gklaw.com](mailto:incidentresponse@gklaw.com) or 1-833-DATA-LOSS
