performed alone or together for transformative skin-changing results

## VERSATILE SOLUTIONS PERFECT FOR EVERY PRACTICE

Whether you're a new or well-established medical practice or med spa, Sciton's mJOULE™ is the perfect solution to expand your business. Deliver unmatched before and afters for every patient with the platform's consumer-recognized brands and combination treatments.

### TARGETED POWERHOUSE MODALITIES

#### BBL® HERO™

Sciton's proprietary technology reduces the appearance of aging skin in a fraction of the time.

#### MOXI™

This gentle resurfacing laser produces evenly toned, and radiant skin.

#### CLEARSilk®

Improve skin luminosity, diffuse redness, and revitalize the skin's overall appearance with this lunchtime facial.

#### CLEARV®

The gold standard treatment for vascular skin concerns effectively treats veins, vessels, rosacea, and more.

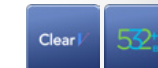

### 1+1=3 RESULTS – CONFIGURE YOUR POWERHOUSE SYSTEM FOR EXPONENTIAL RESULTS

#### Prejuvenation Solution

Combined with a series of BBL HERO treatments, MOXI produces even more visible anti-aging results.

#### Complete Vascular Solution

This ideal vascular system combines the new 532+ BBL narrow-band filter with the re-engineered ClearV to treat specific vascular conditions.

#### Healthy Skin Solution

ClearSilk and BBL HERO maintain healthy and even toned skin anywhere on the body by effectively treating skin conditions such as uneven texture, dull complexion, and rosacea.

#### Complete Skin Solution

This combination of BBL with ClearV and ClearSilk allows you to treat all your patient's vascular and skin needs from one versatile platform.

Create your dynamic powerhouse system with mJOULE today!

# FOREVER CHANGE HOW YOU TREAT SKIN FROM HEAD TO TOE

BBL® HERO™ allows practitioners to successfully treat large areas like the back, legs, and arms in as little as three minutes, thanks to the High Energy Rapid Output (HERO). HERO delivers even better results, allowing for faster treatment and improved patient comfort.

### What else makes this device so popular?

With the broadest range of wavelengths on the market, HERO treats pigmented and vascular lesions, acne, and improves the appearance of aged and damaged skin. That's why it continues to be one of the most in-demand treatments today.

Skin Types

### INDICATIONS

|                   |                  |                        |
|-------------------|------------------|------------------------|
| PIGMENTED LESIONS | TONE & TEXTURE   | AGE & SUN SPOTS & NEVI |
| ROSACEA           | TELANGIECTASIA   | MELASMA                |
| POIKILODERMA      | PORT WINE STAINS | CHERRY ANGIOMAS        |
| ACNE              | HAIR REMOVAL     | RED SCARS              |

### Dual-Lamp Technology

Dual-lamp technology extends the life of your handpiece and improves performance.

### CoolComfort™

Set and maintain cooling in 1 degree increments for fast, comfortable, and uniform treatments.

Quick change finesse adapters for treating small areas.

### Versatile Treatments with Quick Change Filters

## A GENTLE APPROACH TO RADIANT SKIN

Patients around the globe love MOXI™—the gentle yet powerful 1927nm fractionated laser designed with everyone in mind. It's ideal for those looking for a preventative treatment to help delay the appearance of aging, or those who want to maintain beautiful skin with little to no downtime or discomfort.

In a quick 12-15 minute procedure, MOXI comfortably delivers non-ablative laser energy to correct the initial signs of sun damage and aging—no matter the season or skin type—for a glowing and clear complexion.

### INDICATIONS

### Optical Navigation

The high-speed optical navigation system tracks the motion of the handpiece hundreds of times per second for extreme precision.

### Adjustable Beam Placement (ABP)

Users can change the beam scan width, selecting between 15, 7, or 4 mm widths to effectively treat small areas and target lines and scars with incredible precision.

### MOXI Software

The intuitive software allows users to select their treatment preferences from three modes of operation: Manual, Quick Start, and Measure mode.

- Manual: Select your own settings.
- Quick Start: Choose from three preset treatment levels.
- Measure Mode: Use guided treatment area measurement for even energy delivery.

### Visual Speed Indicator

The speed indicator lights provide visual feedback to help providers deliver treatments at the optimal speed.

Your patients are looking for a quick skin treatment with no downtime, but with real results.

ClearSilk® is a uniform, non-ablative “lunchtime facial” ideal for first-time laser patients and those who want to maintain a youthful appearance without the recovery time of an ablative resurfacing treatment.

ClearSilk treats redness and rosacea, fine lines and wrinkles, acne scars, and more by depositing heat deep beneath the skin’s surface—stimulating fibroblast activity and the body’s natural repair process for a healthier, more vibrant complexion. The appearance of skin continues to improve with each treatment.

All Seasons

Skin Types

### INDICATIONS

ACNE & ACNE SCARS

PIGMENTED LESIONS

REDNESS & ROSACEA

ONYCHOMYCOSIS

FINE LINES & WRINKLES

### Increased Spot Size

Speed up treatment times and uniformly heat the skin with spot sizes between 7 and 10 mm.

### Built-in Temperature Sensing

Get real-time visual feedback from an internal temperature gauge that accurately measures skin temperature.

### Indication Driven Software

The handpiece has special recognition sensors that allow you to directly access the correct application software and safe start treatment settings when taken out of the cradle.

### Audible Feedback

Stay alert to how many pulses are delivered in each treatment zone.

### Visual Distance Guide

Maintain an appropriate treatment distance from the skin for even heating.

# ELEVATE VASCULAR TREATMENTS IN YOUR PRACTICE

At Sciton, we've put a lot of work into developing the ClearV® technology to treat vascular skin concerns thoroughly, effectively, and comfortably on any complexion, all year round.

The ClearV treatment eliminates target vessels without damaging the skin. It does so by applying targeted heat to clear away broken capillaries, spider veins, vascular lesions, skin discoloration, and more.

## INDICATIONS

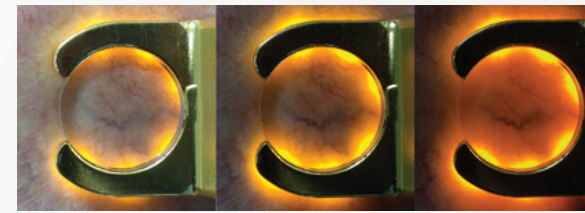

### VascuZoom

Instantly change the spot size between 2-10 mm with the adjustable ring directly on the touch display.

### Subsurface Vein Illumination (SVI™)

Enhance visibility and treat hidden subsurface and feeder veins with the push of a button.

### Adjustable Integrated Cooling

Ensure patients' comfort and safety with the integrated sapphire cooling tip that optimizes cooling between 5-25 °C before, during, and after treatment. Boost cooling for body areas with a high density of vessels for even more comfort and efficacy.

5-25 °C

Before During After

### Indication Driven Software

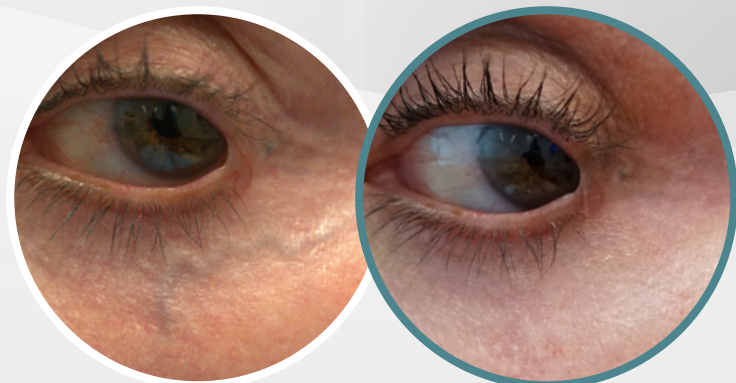

Determine safe start settings and treatment range based on a few key selections. The handpiece has special recognition sensors that allow you to directly access the correct application software when taken out of the cradle.

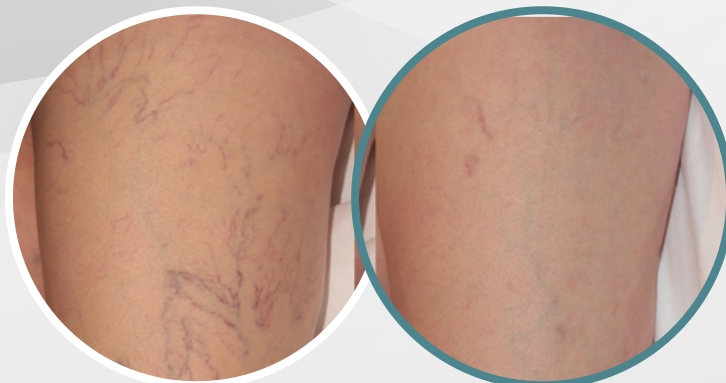

EXCLUSIVE 532+ BBL

### 532+ BBL Filter - Only with ClearV

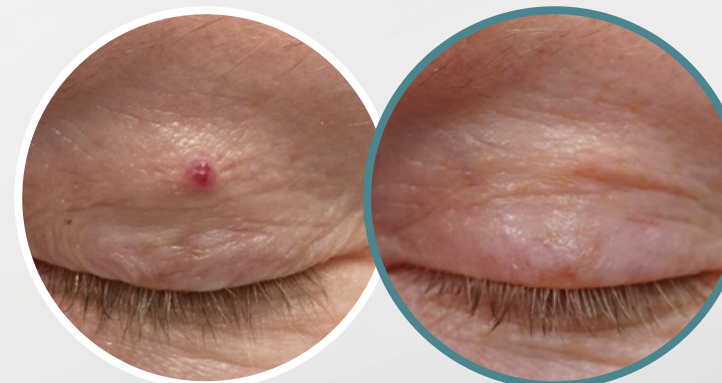

This unique narrow-band filter is the perfect complement to ClearV and in combination with the conical 3 mm adaptor, it precisely targets small vascular indications, i.e. telangiectasia, poikiloderma, cherry angiomas and vascular melasma.
