

# Modernize healthcare delivery with ChromeOS

Get fast access to patient information and provide modern care in the moment with secure experiences for clinicians, patients, and healthcare organizations.

## ChromeOS delivers modern clinician experiences

No matter your end user or use case, ChromeOS offers unmatched security, ease of use, and manageability.

- **Mobile healthcare**  
Free your practitioners from fixed workstations with mobile access to the information they need, even when their device is offline, as apps persist even when not connected to Wi-Fi.
- **Virtual care and telehealth**  
Support and connect with your patients remotely, monitor health digitally, and set up virtual visits.

- **Shared workstations**  
Provide read access to electronic healthcare systems (EHRs) via Citrix and VMware VDI. Simplify sign on and sign off to shared devices with identity management solutions like Imprivata.
- **Digital training and communication**  
Empower caregivers to access training and resources with shared and temporary ChromeOS devices.

## Unlock the power of [ChromeOS device management](#) with in three easy steps

## Support for every use case

### Shared clinical workstation

- Fast user switching with Imprivata
- Access to EHR
- Peripheral compatibility (barcode and dictation)
