

C0. Introduction

C0.1

(C0.1) Give a general description and introduction to your organization.

eBay Inc. (NASDAQ: EBAY) is a global commerce leader through our Marketplace platforms which connect millions of buyers and sellers in more than 190 markets around the world, empowering people and creating opportunity for all. The platforms include our online marketplace located at www.ebay.com and its localized counterparts, including off-platform businesses, as well as eBay's suite of mobile apps.

Founded in 1995 in San Jose, California, eBay is one of the world's largest and most vibrant marketplaces for discovering great value and unique selection. Our technologies and services are designed to provide buyers choice and a breadth of relevant inventory from around the globe and to enable sellers worldwide to organize and offer their inventory for sale, virtually anytime and anywhere. In 2022, eBay enabled \$74 billion of gross merchandise volume.

eBay's purpose is to empower people and create economic opportunity for all through our technology for our global community of users. Every day, people build businesses on our platforms. With a low cost of entry for sellers, we offer a highly accessible way for all types of users to interact in a global marketplace that's inclusive and connects people of all backgrounds.

Accordingly, we prioritize our corporate responsibility efforts to impact the areas of economic empowerment and sustainable commerce. We are also committed to reducing the environmental impact of our platform by increasing efficiency, expanding our use of cleaner energy, and using our global marketplace to extend the life of goods in a circular economy. For example, eBay continues its work to reach its goal of 100% renewable energy by 2025 and is a member of the U.S. EPA's Green Power Program. In our efforts to use 100% renewable energy by 2025, we consistently search for local, renewable energy solutions to power our offices and data centers. eBay has also invested in projects such as VPPAs in Texas and Louisiana when local solutions are not available, and we use 100% renewable energy at our San Jose headquarters along with eight other offices. In 2022, we completed an assessment of renewable energy options at international offices and will prioritize local green programs as feasible.

In 2022, we started a multi-year retrofit of our data centers to reduce electrical redundancy and replace the existing Uninterruptible Power Supply system with high-efficiency models. To date, each of our primary data centers has earned the ENERGY STAR® for Data Centers Label. Throughout 2022, we also continued to implement energy-efficient practices at our eBay offices and data centers, resulting in a decrease in our total Scope 1 and 2 emissions (or those coming directly from a company's operations). For the remaining Scope 1 and 2 emissions, we have purchased carbon offsets to achieve carbon neutrality as a company.

C0.2

(C0.2) State the start and end date of the year for which you are reporting data and indicate whether you will be providing emissions data for past reporting years.

(C0.5) Select the option that describes the reporting boundary for which climate-related impacts on your business are being reported. Note that this option should align with your chosen approach for consolidating your GHG inventory.

Operational control

C0.8

(C0.8) Does your organization have an ISIN code or another unique identifier (e.g., Ticker, CUSIP, etc.)?

Indicate whether you are able to provide a unique identifier for your organization	Provide your unique identifier
Yes, a Ticker symbol	EBAY

C1. Governance

C1.1

(C1.1) Is there board-level oversight of climate-related issues within your organization?

Yes

C1.1a

(C1.1a) Identify the position(s) (do not include any names) of the individual(s) on the board with responsibility for climate-related issues.

Position of individual or committee	Responsibilities for climate-related issues
Board-level committee	<p>The Board of Directors' Corporate Governance and Nominating Committee (CGN) has the ultimate responsibility for sustainability and Environmental, Social and Governance (ESG) issues, including overseeing the company's policies and programs concerning sustainability reporting. We have chosen to engage around climate and other ESG issues at the board level, because our Board members have expressed interest in monitoring the company's corporate social responsibility (CSR) work. Engagement at the Board level also ensures that climate and related ESG issues are prioritized by eBay's leadership team. The CGN reviews climate-related progress including emissions reduction as part of the annual Impact Report and review of renewable energy progress. ESG and sustainability updates are also provided to the CGN or full Board at least quarterly.</p> <p>The CGN as a whole is responsible for providing feedback and guidance on our climate targets, progress, and focus. For example, eBay's proposal to participate in the Science-based Targets initiative (SBTi) was reviewed and supported by the CGN. As such, eBay aligned its emissions target with SBTi criteria. Additionally, the full Board has ultimate responsibility for risk oversight. The Board also reviews the outcomes of stockholder ESG engagement with management and considers proactive changes based on feedback.</p> <p>In 2021, the CGN also supported the formation of eBay's ESG Council. This Council is chaired by eBay's Chief Sustainability Officer (CSO) and is composed of and engages with critical partners across our company. The ESG Council is sponsored by eBay's CEO and reports up to eBay's executive leadership team.</p>

C1.1b

(C1.1b) Provide further details on the board's oversight of climate-related issues.

Frequency with which climate-related issues are a scheduled agenda item	Governance mechanisms into which climate-related issues are integrated	Scope of board-level oversight	Please explain
Scheduled – some meetings	<p>Reviewing and guiding strategy</p> <p>Monitoring progress towards corporate targets</p> <p>Reviewing and guiding the risk management process</p>	<Not Applicable>	<p>The Board of Directors' Corporate Governance and Nominating Committee ("CGN") has the ultimate responsibility for sustainability and ESG issues, which is inclusive of climate-related issues. ESG, sustainability and climate-related updates are provided to the CGN at least quarterly. The CGN reviews climate-related actions including emissions reduction and renewable energy progress and is responsible for providing feedback and guidance on our climate targets, progress, and focus. CGN's ESG responsibility is part of the Committee's charter.</p> <p>eBay's Risk Committee oversees the company's management of key risks, as well as the guidelines, policies, and processes for monitoring and mitigating such risks.</p> <p>eBay's full Board has ultimate responsibility for risk oversight. This includes oversight of eBay's economic, financial, legal and regulatory, operational, and other risks, such as the impact of competition and sustainability risks, including social, environmental, and reputational factors that are integral to the strength of our brands.</p> <p>eBay's Chief Sustainability Officer also directly engages with the executive leadership team directly and through the company's ESG Council. The ESG Council is made of cross-functional senior and global senior leaders and is sponsored by eBay's CEO, who is also a Board member.</p>

C1.1d

(C1.1d) Does your organization have at least one board member with competence on climate-related issues?

	Board member(s) have competence on climate-related issues	Criteria used to assess competence of board member(s) on climate-related issues	Primary reason for no board-level competence on climate-related issues	Explain why your organization does not have at least one board member with competence on climate-related issues and any plans to address board-level competence in the future

Please explain

Guided by the eBay Impact Team, with oversight from eBay's Board of Directors and Executive Leadership Team, our approach to ESG matters is integrated into the core of our business. eBay's Chief Sustainability Officer (CSO) leads eBay's Impact Team, which works across the company to help our business groups and functions prioritize ESG as part of the company's overall strategy, including goal setting, impact measurement, and reporting.

Our CSO chairs eBay's ESG Council which is composed of and engages with critical partners across functions in our Company. The ESG Council is sponsored by eBay's Chief Executive Officer (CEO) and reports up to eBay's Executive Leadership Team.

Our CSO's responsibilities include: (1) managing the company's budget for climate mitigation activities; (2) developing and implementing a climate transition plan; (3) conducting a climate-related scenario analysis; (4) setting and monitoring the company's carbon footprint and determining the activities that have the most significant contribution to the footprint; (5) developing strategies to reduce the company's carbon footprint, including creating a comprehensive renewable energy strategy for eBay's facilities in regions where our operational footprint is most significant, specifically at eBay's major data center locations; (6) assessing climate change-related risks for the company, such as potential impacts to buildings, data center locations; and (7) achieving progress towards eBay's climate change-related corporate goals, such as eBay's commitment to achieve 100% renewable energy in our electricity supply at eBay-controlled data centers and offices by 2025 and decreasing absolute Scope 1 and 2 greenhouse gas (GHG) emissions by 90% and absolute Scope 3 downstream transportation and distribution emissions by 20% between 2019 and 2030.

Further details of incentive(s)

As part of their annual review process and individual goals, eBay's Facilities and Energy managers are incentivized to identify and complete emissions and energy reduction projects that also result in operational cost savings for the company.

Explain how this incentive contributes to the implementation of your organization's climate commitments and/or climate transition plan

These incentives directly contribute to achieving 100% renewable energy in our electricity supply at eBay data centers and offices by 2025 and decreasing absolute Scope 1 and 2 GHG emissions by 90% and absolute Scope 3 downstream transportation and distribution emissions by 20% between 2019 and 2030.

C2. Risks and opportunities

C2.1

(C2.1) Does your organization have a process for identifying, assessing, and responding to climate-related risks and opportunities?

Yes

C2.1a

(C2.1a) How does your organization define short-, medium- and long-term time horizons?

	From (years)	To (years)	Comment
Short-term	1	2	We typically consider the 1–2-year time horizon when establishing short-term objectives and monitoring near-term climate-related risks and opportunities.
Medium-term	3	5	We typically consider the 3–5-year time horizon when establishing medium-term objectives and monitoring associated climate-related risks and opportunities from a medium-term time horizon.
Long-term	6	15	We typically consider the 6–15-year time horizon when establishing long-term objectives and monitoring associated climate-related risks and opportunities from a long-term time horizon.

C2.1b

(C2.1b) How does your organization define substantive financial or strategic impact on your business?

DEFINITION OF SUBSTANTIVE FINANCIAL OR STRATEGIC IMPACT: eBay defines a substantive financial impact to our business as lower revenue growth, decreased revenue, increased expenses or reduction to operating income or earnings, corresponding to progressively higher risk.

DESCRIPTION OF THE QUANTIFIABLE INDICATOR(S) USED TO DEFINE SUBSTANTIVE FINANCIAL OR STRATEGIC IMPACT: The financial guidance issued by eBay was 1% to 3% revenue growth, but with increased margins and cashflow. Any impacts that would cause eBay's growth to be at or below the low end of guidance (i.e., approximately less than \$100 million of growth), would be considered significant to a shareholder, potential shareholder or customer.

Please note, the terms "material," "materiality/ESG materiality," and "substantive do not correspond to the concept of materiality as defined in the context of the U.S. Securities and Exchange Commission (SEC) laws. These terms do not represent any determination by the company that any of the information or data provided in this disclosure is "material" for purposes of U.S. securities law disclosure requirements.

Downstream

Risk management process

Integrated into multi-disciplinary company-wide risk management process

Frequency of assessment

More than once a year

Time horizon(s) covered

Short-term
Medium-term
Long-term

Description of process

eBay's climate risk identification & assessment process is integrated into our company's multidisciplinary company-wide risk-management process. This process covers short-, medium- and long-term time horizons, is used to determine which climate-related risks and opportunities could have a substantive financial or strategic impact and applies to all value chain stages. We also conduct periodic materiality assessments, which have continued to identify our GHG emissions and energy footprint as a top stakeholder concern. eBay's Chief Sustainability Officer (CSO) and other subject-matter experts from our Impact team actively engage with our company's key global functions, including Finance, Government Relations, Investor Relations, and Facilities teams, to evaluate climate risks and opportunities, interpret them into our business framework, and develop actionable recommendations.

We evaluate climate-change risks and opportunities at the global level using a cross-functional governance model. This evaluation occurs annually, at a minimum, but at a higher frequency—at least every six months—in locations where our operational footprint is most significant, specifically our major data center and colocation data centers in Utah and Nevada. eBay's Government Relations team helps assess transitional risks due to current/emerging regulation, and the potential costs to the company of complying with such regulations. The team also employs consultants who review all pending regulations on the international, federal, and state/local levels regularly and flag any pertinent climate-related regulations. eBay's Facilities and Information Technology teams assess physical risks that may impact our direct operations, including extreme weather events to eBay's facilities and data centers, and the costs of operational interruptions and facility repairs. eBay's Finance team assesses market risks, including the decreased demands for products due to weather events, and the potential cost of such decreases in demand. eBay's Investor Relations team uses expert consultants to assess investor-related risks such as ESG screening and questions by investors. We consider distinctions within eBay's business model in comparison to traditional retailers. Most notably, eBay does not maintain our own inventory for goods sold on our platform. This distinction impacts how our company may approach operational risks. The Investor Relations team also consults external subject matter experts to identify opportunities as well as social, policy, and/or environmental issues that could materially impact our business. As risks and opportunities are identified, the appropriate teams evaluate and implement response measures. Short-term risks are prioritized, but long-term risks (6 years or longer) are also considered as part of this process. eBay's Impact team consults external subject matter experts including the Clean Energy Buyers Alliance (CEBA), World Wildlife Fund (WWF), and 3rd party consultants to identify risks and opportunities as well as ESG issues that could materially impact our business. As risks are identified by our operations teams (e.g., Data Center, Compliance, Facilities and Delivery), the appropriate teams evaluate and implement response measures. The Impact team engages with the operations teams at least quarterly to assess potential risks and opportunities as they arise. To assess climate-related risks at eBay's physical locations, the Impact team also assesses our company's owned and leased property-specific climate, water and biodiversity risks. eBay has also included a climate risk management process as part of our Annual 10-K risk disclosure. eBay actively implements processes to manage transition risks and takes measures to increase the resiliency of our company's locations and mitigate physical risks.

CASE STUDY/EXAMPLE OF HOW PROCESS IS APPLIED: Physical Risks and/or Opportunities Situation: eBay's physical risks related to climate change are considered to be long-term risks. To manage these physical risks, eBay has implemented procedures and other measures to increase the resiliency of our facilities, and to our business as a whole. In particular, increased extreme weather events have impacted eBay's sellers across the world to deliver shipments on time, which in turn has also impacted our business. For example, in 2022, due to severe weather conditions from Hurricane Ian, parts of the U.S. southeast region experienced shipping delays. Task: In order to ensure items sold on eBay are delivered on time and not delayed due to extreme weather events, eBay needed to establish processes, procedures, and policies to support our sellers. Action: eBay's Shipping and Delivery team established a task force to plan responses to the increased frequency of extreme weather events and eBay's Emergency Communications Playbook was created to protect sellers from late shipments as a result of extreme weather events. For example, during the hurricane, eBay automatically protected seller performance from late shipping rates, defects from canceled transactions and other seller performance criteria. Additionally, eBay continues to enhance seller tools to support shipping needs, including collaborations with shipping carriers. Result: By protecting our sellers through our procedures and collaborations, we have saved our sellers time and money, which has a direct correlation to increasing our company's gross merchandise volume.

Transitional Risks and/or Opportunities Situation: The increased cost of energy, water and related raw materials can directly impact operating costs at eBay's physical locations. Operationally, energy is an essential input to eBay business. Task: To meet the needs of our business and stakeholders, the Impact team partnered with Finance and Operations to assess the feasibility of entering into a virtual power purchase agreement (VPPA) while simultaneously working with the Global Communications team to assess reputation and other risks and opportunities presented by taking this step in making progress toward the goal. Action: To continue executing on our 100% renewable electricity goal, eBay continues to invest in renewable energy projects, prioritizing virtual purchase power agreements (VPPAs), which ensure that more green electricity is fed into our electricity grids. We've entered into VPPAs for a solar project in Louisiana and a wind project in Texas while we continue to look for additional opportunities globally. Result: While it is likely that short term energy costs could rise as we implement renewable contracts, these are expected to be very modest and far surpassed by the reputation uplift (and risk avoidance) of committing to a low-carbon energy supply within the next 5 years (by 2025).

C2.2a

(C2.2a) Which risk types are considered in your organization's climate-related risk assessments?

	Relevance & Inclusion	Please explain
Current regulation	Relevant, always included	<p>eBay's Impact team consults with our Government Relations team to identify any current or future regulation risks, related to issues including carbon pricing, clean energy, the circular economy, and transportation.</p> <p>Currently, the Government Relations team is not aware of any substantive risk from current regulations, however, we do consider the impact from potential future regulations to be relevant enough to continuously monitor. For example, due to our online presence in France, we have been monitoring the Anti-Waste Law (Law No. 2020-105 Regarding a Circular Economy and the Fight Against Waste) that was adopted in early 2020. In 2022, this law expanded making it illegal to destroy unsold electronics, textiles, books, and other products. This regulation is not anticipated to present direct risks in terms of reduced revenues or increased expenditures at eBay. In fact, this law may present revenue opportunities for eBay, because we play a role in the circular economy and support the reselling of unsold or returned items. Through this law, we will continue supporting our sellers, including communicating the environmental benefits of buying and selling pre-owned goods on our platform.</p> <p>Another example of a current law is Right to Repair in the United States, which includes entirely new provisions and amends the Sale of Goods Directive to mandate repair over replacement when cheaper or equal in cost, of remedy for consumers under legal guarantee, among other provisions. For example, New York recently passed their version of the law in late 2022.</p> <p>We continue to monitor regulatory frameworks globally to assess if eBay is impacted by proposed or future regulations</p>
Emerging regulation	Relevant, always included	<p>The potential for fuel and energy taxes and regulations exposes eBay to risk both in terms of increased costs and decreased revenue. Operationally, energy is an essential input to eBay's business. Our platform relies on a data center portfolio that is responsible for 86% of our total energy use in 2022. Our customer support organization operates facilities 24 hours a day, 7 days per week, and our global staff count on being able to travel between offices and across geographies (during non-pandemic times). Consequently, energy taxes and regulations could raise energy prices, leading to increased costs to the company.</p> <p>With support from Government Relations, we also advocate for clean energy policy, including clean and low carbon transportation at the federal level as well as in states where we have a significant operational footprint, including California and Utah. We also continue to implement energy-saving strategies in the operations of all of our facilities, to mitigate this risk.</p>
Technology	Relevant, always included	<p>As an e-commerce company, eBay is a recipient and user of energy products and services. eBay regularly assesses the efficiency of our data center infrastructure as well as the seamless operation of our online consumer platform through our Core Technology team. We started a multi-year retrofit of our data centers to reduce electrical redundancy and replace the existing Uninterruptible Power Supply system with high-efficiency models. To date, each of our primary data centers has earned the ENERGY STAR® for Data Centers Label.</p> <p>eBay faces risks of not capitalizing on technological improvements / innovations that support the transition to a low-carbon, energy efficient economy that could result in higher costs of operation or downtime of our online platform. Additionally, if eBay does not power its Utah data centers with renewable energy, while other e-commerce companies transition their data centers electricity to renewables, eBay faces reputational risks compared to its competitors.</p>
Legal	Relevant, always included	<p>This is a lower-likelihood risk for eBay. The company monitors all litigation as part of our Global Compliance and Legal Counsel teams' active review of correspondence, including any potential climate-related litigation, and will alert the Impact team if any potential or actual cases come to the Legal department's attention. eBay could be indirectly exposed to litigation that imposes costs on our shipping partners, such as the United Parcel Service (UPS), United States Postal Service (USPS), and other carriers due to their fuel use. Similarly, lawsuits that resulted in extra costs for electricity providers and legislation impacting renewable energy projects could also affect eBay indirectly, if those energy providers decided to pass on the costs to their customers. These instances have not occurred, but they pose a potential, albeit unlikely, risk to the company.</p>
Market	Relevant, always included	<p>The potential of market risks exposes eBay and the company's buyers and sellers to risk both in terms of increased costs and decreased revenue. Our business model relies heavily on shipping and logistics, a small part of which is done directly by eBay Inc. businesses, but the majority of which occurs downstream of and out of our direct control. Increasing energy prices could quickly translate into higher shipping and logistics costs. These risks are monitored by our Delivery and Logistics teams and as part of their ongoing cost review and projections. The Impact team interacts with this team on a regular basis to assess if any risks have been identified specific to transportation and logistics and incorporates this information into our overall risk assessment.</p> <p>This risk (including those associated with cross-border trade) has also been identified by our Enterprise Risk Management (ERM) function and is noted in our annual 10-K filing. If those costs are passed on in the prices offered to customers on our commerce sites, this could drive down demand for online shopping, causing overall harm to eBay's business.</p>
Reputation	Relevant, always included	<p>In a low-carbon economy, eBay's stakeholders may become more concerned about climate-related impacts, and there may be a cost for the emissions associated with eBay's business model, including an impact on eBay's reputation. eBay's Impact team and ESG Council help to monitor these potential risks, which can negatively impact our company's financial performance.</p> <p>For example, eBay examines reputational risks among our investors, employees, buyers and sellers, and the media. We consider this type of reputational risk to be well managed through our current ESG strategy, which includes a renewable electricity target and Science-Based Target goal to reduce Scope 1 and 2 emissions by 90% by 2030, and Scope 3 downstream transportation and delivery emissions by 20% in the same timeframe.</p>
Acute physical	Relevant, always included	<p>Hurricanes, floods, and windstorms could negatively impact shipping and customer demand. For example, Hurricane Ian was the 5th strongest hurricane to ever make landfall in the U.S. Impacts from the storm resulted in shipment delays from eBay sellers located in the southeast due to shipping network disruptions.</p> <p>Wildfires could also negatively impact eBay's operations and our employees, as the company is headquartered in California. Additionally, water shortages can impact our operations, specifically at our more water-intensive data centers.</p> <p>These events commonly result in electricity and telecommunication network disruptions that can impact the ability of eBay customers, both sellers and buyers, to sell and make purchases online. The impact varies with the magnitude of the events and the concentrations of buyers, sellers, and shipping activities in the affected locations, but if the frequency and severity of weather events increases as climate change progresses, the risk will climb. Our Facilities team actively monitors facility weather-related risk and Global Customer Service continually monitors online uptime and activity as part of our overall enterprise and climate risk assessment.</p>
Chronic physical	Relevant, always included	<p>eBay owns and leases various properties in the U.S. and 22 other countries/areas around the world. Some of these locations are more vulnerable than others to potential physical changes from climate change. For instance, in San Jose, CA, maps of potential sea level rise indicate that a 1-meter increase could submerge one of two major San Jose freeways and restrict access to the San Jose Airport, affecting the ability of employees and partners to travel to eBay's headquarters in San Jose.</p> <p>Other risks could include disruption of our operations or physical damage to our facilities from floods, wildfires, or other extreme weather events and possible sea level rise. Drought and other climate-related decreases in the availability of fresh water could also pose a risk to our operations. This is most particularly the case for our data center operations. Water is essential for cooling, and prolonged shortages could ultimately result in service interruptions and costly relocation of data center services; therefore, our Data Center (Core Technology) team actively monitors and assesses the risk of water shortages as part of its operational risk assessment.</p>

Increased indirect (operating) costs

Climate risk type mapped to traditional financial services industry risk classification

<Not Applicable>

Company-specific description

The increased cost of energy and uncertainty in market signals can directly increase our operating costs at eBay's global physical locations, resulting in a decrease in our company's income. Increased operating costs at these locations can also impact the potential cost to offset our company's carbon footprint. Additionally, uncertainty in the price of energy and fuel could also impact the goods sold on our Marketplace. For example, the increased cost of transporting goods can directly impact eBay's buyers and sellers, as shipping costs are either covered by the sellers and/or the buyers, potentially impacting eBay's revenues.

Situation: Energy is an essential input to eBay, as our platform relies on our data centers that are responsible for 86% of energy use and more than 30,000 tons of CO₂e emissions in 2022. Our customer support organization also operates facilities 24 hours a day, 7 days per week, and is crucial to supporting our buyers and sellers.

Task: As global temperatures continue to rise, energy costs are also expected to increase. For example, eBay's 2022 energy spend was estimated to be approximately 0.5% of eBay's total operating expenses (approximately \$24 million).

Action: In order to mitigate risks associated with uncertainty in market signals, eBay must evaluate opportunities to reduce reliance on traditional energy sources and increase efficiencies at our data centers in the U.S. Each year, eBay evaluates the company's environmental footprint. Based on this assessment, it was determined that data centers are responsible for 70% of our Scope 1 and 2 emissions.

Result: To meet the needs of our business and stakeholders and reduce reliance on traditional energy sources and increase efficiencies at our data centers in the U.S., in 2022, eBay completed an assessment of renewable energy options at international offices, evaluating respective national markets and local renewable energy offerings. The results indicated retail supply options were available in 41% of international office locations and eBay will prioritize local green programs as feasible.

Are you able to provide a potential financial impact figure?

Yes, a single figure estimate

Potential financial impact figure (currency)

117500000

Potential financial impact figure – minimum (currency)

<Not Applicable>

Potential financial impact figure – maximum (currency)

<Not Applicable>

Explanation of financial impact figure

The estimated financial impact is approximately \$117.5 million, which assumes the potential for an approximate 5% decrease in eBay's 2022 net income from operations \$2.35 billion due to increased energy-related costs. It is estimated, that between increased energy costs, along with uncertainty in the price of energy and fuel (which could also impact the goods sold on our Marketplace) would result in a 5% reduction of our income of operations.

Cost of response to risk

6000000

Description of response and explanation of cost calculation

RESPONSE: eBay manages risks associated with energy and fuel costs and uncertainty in market signals through tracking and quantifying our environmental footprint and progress toward our emissions reduction target; actively manage heating, ventilation, and air conditioning systems, lighting, and IT infrastructure; & reducing our reliance on traditional fuel sources. eBay's Facility team works to implement energy reduction initiatives. For example, data centers comprise 70% of our Scope 1 and 2 emissions. In 2022, we continued to implement energy-efficient practices, such as heating and cooling upgrades in Dublin and LED lighting in London. To date, each of our primary data centers has earned the ENERGY STAR® for Data Centers Label.

To further evaluate additional opportunities to reduce our risks related to uncertainty in market signals, we also engage with key sustainability partners. For example, we are designated as an official member of the U.S. Environmental Protection Agency's Green Power Partnership, a voluntary program to encourage the use of green power. eBay also partners with advocacy organizations for climate change, such as the CEBA and Ceres Business for Innovative Climate and Energy Policy Network.

Case Study: Each year, eBay's spend as it relates to energy-related expenses continue to increase. For example, in 2022, Europe where eBay has several locations, the region faced a surge in energy prices. Due to our reliance on energy, we must assess opportunities to reduce energy use and reliance on traditional fuel sources. In 2022, we completed an assessment of renewable energy options at international offices. As a result of this assessment, we will prioritize local green programs as feasible. By evaluating eBay's reliance on traditional fuel sources, eBay may be able to reduce negative impacts associated with uncertainty in market signals. The results of this study also indicated retail supply options for renewable energy were available in 41% of international office locations.

COST CALCULATION: eBay's 2022 energy spend was estimated to be approximately 0.5% of total operating expenses (approximately \$24 million). Data centers were responsible for 86% of that consumption, with other facilities comprising the majority of the other energy consumption. Using a conservative assumption that regulations or taxes increase energy prices by 25%, that would increase energy spend by about \$6 million annually.

Reduced indirect (operating) costs

Company-specific description

eBay prioritizes procurement of renewable energy at its data centers and offices, reducing exposure to GHG emissions and carbon and fuel costs. As a member of RE100, the global corporate renewable energy initiative bringing together hundreds of businesses committed to 100% renewable electricity, we are on track to meet eBay's goal to attain 100% renewable energy in our electricity supply at eBay-controlled data centers and offices by 2025. In 2022, we achieved 91% renewable energy.

Investors are also increasingly expecting companies to manage their climate risk and look for financial opportunity in a low-carbon market. eBay's approach to climate change prioritizes the procurement of renewable energy, which will decrease the carbon footprint and stabilize operating costs of our business. For example, our headquarters is in San Jose, California where the grid is primarily powered by natural gas in a pseudo deregulated market with only single-option utilities that control pricing. Our only owned data center is in Salt Lake City, Utah, a fully regulated market. Even with constraints to easily access renewable energy at a reasonable cost, eBay recognized the importance of achieving 100% renewable energy in our offices and data centers and has committed to RE100 by 2025. From 2021 to 2022, we increased our MWhs of renewable energy supply, and we have achieved 91% renewable energy for all of our data centers and offices. In our San Jose headquarters, our largest office, we use 100% renewable energy, provided by San Jose Clean Energy. This office now uses exclusively wind, solar and geothermal power, and we look to expand this to more offices in the future.

In addition, consumers are increasingly aligning their personal values with buying behaviors and are looking for shopping destinations that support their choices and beliefs. eBay can be an appealing brand for consumers who value sustainability and climate action, which can lead to increased demand for products on eBay, and therefore increase the company's stock price. For example, in 2022, in our Recommerce Report we surveyed eBay's consumer-to-consumer (C2C) sellers around their habits of both buying and selling second-hand goods. 93% of sellers said sustainability was very or somewhat important to them in selling pre-loved goods. That motivation climbed to the number two spot, from last year, as a top factor driving sellers and buyers to engage in recommerce.

Time horizon

Medium-term

Likelihood

About as likely as not

Magnitude of impact

Medium-low

Are you able to provide a potential financial impact figure?

Yes, a single figure estimate

Potential financial impact figure (currency)

120000000

Potential financial impact figure – minimum (currency)

<Not Applicable>

Potential financial impact figure – maximum (currency)

<Not Applicable>

Explanation of financial impact figure

eBay does business in a strongly competitive environment that is under increasing scrutiny from our investors. Increased positive brand recognition and sentiment could translate into positive competitive advantage and increased stock price. For example, as of June 2023, eBay's Market capitalization was \$24.1 billion. If eBay experiences positive brand recognition, we expect an estimated 0.5% increase in the market cap, which would amount to approximately \$120 million.

Cost to realize opportunity

250000

Strategy to realize opportunity and explanation of cost calculation

STRATEGY: eBay's strategy to realize this opportunity includes our 2025 environmental targets. As a member of RE100, we have set a 2025 goal to attain 100% renewable energy in our electricity supply at eBay-controlled data centers and offices. As of year-end 2022 we have achieved 91% renewable energy. In our San Jose headquarters, our largest office, we use 100% renewable energy provided by San Jose Clean Energy, in addition to using 100% renewable energy at eight of our other offices. Our strategy to realize this opportunity also includes a step-wise plan to incrementally get to 100% renewable over the next one and a half years. This plan is regularly reviewed and re-assessed for feasibility and advancements in the market. In addition to this goal, we recognize the need to promote our progress to attract and retain customers.

eBay continues to encourage adoption of low-carbon and electric transportation with our primary logistics partners, which are not considered our direct suppliers in this context, but partners within our value chain. We also continue to provide guidance to protect sellers that could be impacted from hurricanes and wildfires, and clearly communicate eBay's expectations of sellers and their delivery of goods.

CASE STUDY:

In our efforts to use 100% renewable energy by 2025, we consistently search for local, renewable energy solutions to power our offices and data centers. eBay invested in projects such as VPPAs in Texas and Louisiana when local solutions are not available, and we use 100% renewable energy at our headquarters along with eight other offices. In 2022, we also completed an assessment of renewable energy options at international offices and will prioritize local green programs as feasible. The results of this study indicated retail supply options for renewable energy were available in 41% of international office locations.

COST CALCULATION: Stakeholder engagement, transparency and related external activities are a normal part of our work, so we expect no additional costs to be incurred in communicating our response to climate change or renewable energy achievements. However, we have staff dedicated to our renewable energy strategy, which equates to about a one-half full-time employee (\$100,000). In addition to this cost, we have invested approximately \$50,000 for a renewable energy assessment, in addition to \$100,000 for REC purchases. Therefore the total cost to realize this opportunity is approximately \$250,000.

Comment

C3. Business Strategy

C3.1

(C3.1) Does your organization’s strategy include a climate transition plan that aligns with a 1.5°C world?

Row 1

Climate transition plan

Yes, we have a climate transition plan which aligns with a 1.5°C world

Publicly available climate transition plan

Yes

Mechanism by which feedback is collected from shareholders on your climate transition plan

We have a different feedback mechanism in place

Description of feedback mechanism

eBay regularly meets with and solicits feedback from investors and shareholders to discuss our ESG strategy including eBay’s climate transition plan includes our Science-Based Target goal to reduce Scope 1 and 2 emissions by 90% by 2030, and Scope 3 downstream transportation and delivery emissions by 20% in the same timeframe; and sourcing 100% of our electricity supply from renewable energy sources by 2025 for eBay-controlled data centers and offices.

Frequency of feedback collection

More frequently than annually

Explain why climate-related risks and opportunities have not influenced your strategy

<Not Applicable>

C3.2

(C3.2) Does your organization use climate-related scenario analysis to inform its strategy?

Table with 3 columns: Use of climate-related scenario analysis to inform strategy, Primary reason why your organization does not use climate-related scenario analysis to inform its strategy, Explain why your organization does not use climate-related scenario analysis to inform its strategy and any plans to use it in the future. Row 1: Yes, qualitative and quantitative; <Not Applicable>; <Not Applicable>

C3.2a

(C3.2a) Provide details of your organization’s use of climate-related scenario analysis.

Climate-related scenario		Scenario analysis coverage	Temperature alignment of scenario	Parameters, assumptions, analytical choices
Transition scenarios	IEA 2DS	Company-wide	<Not Applicable>	<p>IDENTIFICATION OF SCENARIOS: To better understand and prioritize eBay’s potential climate-driven risks and opportunities, we evaluated two scenarios based on whether the world will mobilize in time to avert the disastrous climate impacts modeled by the scientific community.</p> <p>INPUTS, ASSUMPTIONS, AND ANALYTICAL CHOICES: The inputs used in our climate related scenarios were based on the Task Force on Climate-related Disclosure transition risk categories. In a low-carbon economy, stakeholders may become more concerned about climate-related impacts, which could impact access to and cost of capital. In this assessment, we also considered market shaping forces. For example, changing demographics and social shifts—including the rise of Gen Z—have resulted in increased climate-related interest among stakeholders. For this scenario assessment, we also incorporated the lessons and observed trends from the current COVID-19 pandemic, as it increased the importance of e-commerce. The pandemic also provides parallels to how the world might be impacted and adapt to climate change.</p> <p>eBay is currently operating under the assumption that the low-carbon economy is the global trend, and we have developed a low-carbon transition plan to align with that approach.</p> <p>PARAMETER (BOUNDARY AND TIME HORIZONS): We consider our entire operational footprint, including Scope 3 emissions. We also consider the following time horizons in our scenario analysis: short-term (1-2 years), medium-term (3-5 years), and long-term (6-15 years), which are aligned with the horizons needed to assess and respond to the identified climate-related risks and opportunities.</p> <p>INFLUENCE ON STRATEGY AND FINANCIAL PLANNING: eBay evaluates risks and opportunities that may affect our services, value chain and operations. While eBay has exposure to both physical and transition drivers, transition drivers appear to present both the most meaningful risks and opportunities for eBay’s business, strategy and financial planning for the foreseeable future. eBay’s largest indirect environmental risks can be attributed to its downstream impacts, mainly customer-related transportation of merchandise. Since eBay does not own inventory, directly handle shipping logistics, nor have operational control over any have a significant number of fulfillment centers, our physical risks are not prominent. This presents an opportunity for our company to continue on a path of resiliency, as we proactively manage climate-related risks.</p>
Physical climate scenarios	RCP 8.5	Company-wide	<Not Applicable>	<p>IDENTIFICATION OF SCENARIOS: To better understand and prioritize eBay’s potential climate-driven risks and opportunities, we evaluated two scenarios based on whether the world will mobilize in time to avert the disastrous climate impacts modeled by the scientific community.</p> <p>INPUTS, ASSUMPTIONS, AND ANALYTICAL CHOICES: The inputs used in our climate related scenarios were based on the Task Force on Climate-related Disclosure (TCFD) physical risk categories. We understand that in a low-carbon scenario, wildfires and hurricanes will continue to be a threat.</p> <p>eBay is currently operating under the assumption that the low-carbon economy is the global trend, and we have developed a low-carbon transition plan to align with that approach. To establish eBay’s emissions reduction targets, we evaluated our Scope 1 and 2 emissions trajectories to align with the IPCC’s 1.5°C scenario. Our data coverage for these scopes include 100% of our operations in tracking our GHG emissions. Our efforts are aligned to our Science-Based Target goal to reduce Scope 1 and 2 emissions by 90% by 2030, and Scope 3 downstream transportation and delivery emissions by 20% in the same timeframe.</p> <p>PARAMETER (BOUNDARY AND TIME HORIZONS): We consider our entire operational footprint, including Scope 3 emissions. We also consider the following time horizons in our scenario analysis: short-term (1-2 years), medium-term (3-5 years), and long-term (6-15 years), which are aligned with the horizons needs to assess and respond to the identified climate-related risks and opportunities.</p> <p>INFLUENCE ON STRATEGY AND FINANCIAL PLANNING: eBay evaluates risks and opportunities that may affect our services, value chain and operations. While eBay has exposure to both physical and transition drivers, transition drivers appear to present both the most meaningful risks and opportunities for eBay’s business, strategy and financial planning for the foreseeable future. eBay’s largest indirect environmental risks can be attributed to its downstream impacts, mainly customer related transportation of merchandise. Since eBay does not own inventory, directly handle shipping logistics, nor have operational control over any fulfillment centers, our physical risks are not prominent. This presents an opportunity for our company to continue on a path of resiliency, as we proactively manage climate-related risks.</p>

C3.2b

(C3.2b) Provide details of the focal questions your organization seeks to address by using climate-related scenario analysis, and summarize the results with respect to these questions.

Row 1

Focal questions

Q1: What is most likely going to have the largest impact on eBay’s climate performance?

Q2: What threats to eBay’s infrastructure (data centers) could challenge the company over the next 10-20 years?

Q3: How can R&D investments influence eBay’s future climate strategy; or are there other forces that may have a greater influence on eBay?

Results of the climate-related scenario analysis with respect to the focal questions

Q1: eBay’s climate-related scenario analysis has influenced both our operations and financial planning. Through our analysis, Scope 3 emissions related to eBay’s downstream shipping and transportation is likely going to have the largest contribution to eBay’s climate related impact. For eBay, as an online marketplace, Scope 3 emissions are primarily derived from the shipping and transportation of items purchased online. As we work to reduce our transportation impact, we work with shipping carriers on the data collection process to track our overall carbon emissions footprint. We continue to increase data quality in assessing the entire shipping process from our marketplace, including our larger international markets: the U.K., Germany and China in addition to the U.S. As part of our Science-Based Target, we continue to reduce our transportation footprint. We have also committed to further align our emissions reduction targets with the Science-Based Targets initiative criteria. We aim to reduce Scope 1 and 2 emissions by 90% by 2030, and Scope 3 downstream transportation and delivery emissions by 20% in the same timeframe.

Q2: Over the next 10-20 years, physical climate-related risks have the potential to impact the company’s infrastructure, including data centers. eBay’s data centers consumed approximately 86% of the company’s energy usage and are critical to our business. As such, in 2022, we started a multi-year retrofit of our data centers to reduce electrical redundancy and replace the existing Uninterruptible Power Supply system with high-efficiency models. Throughout the year, we also continued to implement energy-efficient practices at our eBay offices and data centers, resulting in a decrease in our total Scope 1 and 2 emissions (or those coming directly from a company’s operations).

Q3: eBay’s investments into R&D, such as funding into customer experience, which includes shipping and logistics algorithms that match buyers and sellers that are closest to each other to reduce costs and climate-related impacts. For example, energy and fuel taxes or climate-related disruptions cause shipping and logistics expenses to rise, eBay may invest more funding into adapting its shipping networks and partnerships to keep costs manageable. Additionally, eBay’s Business Continuity and Technology (BCTR) planning approach focuses on the development of resource-loss based recovery strategies. It also establishes policies, processes, and procedures to enable advanced preparation and actions by business units and this is an annual process that begin in January each year. The business continuity program relies on the integration and coordination of efforts between BCTR, Disaster Recovery and Crisis/Emergency Management teams to respond to incidents, including extreme weather events. Through these investments, the company can better manage and mitigate climate-related risks.

(C3.3) Describe where and how climate-related risks and opportunities have influenced your strategy.

	Have climate-related risks and opportunities influenced your strategy in this area?	Description of influence
Products and services	Yes	<p>INFLUENCE ON STRATEGY: Changing demographics and social shifts—including the rise of Gen Z—have resulted in increased climate-related interest and concern among investors, consumers and employees, which has also influenced our strategy and focus on recommerce. For example, an eBay run survey resulted in 93% of respondents indicating that sustainability was either “very” or “somewhat” important to them in selling pre-loved goods.</p> <p>TIME HORIZON: The time horizon is 10+ years.</p> <p>CASE STUDY ON STRATEGIC DECISIONS INFLUENCED BY RISKS AND OPPORTUNITIES: In 2022 alone, we have avoided 1.6 million metric tons of carbon emissions through people selling their preowned products on eBay. We also set a new commitment that from 2021 to 2025, we will avoid 8 million metric tons of carbon emissions through people selling their pre-owned and refurbished products on eBay. We will continue to invest and measure our positive impact from the sale of pre-owned goods.</p>
Supply chain and/or value chain	Yes	<p>INFLUENCE ON STRATEGY: eBay does not have a traditional supply chain; in that we do not manufacture or produce the goods that are sold on our platform. Therefore, a large portion of what we consider our value chain consists of the shipment of sold goods. Extreme weather events have had a small, but noticeable impact on the business due to delays in shipping and handling of products that eBay sellers sell on the platform, which is critical to our value chain. We continue to foster strong relationships with carriers to help plan for potential disruption in deliveries so that we can inform our users of any potential impacts.</p> <p>TIME HORIZON: We anticipate extreme weather events will have localized impact every year for the foreseeable future, therefore the time horizon to assess and adjust our delivery support for sellers is short-, medium- and long-term (10+ years.)</p> <p>CASE STUDY ON STRATEGIC DECISIONS INFLUENCED BY RISKS AND OPPORTUNITIES: eBay’s business continues to be impacted by hurricanes, resulting in power outages and disrupted transportation routes. For example, the U.S. continued to be largely impacted by hurricanes and other disasters globally. A 1% revenue decrease during one week in a year could result in a loss of \$1.9 million (2022 revenue of \$9.8 billion divided by 52 weeks, multiplied by 1%). Internally, our delivery and shipping team has formed a task force to plan responses to extreme weather events because of their increased frequency. This team has relationships with our key carriers which are considered as partners in our value chain and critical to the shipping options we offer.</p>
Investment in R&D	Yes	<p>INFLUENCE ON STRATEGY: As an online marketplace, eBay invests R&D funding into customer experience, which includes shipping and logistics, such as algorithms that match buyers and sellers that are closest to each other to reduce costs. If energy and fuel taxes or climate-related disruptions cause shipping and logistics expenses to rise, eBay may invest more funding into adapting its shipping networks and partnerships to keep costs manageable.</p> <p>TIME HORIZON: The time horizon is 10+ years.</p> <p>CASE STUDY ON STRATEGIC DECISIONS INFLUENCED BY RISKS AND OPPORTUNITIES: Internally, we run scenario analyses on the impacts to sales based on shipping options and preferences. For example, we now offer local pickup as an option for buyers to pick up items in person, rather than shipping. This research is critical to maintaining a strong online presence and offering appropriate choices for our customers while managing both shipping-related cost for sellers and related climate emissions for delivery. This process is ongoing and part of our commitment to continual improvement. Certain options will be tested and rolled out on a continuing basis to keep in line with evolving consumer preferences. eBay facilitates the sale and purchase of goods as our primary business goal and therefore we will continue to research ways to optimize shipping and minimize climate impact. Additionally, eBay is part of a small group of brands liaising with carriers to explore low-carbon last mile solutions and are also actively evaluating and supporting low-carbon transport policy in key states and metro areas. As a result of engaging with this group, eBay anticipates the increased implementation of low-carbon shipping options for our sellers over the long-term.</p>
Operations	Yes	<p>INFLUENCE ON STRATEGY: eBay’s facilities and data centers have not yet been affected by climate change-related events or regulations, but these risks have been evaluated. There may also be a reputational aspect, as stakeholder, including investors expect a low operational carbon footprint. Business disruptions as well as physical damage to facilities could increase costs and have potentially negative revenue impacts by restricting or disrupting altogether access to our platforms and services. We evaluate the energy management of our owned data center annually and have quarterly project plans for implementation of efficiency improvements. Due to the potential for climate-related disruptions (weather, electricity supply) data center teams include resiliency and redundancy plans as part of their ongoing management.</p> <p>TIME HORIZON: The time horizon is 10+ years as we do not anticipate climate-related weather events or impacts to electricity fuel mix decreasing.</p> <p>CASE STUDY ON STRATEGIC DECISIONS INFLUENCED BY RISKS AND OPPORTUNITIES: eBay has both owned and co-located (COLO) data centers in the U.S. that contribute approximately 86% of our total energy consumption. Over the last couple of years, eBay has been redistributing load among certain COLO data centers and our owned data centers to ensure we will stay up and running even in the event of climate-related damage or outage. We continuously evaluate the percentage of renewable energy supply to our facilities as part of our overall strategy for a sustainable long-term energy supply. In our San Jose headquarters, our largest office, we use 100% renewable energy. We also use 100% renewable energy in eight other offices.</p> <p>Our San Jose headquarters uses exclusively wind, solar and geothermal power, and we look to expand this to more offices in the future. eBay consistently searches for opportunities for local, renewable energy solutions to power our offices and data centers.</p> <p>eBay also continues to invest in renewable energy projects, prioritizing virtual purchase power agreements (VPPAs), which ensure that more green electricity is fed into our electricity grids. So far, we’ve entered into VPPAs for a solar project in Louisiana and a wind project in Texas while we continue to look for additional opportunities globally.</p>

(C3.4) Describe where and how climate-related risks and opportunities have influenced your financial planning.

	Financial planning elements that have been influenced	Description of influence
Row 1	Revenues Direct costs Indirect costs Capital expenditures Capital allocation Access to capital	<p>eBay evaluates risks and opportunities that may affect our services, value chain and operations. While eBay has exposure to both physical and transition drivers, transition drivers appear to present both the most meaningful risks and opportunities for eBay's business, strategy and financial planning for the foreseeable future. eBay's business model enables the reuse of goods as a leading platform to buy and sell pre-owned products; however, the company's largest indirect environmental risks can be attributed to its downstream impacts, mainly customer-related transportation of merchandise.</p> <p>Since eBay does not own inventory, directly handle shipping logistics, nor have operational control over any fulfillment centers, our physical risks are not prominent. This presents an opportunity for our company to continue on a path of resiliency, as we proactively manage climate-related risks. eBay's transaction volume and resulting revenue has previously been impacted by hurricanes in recent years. Because we expect that disruptive weather events will continue to occur, our financial planning includes contingencies for these potential dips in revenue.</p> <p>Our finance team works with the relevant marketplaces management to evaluate and plan for future events – in many cases the response from eBay, in terms of seller support will look the same across a market (the U.S.). However, regional differences and market volumes are taken into consideration when addressing each instance.</p> <p>We do not foresee climate-related extreme weather events to lessen in the foreseeable future, therefore the process of evaluating potential disruptions to our online sales and delivery is ongoing and 10+ years. The plans are reviewed annually and are adjusted as additional data on the frequency and severity of these events is collected from the events themselves.</p> <p>Case Study: Climate related risks and opportunities have influenced our financial planning related to our capital expenditures. Extreme weather events, coupled with market-related impacts including increases in energy costs has resulted in eBay investing in energy efficiency measures at our data centers. In 2022, we started a multi-year retrofit of our data centers to reduce electrical redundancy and replace the existing Uninterruptible Power Supply system with high-efficiency models. Through these projects, we have reduced the required electrical redundancy from the original design as well as moved to replacing the existing UPS system with high efficiency models. The combination of these retrofit design choices increases our power efficiency by over 4% in these spaces.</p>

C3.5

(C3.5) In your organization's financial accounting, do you identify spending/revenue that is aligned with your organization's climate transition?

Please explain target coverage and identify any exclusions

In 2021, eBay joined the Science Based Targets initiative (SBTi) and set a science-based carbon reduction target. eBay commits to reduce absolute Scope 1 and 2 emissions by 90% by 2030 from a 2019 base year. This target covers 100% of our Scope 1 and 2 emissions. Our data coverage for these scopes include 100% of our operations in tracking our GHG emissions.

Plan for achieving target, and progress made to the end of the reporting year

As of year-end 2022, we've reduced our Scope 1 and 2 emissions by approximately 32% from our 2019 baseline, making significant progress toward our goal. This is primarily due to the increase in our renewable energy supply. Throughout 2022, we continued to implement energy-efficient practices, such as heating and cooling upgrades in Dublin and LED lighting in London. In our data centers, we continue to invest in more efficient cooling systems to reduce operational energy use. For the remaining Scope 1 and 2 emissions, we have purchased carbon offsets to achieve carbon neutrality as a company.

eBay has also invested in projects such as VPPAs in Texas and Louisiana when local solutions are not available, and we use 100% renewable energy at our San Jose headquarters along with eight other offices. In 2022, we completed an assessment of renewable energy options at international offices and will prioritize local green programs as feasible.

In 2021, eBay joined the Science Based Targets initiative (SBTi) and set a science-based carbon reduction target. eBay commits to reduce absolute Scope 3 downstream transportation and delivery emissions by 20% by 2030 from a 2019 base year.

Plan for achieving target, and progress made to the end of the reporting year

For eBay, as an online marketplace, Scope 3 emissions are primarily derived from the shipping and transportation of items purchased online. To date, as part of our Science-Based Target, we have reduced our transportation footprint by approximately 27%, from 2019. This reduction is a result of shifts in transactions. We understand that we have not met our goal as we will need to maintain these reductions by 2030. To reduce our transportation impact, we will continue to work with shipping carriers on the data collection process to track our overall impact.

Is this target part of an emissions target?

eBay's 100% renewable electricity target directly supports our Science-Based Target to achieve a 90% absolute reduction in Scope 1 and 2 Greenhouse Gas (GHG) emissions by 2030 from our 2019 baseline.

(Emissions reduction target ID Abs1)

Is this target part of an overarching initiative?

RE100

Please explain target coverage and identify any exclusions

eBay's 100% renewable electricity target was approved in 2016 as part of our RE100 membership. The target coverage includes electricity consumption at offices and data centers under operational control.

Plan for achieving target, and progress made to the end of the reporting year

From 2019 to 2022, we have achieved 91% renewable energy for all of our data centers and offices. eBay continues to invest in renewable energy projects, prioritizing virtual purchase power agreements (VPPAs), which ensure that more green electricity is fed into our electricity grids. So far, we've entered into VPPAs for a solar project in Louisiana and a wind project in Texas while we continue to look for additional opportunities globally. In our San Jose headquarters, our largest office, we also use 100% renewable energy, provided by San Jose Clean Energy. This office now uses exclusively wind, solar and geothermal power, and we look to expand this to more offices in the future.

C4.3c

(C4.3c) What methods do you use to drive investment in emissions reduction activities?

Method	Comment
Dedicated budget for other emissions reduction activities	To drive investment in emissions reduction activities, eBay has a dedicated budget to support these activities. For example, to support eBay's 100% renewable electricity target, procurement (whether via on-site or local utility offerings or off-site contracts) of lower-carbon energy is part of the company strategy. eBay continues to invest in renewable energy projects, prioritizing virtual purchase power agreements (VPPAs), which ensure that more green electricity is fed into our electricity grids. So far, we've entered into VPPAs for a solar project in Louisiana and a wind project in Texas while we continue to look for additional opportunities globally.
Employee engagement	Employee engagement is a key foundational element of eBay Inc.'s Impact strategy. The origins of our environmental programs can be traced directly back to the grassroots passion of our employees. Our Changemakers teams continue this legacy. These Teams are briefed regularly on our energy and carbon approach, as well as educated about local initiatives that can impact our overall carbon footprint. Many of the extended team who work in operational energy efficiency, greener building, renewable energy and other areas are also Changemakers members.
Dedicated budget for energy efficiency	To drive investment in emissions reduction activities, eBay has a dedicated budget for energy efficiency projects. Across our eBay offices and data centers, we invest in and implement resource efficient strategies such as tech refreshes at the data centers and LED lighting upgrades in offices to reduce our overall environmental footprint. In 2022, we continued to implement energy-efficient practices, such as heating and cooling upgrades in Dublin and LED lighting in London. In our data centers, we continue to invest in more efficient cooling systems to reduce operational energy use. We've also purchased offsets to achieve carbon neutrality for the remainder of these emissions.

C4.5

(C4.5) Do you classify any of your existing goods and/or services as low-carbon products?

Group of products or services

Taxonomy used to classify product(s) or service(s) as low-carbon

Other, please specify (Selling of pre-owned products)

Type of product(s) or service(s)

Other	Other, please specify (Pre-owned products)
-------	--

Description of product(s) or service(s)

Every day, we help extend the life of products through the resale of pre-owned and refurbished items on our global platform. By keeping products in circulation longer, we contribute to a robust circular economy that's essential for the sustainability of our planet. From 2021 to 2025, our goal is to avoid seven million metric tons of carbon emissions. In 2022, 1.6 million metric tons of carbon emissions were avoided through people selling their pre-owned products on eBay.

Have you estimated the avoided emissions of this low-carbon product(s) or service(s)

Yes

Methodology used to calculate avoided emissions

Other, please specify (Based on the quantity of pre-owned goods sold on eBay)

Life cycle stage(s) covered for the low-carbon product(s) or services(s)

Cradle-to-gate

Functional unit used

Number of new goods displaced by purchase of used goods

Reference product/service or baseline scenario used

Carbon embedded in new goods from cradle to gate

Life cycle stage(s) covered for the reference product/service or baseline scenario

Cradle-to-gate

Estimated avoided emissions (metric tons CO2e per functional unit) compared to reference product/service or baseline scenario

1600000

Explain your calculation of avoided emissions, including any assumptions

eBay calculated this metric by estimating the environmental associated with sales of used and refurbished products. In 2022, the underlying data and assumptions were updated for product groups Electronics and Fashion, and new data were added for product groups Media, Lifestyle, Home & Garden, Business & Industrial and Vehicle Parts & Accessories. Geographic coverage was extended from the U.S., Canada and the U.K. to France, Italy, Germany and Australia for all product groups.

C5.1c

(C5.1c) Have your organization's base year emissions and past years' emissions been recalculated as a result of any changes or errors reported in C5.1a and/or C5.1b?

	Base year recalculation	Scope(s) recalculated	Base year emissions recalculation policy, including significance threshold	Past years' recalculation
Row 1	No, because we do not have the data yet and plan to recalculate next year	<Not Applicable>	Significant is defined as a cumulative change (+/-) of two percent (2%) or larger in eBay's total base year emissions (both Scope 1 and Scope 2) on a CO2-e basis. Given the timing of the acquisitions of TCG Player and KnownOrigin, the materiality on historical years is still being assessed as eBay is gathering the necessary information. It is expected the calculations will be complete in 2023, where a re-baseline will be made if the significance threshold is met.	No

C5.2

(C5.2) Provide your base year and base year emissions.

Scope 1

Base year start

January 1 2019

Base year end

December 31 2019

Base year emissions (metric tons CO2e)

27516

Comment

Data coverage for Scope 1 emissions includes 100% of our operations. Baseline data has been restated to ensure consistency with updated emissions factors, CDP, and RE100 reporting requirements.

Scope 2 (location-based)

Base year start

January 1 2019

Base year end

December 31 2019

Base year emissions (metric tons CO2e)

124006

Comment

Data coverage for Scope 2 (location-based) emissions includes 100% of our operations. Baseline data has been restated to ensure consistency with updated emissions factors, CDP, and RE100 reporting requirements.

Scope 2 (market-based)

Base year start

January 1 2019

Base year end

December 31 2019

Base year emissions (metric tons CO2e)

36731

Comment

Data coverage for Scope 2 (market-based) emissions includes 100% of our operations.

Baseline data has been restated to ensure consistency with updated emissions factors, CDP, and RE100 reporting requirements.

C5.3

(C5.3) Select the name of the standard, protocol, or methodology you have used to collect activity data and calculate emissions.

The Greenhouse Gas Protocol: Scope 2 Guidance

C6. Emissions data

C6.1

(C6.1) What were your organization's gross global Scope 1 emissions in metric tons CO2e?

Reporting year

Gross global Scope 1 emissions (metric tons CO2e)

5133

Start date

<Not Applicable>

End date

<Not Applicable>

Comment

eBay's Scope 1 emissions are generated from fuel sources including natural gas consumption.

C6.2

(C6.2) Describe your organization's approach to reporting Scope 2 emissions.

Row 1

Scope 2, location-based

We are reporting a Scope 2, location-based figure

Scope 2, market-based

We are reporting a Scope 2, market-based figure

Comment

To track performance against our 2030 emissions reduction targets, we use our market-based Scope 2 emissions figure.

C6.3

(C6.3) What were your organization's gross global Scope 2 emissions in metric tons CO2e?

Reporting year

Scope 2, location-based

123130

Scope 2, market-based (if applicable)

38478

Start date

<Not Applicable>

End date

<Not Applicable>

Comment

2022 Scope 2 market-based emissions are less than Scope 2 location-based emissions, because eBay increased our MWhs of renewable energy supply, achieving 91% renewable energy for all of our data centers and offices.

C6.4

(C6.4) Are there any sources (e.g. facilities, specific GHGs, activities, geographies, etc.) of Scope 1, Scope 2 or Scope 3 emissions that are within your selected reporting boundary which are not included in your disclosure?

No

C6.5

(C6.5) Account for your organization's gross global Scope 3 emissions, disclosing and explaining any exclusions.

Purchased goods and services

Evaluation status

Relevant, calculated

Emissions in reporting year (metric tons CO2e)

126000

Emissions calculation methodology

Spend-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners

0

Please explain

Emissions were calculated using USEEIO's input-output life cycle assessment approach for 100% spend data for purchased goods and services over the reporting period. All values represent cradle-to-gate emissions across all GHG emissions identified in the GHG Protocol Value Chain Standard, using purchaser price.

Capital goods

Evaluation status

Relevant, calculated

Emissions in reporting year (metric tons CO2e)

22000

Emissions calculation methodology

Spend-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners

0

Please explain

Emissions were calculated using USEEIO's input-output life cycle assessment approach for 100% spend data for purchased goods and services over the reporting period. All values represent cradle-to-gate emissions across all GHG emissions identified in the GHG Protocol Value Chain Standard, using purchaser price.

Fuel-and-energy-related activities (not included in Scope 1 or 2)

Evaluation status

Relevant, calculated

Emissions in reporting year (metric tons CO2e)

9000

Emissions calculation methodology

Average data method

Percentage of emissions calculated using data obtained from suppliers or value chain partners

0

Please explain

Emissions were calculated using DEFRA's UK Government GHG Conversion Factors for Company Reporting. Emissions calculations represent emissions associated with the generation and transmission and distribution associated with electricity use. The upstream emissions from the production and transportation of fuels consumed by eBay sites has been removed from the calculation methodology. Compared to last year, DEFRA discontinued this section of the publication and errors were found/noted with previously published factors to avoid use in calculations.

Upstream transportation and distribution

Evaluation status

Relevant, calculated

Emissions in reporting year (metric tons CO₂e)

10700

Emissions calculation methodology

Spend-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners

0

Please explain

Emissions were calculated using USEEIO's input-output life cycle assessment approach for 100% spend data for purchased goods and services over the reporting period. All values represent cradle-to-gate emissions across all GHG emissions identified in the GHG Protocol Value Chain Standard, using purchaser price.

Waste generated in operations

Evaluation status

Relevant, calculated

Emissions in reporting year (metric tons CO₂e)

6200

Emissions calculation methodology

Spend-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners

100

Please explain

Physical waste data for a bottom-up analysis were not available at the time of this analysis, and thus a spend analysis was required. Lack of granularity in utility spend made it very difficult to parse out spend on waste management. As such, the average percentage spend on waste management by the data processing and hosting industry was used to estimate eBay's total spend for these topics. This method is likely to overestimate actual emissions but given that this category represents a small proportion of our total footprint, this method was considered reasonable.

Business travel

Evaluation status

Relevant, calculated

Emissions in reporting year (metric tons CO₂e)

10198

Emissions calculation methodology

Hybrid method

Percentage of emissions calculated using data obtained from suppliers or value chain partners

100

Please explain

Values represent all emissions associated with purchased air travel, rental cars and lodging. Emissions from air travel and rental cars were calculated using miles flown and driven in rental cars by eBay employees and emissions factors specific to air travel distance and average emissions per mile for rental cars. Emissions from lodging were calculated using USEEIO's input-output life cycle assessment and eBay's spend data on lodging.

Employee commuting

Evaluation status

Relevant, calculated

Emissions in reporting year (metric tons CO₂e)

19700

Emissions calculation methodology

Average data method

Percentage of emissions calculated using data obtained from suppliers or value chain partners

0

Please explain

A hotspot assessment was performed, where the emissions were calculated with the total number of eBay employees and the intensity assumption that the average employee emits 1,700 kgCO₂-eq/year. This is derived from US Department of Transportation data (USDOT 2014), in conjunction with ecoinvent 2.2 datasets for various transportation modes in conjunction with GWP impact assessment (SCLCI 2010, IPCC 2007), as well as GHGP partner Quantis assumptions on commuting (the assumptions that employees commute 240 working days per year and that carpoolers are allocated 1/3 of the car ride).

Upstream leased assets

Evaluation status

Not relevant, explanation provided

Emissions in reporting year (metric tons CO2e)

<Not Applicable>

Emissions calculation methodology

<Not Applicable>

Percentage of emissions calculated using data obtained from suppliers or value chain partners

<Not Applicable>

Please explain

The emissions from eBay's leased assets (real estate) are accounted for under Scope 1 & 2 GHG emissions

Downstream transportation and distribution

Evaluation status

Relevant, calculated

Emissions in reporting year (metric tons CO2e)

1477000

Emissions calculation methodology

Distance-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners

93

Please explain

Emissions were calculated based on carbon emissions reports provided by carriers based on our transaction (sold items on the platform) data. For transactions not associated with a particular carrier, we applied emissions factors based on mode of transportation.

Processing of sold products

Evaluation status

Not relevant, explanation provided

Emissions in reporting year (metric tons CO2e)

<Not Applicable>

Emissions calculation methodology

<Not Applicable>

Percentage of emissions calculated using data obtained from suppliers or value chain partners

<Not Applicable>

Please explain

eBay does not produce goods for sale. Our "product" is our platform, whose emissions are accounted for under Scope 1 & 2 GHG emissions.

Use of sold products

Evaluation status

Relevant, calculated

Emissions in reporting year (metric tons CO2e)

276000

Emissions calculation methodology

Methodology for direct use phase emissions, please specify (Overall emissions are based on the sum of Transfer Energy and Device Use Energy)

Percentage of emissions calculated using data obtained from suppliers or value chain partners

0

Please explain

Overall emissions are based on the sum of Transfer Energy and Device Use Energy. Transfer Energy was calculated by multiplying the estimated annual eBay data use by a Transfer Energy factor (kWh/GB) to get eBay's annual energy use. We then multiplied the energy use by the average US grid factor. Device Use Energy was calculated by multiplying the estimated annual eBay data use by a Device Use Energy factor (kWh/GB) to get eBay's annual energy use. We then multiplied the energy use by the average US grid factor.

End of life treatment of sold products

Evaluation status

Not relevant, explanation provided

Emissions in reporting year (metric tons CO2e)

<Not Applicable>

Emissions calculation methodology

<Not Applicable>

Percentage of emissions calculated using data obtained from suppliers or value chain partners

<Not Applicable>

Please explain

eBay does not manufacture products.

Downstream leased assets

Evaluation status

Not relevant, explanation provided

Emissions in reporting year (metric tons CO2e)

<Not Applicable>

Emissions calculation methodology

<Not Applicable>

Percentage of emissions calculated using data obtained from suppliers or value chain partners

<Not Applicable>

Please explain

eBay's downstream leased assets are minimal and therefore not relevant.

Franchises

Evaluation status

Other (downstream)

Evaluation status

Not relevant, explanation provided

Emissions in reporting year (metric tons CO2e)

<Not Applicable>

Emissions calculation methodology

<Not Applicable>

Percentage of emissions calculated using data obtained from suppliers or value chain partners

<Not Applicable>

Please explain

We have not identified any other downstream Scope 3 emission sources.

C6.7

(C6.7) Are carbon dioxide emissions from biogenic carbon relevant to your organization?

No

C6.10

(C6.10) Describe your gross global combined Scope 1 and 2 emissions for the reporting year in metric tons CO2e per unit currency total revenue and provide any additional intensity metrics that are appropriate to your business operations.

Intensity figure

0.00445237

Metric numerator (Gross global combined Scope 1 and 2 emissions, metric tons CO2e)

43611

Metric denominator

unit total revenue

Metric denominator: Unit total

9795000

Scope 2 figure used

Market-based

% change from previous year

0.6

Direction of change

Decreased

Reason(s) for change

Other emissions reduction activities
Change in revenue

Please explain

eBay's net revenues decreased by 6% to 9,795 billion in 2022 compared to 2021. From 2021 to 2022, eBay also increased our MWhs of renewable energy supply and have achieved 91% renewable energy for all of our data centers and offices. eBay's decrease in revenue intensity reflects the increase in renewable energy along with other emissions reduction activities, coupled with a decrease in revenue.

Intensity figure

3.759569

Metric numerator (Gross global combined Scope 1 and 2 emissions, metric tons CO2e)

43611

Metric denominator

full time equivalent (FTE) employee

Metric denominator: Unit total

11600

Scope 2 figure used

Market-based

% change from previous year

14.95

Direction of change

Decreased

Reason(s) for change

Other emissions reduction activities

Please explain

From 2021 to 2022, eBay increased our MWhs of renewable energy supply and achieved 91% renewable energy for all of our data centers and offices. eBay's decrease in FTE employee intensity reflects the increase in renewable energy along with other emissions reduction activities.

C7. Emissions breakdowns

C7.1

(C7.1) Does your organization break down its Scope 1 emissions by greenhouse gas type?

Yes

C7.1a

(C7.1a) Break down your total gross global Scope 1 emissions by greenhouse gas type and provide the source of each used greenhouse warming potential (GWP).

Greenhouse gas	Scope 1 emissions (metric tons of CO2e)	GWP Reference
CO2	4596.96	IPCC Fifth Assessment Report (AR5 – 100 year)
CH4	3.04	IPCC Fifth Assessment Report (AR5 – 100 year)
N2O	4.32	IPCC Fifth Assessment Report (AR5 – 100 year)
HFCs	528.31	IPCC Fifth Assessment Report (AR5 – 100 year)

C7.2

(C7.2) Break down your total gross global Scope 1 emissions by country/area/region.

Country/area/region	Scope 1 emissions (metric tons CO2e)
Australia	27.04
Belgium	8.82
Canada	22.61
China	543.12
Czechia	31.58
France	14.94
Germany	424.39
India	57.25
Ireland	147.44
Israel	171.53
Italy	17.2
Luxembourg	8.21
Malaysia	12.14

United Kingdom of Great Britain and Northern Ireland	162.1	12.29
United States of America	118054.71	34578.89
Japan	190.62	95.05
Hong Kong SAR, China	197.69	157.27
Mexico	4.24	4.24

C7.6

(C7.6) Indicate which gross global Scope 2 emissions breakdowns you are able to provide.

- By business division
- By activity

C7.6a

(C7.6a) Break down your total gross global Scope 2 emissions by business division.

Business division	Scope 2, location-based (metric tons CO2e)	Scope 2, market-based (metric tons CO2e)
Americas	118063.63	34587.8
Asia/Pacific	3422.48	2952.48
Europe, Middle East, Africa	1644.32	937.49

C7.6c

(C7.6c) Break down your total gross global Scope 2 emissions by business activity.

Activity	Scope 2, location-based (metric tons CO2e)	Scope 2, market-based (metric tons CO2e)
Data Center	112157.84	29836.35
Office	10972.59	8641.41

C7.7

(C7.7) Is your organization able to break down your emissions data for any of the subsidiaries included in your CDP response?

Not relevant as we do not have any subsidiaries

C7.9

(C7.9) How do your gross global emissions (Scope 1 and 2 combined) for the reporting year compare to those of the previous reporting year?

Decreased

C7.9a

(C7.9a) Identify the reasons for any change in your gross global emissions (Scope 1 and 2 combined), and for each of them specify how your emissions compare to the previous year.

	Change in emissions (metric tons CO2e)	Direction of change in emissions	Emissions value (percentage)	Please explain calculation
Change in renewable energy consumption	0	No change	0	eBay's MWh of renewable energy remained consistent between 2021 and 2022 (91% of electric power MWh in both years). Therefore, the change in emissions was negligible and caused no change in emissions between years.
Other emissions reduction activities	2954	Decreased	6.3	There was a 6.3% decrease in emissions due to increases other emissions reduction activities. The emission calculation is 2,954 metric tons / 46,673 metric tons (2021 total Scope 1 and Scope 2 emissions) = 6.3%
Divestment	0	No change	0	Divestments were not applicable during 2022.
Acquisitions	91.73	Increased	0.21	In 2022, the TCG acquisition resulted in a 0.21% increase in emissions. The emissions calculation is 91.73 metric tons / 46,673 metric tons (2021 total Scope 1 and 2 emissions) = 0.21%.
Mergers	0	No change	0	In 2022, no mergers affected emissions performance, and therefore did not impact emissions performance.
Change in output	0	No change	0	In 2022, change in output did not affect emissions performance.
Change in methodology	1376.05	Decreased	2.95	Electric Power emissions intensity for specific suppliers decreased slightly at a few campus locations 2021 and 2022.
Change in boundary	0	No change	0	Electric Power emissions intensity for specific suppliers decreased slightly at a few campus locations 2021 and 2022, which impacted performance by -2.95%. The emissions calculation is 1,376.05 metric tons / 46,673 metric tons (2021 total Scope 1 and 2 emissions) = 2.95%.
Change in physical operating conditions	446.03	Decreased	0.96	Net opening and closures resulted in a 0.96% decrease in emissions. The emissions calculation is 446.03 metric tons / 46,673 metric tons (2021 total Scope 1 and 2 emissions) = 0.96%.
Unidentified	1622.38	Increased	3.48	Unidentified changes to consumption resulted in a 3.48% increase in emissions. The emissions calculation is 1,622.38 metric tons / 46,673 metric tons (2021 total Scope 1 and 2 emissions) = 3.48%.
Other	0	No change	0	In 2022, no other drivers affected emissions performance.

C7.9b

(C7.9b) Are your emissions performance calculations in C7.9 and C7.9a based on a location-based Scope 2 emissions figure or a market-based Scope 2 emissions figure?

Market-based

C8. Energy

C8.1

(C8.1) What percentage of your total operational spend in the reporting year was on energy?

More than 0% but less than or equal to 5%

C8.2

(C8.2) Select which energy-related activities your organization has undertaken.

	Indicate whether your organization undertook this energy-related activity in the reporting year
Consumption of fuel (excluding feedstocks)	Yes
Consumption of purchased or acquired electricity	Yes
Consumption of purchased or acquired heat	No
Consumption of purchased or acquired steam	No
Consumption of purchased or acquired cooling	No
Generation of electricity, heat, steam, or cooling	No

C8.2a

(C8.2a) Report your organization's energy consumption totals (excluding feedstocks) in MWh.

	Heating value	MWh from renewable sources	MWh from non-renewable sources	Total (renewable and non-renewable) MWh
Consumption of fuel (excluding feedstock)	HHV (higher heating value)	82.93	23796.55	23879.47
Consumption of purchased or acquired electricity	<Not Applicable>	352435.54	33887.25	386322.79
Consumption of purchased or acquired heat	<Not Applicable>	<Not Applicable>	<Not Applicable>	<Not Applicable>
Consumption of purchased or acquired steam	<Not Applicable>	<Not Applicable>	<Not Applicable>	<Not Applicable>
Consumption of purchased or acquired cooling	<Not Applicable>	<Not Applicable>	<Not Applicable>	<Not Applicable>
Consumption of self-generated non-fuel renewable energy	<Not Applicable>	<Not Applicable>	<Not Applicable>	<Not Applicable>
Total energy consumption	<Not Applicable>	352518.47	57683.8	410202.26

C8.2b

(C8.2b) Select the applications of your organization's consumption of fuel.

	Indicate whether your organization undertakes this fuel application
Consumption of fuel for the generation of electricity	No
Consumption of fuel for the generation of heat	No
Consumption of fuel for the generation of steam	No
Consumption of fuel for the generation of cooling	No
Consumption of fuel for co-generation or tri-generation	No

C8.2c

(C8.2c) State how much fuel in MWh your organization has consumed (excluding feedstocks) by fuel type.

C8.2g

(C8.2g) Provide a breakdown by country/area of your non-fuel energy consumption in the reporting year.

Country/area

Australia

Consumption of purchased electricity (MWh)

1019.4

Consumption of self-generated electricity (MWh)

0

Is this electricity consumption excluded from your RE100 commitment?

No

Consumption of purchased heat, steam, and cooling (MWh)

0

Consumption of self-generated heat, steam, and cooling (MWh)

0

Total non-fuel energy consumption (MWh) [Auto-calculated]

1019.4

Country/area

Belgium

Consumption of purchased electricity (MWh)

20.5

Consumption of self-generated electricity (MWh)

0

Is this electricity consumption excluded from your RE100 commitment?

No

Consumption of purchased heat, steam, and cooling (MWh)

0

Consumption of self-generated heat, steam, and cooling (MWh)

0

Total non-fuel energy consumption (MWh) [Auto-calculated]

20.5

Country/area

Canada

Consumption of purchased electricity (MWh)

206.38

Consumption of self-generated electricity (MWh)

0

Is this electricity consumption excluded from your RE100 commitment?

No

Consumption of purchased heat, steam, and cooling (MWh)

0

Consumption of self-generated heat, steam, and cooling (MWh)

0

Total non-fuel energy consumption (MWh) [Auto-calculated]

206.38

Country/area

China

Consumption of purchased electricity (MWh)

2002.18

Consumption of self-generated electricity (MWh)

0

Is this electricity consumption excluded from your RE100 commitment?

No

Consumption of purchased heat, steam, and cooling (MWh)

0

Consumption of self-generated heat, steam, and cooling (MWh)

0

Total non-fuel energy consumption (MWh) [Auto-calculated]

2002.18

Country/area

Czechia

Consumption of purchased electricity (MWh)

80.12

Consumption of self-generated electricity (MWh)

0

Is this electricity consumption excluded from your RE100 commitment?

No

Consumption of purchased heat, steam, and cooling (MWh)

0

Consumption of self-generated heat, steam, and cooling (MWh)

0

Total non-fuel energy consumption (MWh) [Auto-calculated]

C8.2h

(C8.2h) Provide details of your organization's renewable electricity purchases in the reporting year by country/area.

Country/area of consumption of purchased renewable electricity

Australia

Sourcing method

Unbundled procurement of Energy Attribute Certificates (EACs)

Renewable electricity technology type

Renewable electricity mix, please specify (Unspecified)

Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

156.34

Tracking instrument used

Australian LGC

Country/area of origin (generation) of purchased renewable electricity

Australia

Are you able to report the commissioning or re-powering year of the energy generation facility?

Yes

Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

2022

Vintage of the renewable energy/attribute (i.e. year of generation)

2022

Supply arrangement start year

2022

Additional, voluntary label associated with purchased renewable electricity

Other, please specify (ISO 14064-3: 2019 Limited Assurance of Equinix's energy consumption, renewable energy consumption, and Scope 1, 2, and 3 greenhouse gas emissions.)

Comment

Grid renewables backed by LGCs

Country/area of consumption of purchased renewable electricity

China

Sourcing method

Unbundled procurement of Energy Attribute Certificates (EACs)

Renewable electricity technology type

Renewable electricity mix, please specify (Solar, Wind)

Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

137.97

Tracking instrument used

I-REC

Country/area of origin (generation) of purchased renewable electricity

China

Are you able to report the commissioning or re-powering year of the energy generation facility?

Yes

Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

2021

Vintage of the renewable energy/attribute (i.e. year of generation)

2022

Supply arrangement start year

2021

Additional, voluntary label associated with purchased renewable electricity

Other, please specify (ISO 14064-3: 2019 Limited Assurance Equinix's energy consumption, renewable energy consumption, and Scope 1, 2, and 3 greenhouse gas emissions.)

Comment

China uses a mix of solar and wind renewables. Equinix obtains ISO 14064-3: Limited Assurance of Equinix's energy consumption, renewable energy consumption, and Scope 1, 2, and 3 greenhouse gas emissions. The GPRs follow the same reporting principles and emissions factor data sets.

Country/area of consumption of purchased renewable electricity

Germany

Sourcing method

Retail supply contract with an electricity supplier (retail green electricity)

Renewable electricity technology type

Hydropower (capacity unknown)

Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

1801.88

Tracking instrument used

Contract

Country/area of origin (generation) of purchased renewable electricity

Germany

Are you able to report the commissioning or re-powering year of the energy generation facility?

Yes

Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

2021

Vintage of the renewable energy/attribute (i.e. year of generation)

2022

Supply arrangement start year

2021

Additional, voluntary label associated with purchased renewable electricity

Other, please specify (Certificate of renewable energy provided by service provider, E.on.)

Comment

Certificate of renewable energy provided by service provider, E.on.

Country/area of consumption of purchased renewable electricity

Hong Kong SAR, China

Sourcing method

Unbundled procurement of Energy Attribute Certificates (EACs)

Renewable electricity technology type

Renewable electricity mix, please specify (Solar, wind)

Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

63.07

Tracking instrument used

I-REC

Country/area of origin (generation) of purchased renewable electricity

China

Are you able to report the commissioning or re-powering year of the energy generation facility?

Yes

Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

2021

Vintage of the renewable energy/attribute (i.e. year of generation)

2022

Supply arrangement start year

2021

Additional, voluntary label associated with purchased renewable electricity

Other, please specify (ISO 14064-3: 2019 Limited Assurance of Equinix's energy consumption, renewable energy consumption, and Scope 1, 2, and 3 greenhouse gas emissions)

Comment

Uses a mix of solar and wind renewables. Equinix obtains ISO 14064-3: Limited Assurance of Equinix's energy consumption, renewable energy consumption, and Scope 1, 2, and 3 greenhouse gas emissions. The GPRs follow the same reporting principles and emissions factor data sets.

Country/area of consumption of purchased renewable electricity

Ireland

Sourcing method

Retail supply contract with an electricity supplier (retail green electricity)

Renewable electricity technology type

Wind

Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

952.64

Tracking instrument used

Contract

Country/area of origin (generation) of purchased renewable electricity

Ireland

Are you able to report the commissioning or re-powering year of the energy generation facility?

Yes

Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

2021

Vintage of the renewable energy/attribute (i.e. year of generation)

2022

Supply arrangement start year

2021

Additional, voluntary label associated with purchased renewable electricity

Other, please specify (Certificate of renewable energy mix provided by service provider, Bord Gas.)

Comment

Certificate of renewable energy mix provided by service provider, Bord Gas.

Country/area of consumption of purchased renewable electricity

Italy

Sourcing method

Unbundled procurement of Energy Attribute Certificates (EACs)

Renewable electricity technology type

Hydropower (capacity unknown)

Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

80.9

Tracking instrument used

Contract

Country/area of origin (generation) of purchased renewable electricity

Italy

Are you able to report the commissioning or re-powering year of the energy generation facility?

Yes

Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

2021

Vintage of the renewable energy/attribute (i.e. year of generation)

2022

Supply arrangement start year

2021

Additional, voluntary label associated with purchased renewable electricity

Other, please specify (Energia A2A Rinnovabile 100% during reporting period)

Comment

Energia A2A Rinnovabile 100% during reporting period

Country/area of consumption of purchased renewable electricity

Japan

Sourcing method

Unbundled procurement of Energy Attribute Certificates (EACs)

Renewable electricity technology type

Renewable electricity mix, please specify (Solar, wind)

Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

79.55

Tracking instrument used

I-REC

Country/area of origin (generation) of purchased renewable electricity

Japan

Are you able to report the commissioning or re-powering year of the energy generation facility?

Yes

Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

2021

Vintage of the renewable energy/attribute (i.e. year of generation)

2022

Supply arrangement start year

2021

Additional, voluntary label associated with purchased renewable electricity

Other, please specify (ISO 14064-3: 2019 Limited Assurance of Equinix's energy consumption, renewable energy consumption, and Scope 1, 2, and 3 greenhouse gas emissions)

Comment

Japanese non-fossil certificates from wind/solar (20%) and I-RECs from China small hydro/wind/solar (80%). Equinix obtains ISO 14064-3: Limited Assurance of Equinix's energy consumption, renewable energy consumption, and Scope 1, 2, and 3 greenhouse gas emissions. The GPRs follow the same reporting principles and emissions factor data sets.

Country/area of consumption of purchased renewable electricity

Japan

Sourcing method

Unbundled procurement of Energy Attribute Certificates (EACs)

Renewable electricity technology type

Solar

Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

120.35

Tracking instrument used

I-REC

Country/area of origin (generation) of purchased renewable electricity

Japan

Are you able to report the commissioning or re-powering year of the energy generation facility?

Yes

Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

2021

Vintage of the renewable energy/attribute (i.e. year of generation)

2022

Supply arrangement start year

2021

Additional, voluntary label associated with purchased renewable electricity

Other, please specify (ISO 14064-3: 2019 Limited Assurance of Equinix's energy consumption, renewable energy consumption, and Scope 1, 2, and 3 greenhouse gas emissions)

Comment

Japanese non-fossil certificates from wind/solar (20%) and I-RECs from China small hydro/wind/solar (80%). Equinix obtains ISO 14064-3: Limited Assurance of Equinix's energy consumption, renewable energy consumption, and Scope 1, 2, and 3 greenhouse gas emissions. The GPRs follow the same reporting principles and emissions factor data sets.

Country/area of consumption of purchased renewable electricity

Luxembourg

Sourcing method

Retail supply contract with an electricity supplier (retail green electricity)

Renewable electricity technology type

Renewable electricity mix, please specify (Hydropower, Biomass, Wind, Solar)

Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

53.57

Tracking instrument used

Contract

Country/area of origin (generation) of purchased renewable electricity

Luxembourg

Are you able to report the commissioning or re-powering year of the energy generation facility?

Yes

Commissioning year of the energy generation facility (e.g. date of first commercial operation or re-powering)

2021

Vintage of the renewable energy/attribute (i.e. year of generation)

2022

Supply arrangement start year

2021

Additional, voluntary label associated with purchased renewable electricity

Other, please specify (TUV certificate)

Comment

TUV certificate. Hydropower 73.19%; biomass 24.19%; wind 2.07%, photovoltaic 0.54%

Country/area of consumption of purchased renewable electricity

Netherlands

Sourcing method

Unbundled procurement of Energy Attribute Certificates (EACs)

Renewable electricity technology type

Large hydropower (>25 MW)

Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

496.42

Tracking instrument used

GO

Country/area of origin (generation) of purchased renewable electricity

Netherlands

Are you able to report the commissioning or re-powering year of the energy generation facility?

Yes

Commissioning year of the energy generation facility (e.g. date of first commercial operation or re-powering)

2021

Vintage of the renewable energy/attribute (i.e. year of generation)

2021

Supply arrangement start year

2021

Additional, voluntary label associated with purchased renewable electricity

Other, please specify (ISO 14064-3: 2019 Limited Assurance of Equinix's energy consumption, renewable energy consumption, and Scope 1, 2, and 3 greenhouse gas emissions)

Comment

Equinix obtains ISO 14064-3: Limited Assurance of Equinix's energy consumption, renewable energy consumption, and Scope 1, 2, and 3 greenhouse gas emissions. The GPRs follow the same reporting principles and emissions factor data sets.

Country/area of consumption of purchased renewable electricity

Singapore

Sourcing method

Unbundled procurement of Energy Attribute Certificates (EACs)

Renewable electricity technology type

Small hydropower (<25 MW)

Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

284.32

Tracking instrument used

I-REC

Country/area of origin (generation) of purchased renewable electricity

Singapore

Are you able to report the commissioning or re-powering year of the energy generation facility?

Yes

Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

2021

Vintage of the renewable energy/attribute (i.e. year of generation)

2022

Supply arrangement start year

2021

Additional, voluntary label associated with purchased renewable electricity

Other, please specify (ISO 14064-3: 2019 Limited Assurance of Equinix's energy consumption, renewable energy consumption, and Scope 1, 2, and 3 greenhouse gas emissions)

Comment

Equinix obtains ISO 14064-3: Limited Assurance of Equinix's energy consumption, renewable energy consumption, and Scope 1, 2, and 3 greenhouse gas emissions. The GPRs follow the same reporting principles and emissions factor data sets.

Country/area of consumption of purchased renewable electricity

Switzerland

Sourcing method

Retail supply contract with an electricity supplier (retail green electricity)

Renewable electricity technology type

Hydropower (capacity unknown)

Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

129.2

Tracking instrument used

Contract

Country/area of origin (generation) of purchased renewable electricity

Switzerland

Are you able to report the commissioning or re-powering year of the energy generation facility?

Yes

Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

2021

Vintage of the renewable energy/attribute (i.e. year of generation)

2022

Supply arrangement start year

2021

Additional, voluntary label associated with purchased renewable electricity

Other, please specify (EWB)

Comment

Certificate of renewable energy provided by service provider, EWB.

Country/area of consumption of purchased renewable electricity

United Kingdom of Great Britain and Northern Ireland

Sourcing method

Retail supply contract with an electricity supplier (retail green electricity)

Renewable electricity technology type

Sustainable Biomass

Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

544.37

Tracking instrument used

Contract

Country/area of origin (generation) of purchased renewable electricity

United Kingdom of Great Britain and Northern Ireland

Are you able to report the commissioning or re-powering year of the energy generation facility?

Yes

Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

2021

Vintage of the renewable energy/attribute (i.e. year of generation)

2022

Supply arrangement start year

2021

Additional, voluntary label associated with purchased renewable electricity

Other, please specify (Haven Power)

Comment

Haven Power provides sustainable biomass energy on a contractual basis.

Country/area of consumption of purchased renewable electricity

United Kingdom of Great Britain and Northern Ireland

Sourcing method

Unbundled procurement of Energy Attribute Certificates (EACs)

Renewable electricity technology type

Sustainable Biomass

Renewable electricity consumed via selected sourcing method in the reporting year (MWh)

221.65

Tracking instrument used

REGO

Country/area of origin (generation) of purchased renewable electricity

United Kingdom of Great Britain and Northern Ireland

Are you able to report the commissioning or re-powering year of the energy generation facility?

Yes

Commissioning year of the energy generation facility (e.g. date of first commercial operation or repowering)

2021

Vintage of the renewable energy/attribute (i.e. year of generation)

2022

Supply arrangement start year

2021

Additional, voluntary label associated with purchased renewable electricity

Other, please specify (ISO 14064-3: 2019 Limited Assurance of Equinix's energy consumption, renewable energy consumption, and Scope 1, 2, and 3 greenhouse gas emissions)

Comment

Equinix obtains ISO 14064-3: Limited Assurance of Equinix's energy consumption, renewable energy consumption, and Scope 1, 2, and 3 greenhouse gas emissions. The GPRs follow the same reporting principles and emissions factor data sets.

Comment

Equinix obtains ISO 14064-3: Limited Assurance of Equinix's energy consumption, renewable energy consumption, and Scope 1, 2, and 3 greenhouse gas emissions. The GPRs follow the same reporting principles and emissions factor data sets.

C8.2j

(C8.2j) Provide details of your organization's renewable electricity generation by country/area in the reporting year.

C8.2k

(C8.2k) Describe how your organization's renewable electricity sourcing strategy directly or indirectly contributes to bringing new capacity into the grid in the countries/areas in which you operate.

eBay continues to invest in renewable energy projects, prioritizing virtual purchase power agreements (VPPAs), which ensure that more green electricity is fed into our electricity grids. So far, we've entered into VPPAs for a solar project in Louisiana and a wind project in Texas while we continue to look for additional opportunities globally. These VPPAs directly contribute to bringing clean renewable energy onto the grid within the U.S.

In our San Jose headquarters, our largest office, we use 100% renewable energy, provided by San Jose Clean Energy. This office now uses exclusively wind, solar and geothermal power. We also use 100% renewable energy at eight additional eBay offices. In 2022, we completed an assessment of renewable energy options at international offices and will prioritize local green programs as feasible.

eBay consistently searches for opportunities for local, renewable energy solutions to power our offices and data centers. This includes facilities in Europe, where some of our offices in Germany, Ireland and the UK are sourcing 100% of their electricity from green power sources as well.

C8.2l

(C8.2) In the reporting year, has your organization faced any challenges to sourcing renewable electricity?

	Challenges to sourcing renewable electricity	Challenges faced by your organization which were not country/area-specific
Row 1	No	<Not Applicable>

C9. Additional metrics

C9.1

(C9.1) Provide any additional climate-related metrics relevant to your business.

Description

Energy usage

Metric value

410202

Metric numerator

MWh

Metric denominator (intensity metric only)

Not applicable

% change from previous year

1.87

Direction of change

Increased

Please explain

In 2022, eBay's energy consumption increased by 1.87% compared to 2021.

In 2022, electricity use increased at our data centers as our marketplace business grew, though this was in part offset by energy efficiency initiatives across our properties. In addition, our intensity factor (energy use per million dollars of revenue) has decreased year-over-year since 2019. This metric describes the amount of energy used compared with the size of the company, meaning that while our overall electricity usage increased, eBay has been more efficient — something we strive to continue.

Comment

In limited instances, eBay may be subject to the EU ETS. From 1 January 2012 all flights which arrive at or depart from an aerodrome situated in the territory of a Member State to which the Treaty applies shall be included. Flights which depart from or arrive in an aerodrome situated in the territory of a Member State to which the Treaty applies.

This activity shall not include from 1 January 2013 to 31 December 2022, flights which, but for this point, would fall within this activity, performed by a noncommercial aircraft operator operating flights with total annual emissions lower than 1,000 tonnes per year and fewer than 243 flights per period for three consecutive four month periods. In 2022, eBay's total Annex 1 flight segments totaled 5 flights and total emissions totaled 164 metric tons CO2e. For this reason, eBay received a certification of exemption from the verification of an annual emissions report and the surrender of carbon offsets for all Annex 1 activities.

Comment

A UK Emissions Trading Scheme (UK ETS) replaced the UK's participation in the EU ETS on 1 January 2021. The UK ETS is established through The Greenhouse Gas Emissions Trading Scheme Order 2020. UK ETS encompasses the UK, Scottish and Welsh Governments and Northern Ireland Department of Agriculture, Environment and Rural Affairs. A non-commercial aircraft operator operating full-scope flight operations with total annual emissions of less than 1,000 tonnes of carbon dioxide in a given calendar year shall be exempt from UK ETS emissions offsetting.

C11.1d

(C11.1d) What is your strategy for complying with the systems you are regulated by or anticipate being regulated by?

eBay's total annual non-commercial aircraft emissions will be lower than 1,000 tonnes per year and fewer than 243 flights per period for three consecutive four-month periods in future years. Therefore, eBay will continue to receive a certification of exemption from the verification of an annual emissions report and the surrender of carbon offsets for all Annex 1 activities. In order to achieve the low emissions trajectory for aircraft and comply with the regulatory systems, eBay's strategy will continue to employ a senior management review system (including input from our aviation director and our Executive Leadership Team) to ensure that approved corporate jet travel is business critical. To also comply with the EU ETS, eBay's strategy includes purchasing Sustainable Aviation Fuels (SAF), which will also minimize our footprint.

In addition, eBay is active in several sustainable aviation and transportation working groups and coalitions aimed at tackling our own emissions, as well as the emissions of aviation as a whole. This part of our strategy will also help the company comply if there are any future systems that may affect the company.

C11.2

(C11.2) Has your organization canceled any project-based carbon credits within the reporting year?

No

C11.3

(C11.3) Does your organization use an internal price on carbon?

No, but we anticipate doing so in the next two years

C12. Engagement

C12.1

(C12.1) Do you engage with your value chain on climate-related issues?

Yes, our suppliers

Yes, other partners in the value chain

C12.1a

(C12.1a) Provide details of your climate-related supplier engagement strategy.

Type of engagement

Innovation & collaboration (changing markets)

Details of engagement

Run a campaign to encourage innovation to reduce climate impacts on products and services

% of suppliers by number

1

% total procurement spend (direct and indirect)

5

% of supplier-related Scope 3 emissions as reported in C6.5

0

Rationale for the coverage of your engagement

Reported percentages are based on the suppliers for the data center colocation providers where our servers reside.

These suppliers have been prioritized because they are most relevant to managing our Scope 2 emissions at our data centers in the southwest region of the U.S.

We engage with these suppliers in the southwest region of the U.S to support our company's renewable energy target, in which we aim to source 100% of our electricity supply from renewable energy sources by 2025 for eBay-controlled data centers and offices, and to source renewable energy.

These suppliers are also critical in supporting our company's overall Business Continuity Plans.

Impact of engagement, including measures of success

eBay has engaged with its colocation service providers by becoming a founding member of the Future of Internet Power working group, which has the goal of powering the internet with 100% renewable energy. This group created, and eBay signed, the Corporate Co-Location and Cloud Buyers' Principles. These principles outline six criteria that companies using Colo services would like to see their service providers meet. This included providing data on customer energy consumption, disclosing facility energy sources, and supporting renewable energy advocacy efforts.

Impact of Engagement and Measures of success include the following: One of our largest providers converted all of its locations in Nevada to renewable power, resulting in a nearly 50% reduction in our data center-related GHG emissions towards our goal of 100% renewable energy by 2025

While not a direct result of eBay's Colo and Cloud Buyer's Principles participation, we purposefully engaged with CEBA and Future of Internet Power buyer members to encourage COLO providers to offer renewable energy at their facilities. Due to our 100% renewable energy goal, having one of our primary COLO providers convert to 100% renewables at eBay sites was critical to our path and a measure of our successful engagement. Another primary provider, Equinix, is responsible for covering many of our global COLOs, and also provides a significant amount of energy coverage. We continue to monitor the contribution of these footprints to our overall renewable strategy on an annual basis. Moving load from or to these facilities has a direct impact on our overall achievement of RE100 and necessitates determining if additional and new approaches will be needed. The participation in renewable energy from one of our primary COLO providers factored into our overall success, where our threshold for these facilities is to around 60% of our total renewable energy footprint.

Comment

Please note that eBay has a relatively minimal supply chain because we do not hold inventory or sell manufactured products.

eBay's supply chain consists primarily of information technology, professional services and office supplies to support our digital platforms.

C12.1d

(C12.1d) Give details of your climate-related engagement strategy with other partners in the value chain.

EXPLANATION OF OTHER PARTNERS IN OUR VALUE CHAIN:

eBay continues to encourage adoption of low-carbon and electric transportation with our primary logistics partners, including USPS, UPS, and FedEx (which are not considered our direct suppliers in this context, but partners within our value chain). We also continue to provide guidance to protect sellers that could be impacted from hurricanes and wildfires, and clearly communicate eBay's expectations of sellers and their delivery of goods.

DESCRIPTION OF CLIMATE-RELATED ENGAGEMENT STRATEGY WITH OTHER PARTNERS IN OUR VALUE CHAIN:

Because much of online shopping is based on consumer convenience, we encourage our sellers to offer low-cost or free and fast shipping. By working with logistics partners, we can help to alleviate potential cost increases for shipping by emphasizing the importance of low-carbon transport options when traditional fuel prices continue to rise. This will in turn help us to retain and expand our customer base. For example, throughout 2022, we partnered to encourage the U.S. Postal Service to adopt more innovative and sustainable shipping practices for small businesses who rely on USPS to reach their customers. Our efforts culminated in a letter, published in February 2023, congratulating USPS for their commitment to exclusively purchase electric delivery vehicles by 2026. This shift will help not just the environment, but also our customers by enabling lower costs and other benefits offered by an all-electric delivery fleet.

eBay has also evaluated climate-related logistics and transportation parameters across our four geographies of operations: (1) North America, (2) Asia Pacific, (3) Latin America, and (4) Europe, Middle East and Africa, as well as in terms of their impacts on our marketplaces. We are currently exploring a pilot program for low carbon last mile delivery that will involve our value chain carrier partners.

C12.2

(C12.2) Do your suppliers have to meet climate-related requirements as part of your organization's purchasing process?

Yes, climate-related requirements are included in our supplier contracts

C12.2a

(C12.2a) Provide details of the climate-related requirements that suppliers have to meet as part of your organization's purchasing process and the compliance mechanisms in place.

Climate-related requirement

Purchasing renewable energy

Description of this climate related requirement

In support of eBay's goal to source 100% of our electricity supply from renewable energy sources by 2025 for eBay-controlled data centers and offices, eBay has climate-related requirements to source renewable energy in the supplier contracts for these facilities.

% suppliers by procurement spend that have to comply with this climate-related requirement

Response to supplier non-compliance with this climate-related requirement

Retain and engage

C12.3

(C12.3) Does your organization engage in activities that could either directly or indirectly influence policy, law, or regulation that may impact the climate?

Row 1

External engagement activities that could directly or indirectly influence policy, law, or regulation that may impact the climate

Yes, we engage directly with policy makers

Yes, our membership of/engagement with trade associations could influence policy, law, or regulation that may impact the climate

Does your organization have a public commitment or position statement to conduct your engagement activities in line with the goals of the Paris Agreement?

Yes

Attach commitment or position statement(s)

<https://www.ebaymainstreet.com/>

Describe the process(es) your organization has in place to ensure that your external engagement activities are consistent with your climate commitments and/or climate transition plan

To ensure a coordinated approach to and positions on climate change and energy policy activities, regular meetings are held regularly between the Impact and Government Relations teams, along with other internal stakeholders from Global Communications, Finance, and Operations. Agendas for these meetings include business impacts, pending policy initiatives and discussion of how these do or do not align with our corporate climate and energy strategy, as well as identify any opportunities/requests to engage with external stakeholders on these activities. Per these discussions we have chosen to support We Mean Business, TCFD reporting and joined in the LEAD on Climate activities – consistent with our commitment to support climate action.

Primary reason for not engaging in activities that could directly or indirectly influence policy, law, or regulation that may impact the climate

<Not Applicable>

Explain why your organization does not engage in activities that could directly or indirectly influence policy, law, or regulation that may impact the climate

<Not Applicable>

C12.3a

(C12.3a) On what policy, law, or regulation that may impact the climate has your organization been engaging directly with policy makers in the reporting year?

Specify the policy, law, or regulation on which your organization is engaging with policy makers

Inflation Reduction Act

Category of policy, law, or regulation that may impact the climate

Carbon pricing, taxes, and subsidies

Focus area of policy, law, or regulation that may impact the climate

Subsidies for low-carbon, non-renewable energy projects

Policy, law, or regulation geographic coverage

National

Country/area/region the policy, law, or regulation applies to

United States of America

Your organization's position on the policy, law, or regulation

Support with no exceptions

Description of engagement with policy makers

eBay was a business voice in support of the U.S. Federal Inflation Reduction Act. The Inflation Reduction Act was signed into law as not just the most ambitious piece of climate legislation in our nation's history, but also a major advancement in economic development and industrial policy. Through eBay's support, companies across the U.S. will be able to power their businesses on affordable, secure, domestic clean energy and build a more sustainable and competitive economy.

Details of exceptions (if applicable) and your organization's proposed alternative approach to the policy, law or regulation

<Not Applicable>

Have you evaluated whether your organization's engagement on this policy, law, or regulation is aligned with the goals of the Paris Agreement?

Yes, we have evaluated, and it is aligned

Please explain whether this policy, law or regulation is central to the achievement of your climate transition plan and, if so, how?

eBay is a strong supporter of climate action nationally and in our headquarters state of California. eBay is a member of Business for Innovative Climate and Energy Policy (BICEP), which is an advocacy coalition run by Ceres comprised of businesses with the overall goal of supporting, "broad, bi-partisan consensus among policymakers to reduce US greenhouse gas emissions 80% below 1990 levels by 2050, with an interim goal of at least 25% below 1990 levels by 2020." Via our role in BICEP, we regularly support state and federal legislation and global policy that reinforces BICEP's position on climate change.

This policy will support eBay's climate-related goals including our GHG reduction target and renewable energy goals. The Inflation Reduction Act, will support tax credits for utility-scale clean energy development, incentives to help companies accelerate their shift to clean vehicles and energy systems, and investments in U.S. supply chains and advanced manufacturing capabilities, which directly tie back to our climate plans.

C12.3b

(C12.3b) Provide details of the trade associations your organization is a member of, or engages with, which are likely to take a position on any policy, law or regulation that may impact the climate.

Trade association

Other, please specify (TechNet)

Is your organization's position on climate change policy consistent with theirs?

Consistent

Has your organization attempted to influence their position in the reporting year?

Yes, we publicly promoted their current position

Describe how your organization's position is consistent with or differs from the trade association's position, and any actions taken to influence their position

TechNet advocates for a robust energy policy that encourages true competition in the energy market. TechNet also supports state policies to spur deployment of clean energy resources such as fuel cells, solar, wind, demand-side, advanced clean combustion, and clean transportation, and will work diligently to advance them. TechNet also supports smart grid technologies that increase the reliability and resilience of the electric grid; enable clean technologies and electric vehicles; and help consumers reduce their electric bills. TechNet supports empowering consumers with access to their energy data and new tools to help consumers cut energy use. TechNet also supports efforts to expand or create new programs that should be inclusive, balanced, and data-driven in order to achieve stated aims and avoid significant disruption.

Funding figure your organization provided to this trade association in the reporting year (currency as selected in C0.4)

102000

Describe the aim of your organization's funding

eBay exists to empower people and create economic opportunity. We champion small business, empower charitable giving, operate as a socially and environmentally responsible business, and participate in engagement activities in line with the goals of the Paris Agreement. Through our trade association dues to TechNet, we aim to support advocacy for a robust energy policy that encourages true competition in the energy market.

Have you evaluated whether your organization's engagement with this trade association is aligned with the goals of the Paris Agreement?

Yes, we have evaluated, and it is aligned

C12.4

(C12.4) Have you published information about your organization's response to climate change and GHG emissions performance for this reporting year in places other than in your CDP response? If so, please attach the publication(s).

Comment

eBay's Environmental Policy includes details on our company's ESG commitment, including actions to manage climate-related risks.

C12.5

(C12.5) Indicate the collaborative frameworks, initiatives and/or commitments related to environmental issues for which you are a signatory/member.

	Environmental collaborative framework, initiative and/or commitment	Describe your organization's role within each framework, initiative and/or commitment
Row 1	RE100 We Are Still In Other, please specify (CEBA, BICEP, Utah Clean Energy Foundation, Ellen Macarthur Foundation, and EPA Green Power Partnership)	RE100: As a member of RE100, eBay has committed to 100% renewable energy in its electricity supply by 2025 at its data centers and offices. We Are Still In: eBay is a signatory of the We Are Still In pledge, which is a joint declaration of support for climate action. CEBA: Through CEBA, eBay aims to collaborate in order to navigate the complexities of the energy market. BICEP: Through BICEP, eBay aims to advocate for stronger climate and environmental justice policy in a just, inclusive, and competitive clean energy future. UTAH Clean Energy Foundation: eBay aims to support and accelerate clean energy transformation as a member of the Utah Clean Energy Foundation. Ellen Macarthur Foundation: As a member of the Ellen Macarthur Foundation, eBay supports a circular economy network and aims to influence the transition. EPA Green Power Partnership: Since 2020, we have been an official member of the U.S. Environmental Protection Agency's (EPA) Green Power Partnership, which encourages organizations to reduce the environmental impacts of conventional electricity by using green power.

C15. Biodiversity

C15.1

(C15.1) Is there board-level oversight and/or executive management-level responsibility for biodiversity-related issues within your organization?

	Board-level oversight and/or executive management-level responsibility for biodiversity-related issues	Description of oversight and objectives relating to biodiversity	Scope of board-level oversight
Row 1	Yes, both board-level oversight and executive management-level responsibility	The Board of Directors' Corporate Governance and Nominating Committee ("CGN") has oversight of sustainability and Environmental, Social and Governance (ESG) issues, including overseeing the company's policies and programs concerning sustainability reporting. This includes biodiversity-related information, in which we disclose information in our Impact and TCFD Reports. Guided by the eBay Impact Team, with oversight from eBay's Board of Directors and Executive Leadership Team, our approach to all ESG matters is integrated into the core of our business. eBay's Chief Sustainability Officer (CSO) leads eBay's Impact Team, which works across the company to help our business groups and functions prioritize ESG as part of the company's overall strategy, including goal setting, impact measurement, and reporting. For example, eBay provides information about biodiversity in our annual Impact Report.	<Not Applicable>

C15.2

(C15.2) Has your organization made a public commitment and/or endorsed any initiatives related to biodiversity?

	Indicate whether your organization made a public commitment or endorsed any initiatives related to biodiversity	Biodiversity-related public commitments	Initiatives endorsed
Row 1	No, and we do not plan to do so within the next 2 years	<Not Applicable>	<Not Applicable>

C15.3

(C15.3) Does your organization assess the impacts and dependencies of its value chain on biodiversity?

Impacts on biodiversity

Indicate whether your organization undertakes this type of assessment

No and we don't plan to within the next two years

Value chain stage(s) covered

<Not Applicable>

Portfolio activity

<Not Applicable>

Tools and methods to assess impacts and/or dependencies on biodiversity

<Not Applicable>

Please explain how the tools and methods are implemented and provide an indication of the associated outcome(s)

<Not Applicable>

Dependencies on biodiversity

Indicate whether your organization undertakes this type of assessment

No and we don't plan to within the next two years

Portfolio activity

<Not Applicable>

Tools and methods to assess impacts and/or dependencies on biodiversity

<Not Applicable>

Please explain how the tools and methods are implemented and provide an indication of the associated outcome(s)

<Not Applicable>

C15.4

(C15.4) Does your organization have activities located in or near to biodiversity- sensitive areas in the reporting year?

Not assessed

C15.5

(C15.5) What actions has your organization taken in the reporting year to progress your biodiversity-related commitments?

	Have you taken any actions in the reporting period to progress your biodiversity-related commitments?	Type of action taken to progress biodiversity- related commitments
Row 1	No, and we do not plan to undertake any biodiversity-related actions	<Not Applicable>

C15.6

(C15.6) Does your organization use biodiversity indicators to monitor performance across its activities?

	Does your organization use indicators to monitor biodiversity performance?	Indicators used to monitor biodiversity performance
Row 1	No	Other, please specify (Not applicable)

C15.7

(C15.7) Have you published information about your organization's response to biodiversity-related issues for this reporting year in places other than in your CDP response? If so, please attach the publication(s).

Report type	Content elements	Attach the document and indicate where in the document the relevant biodiversity information is located
In voluntary sustainability report or other voluntary communications	Impacts on biodiversity	2022 Impact Report (see Sustainable Commerce – Biodiversity Risk Assessment) https://www.ebayinc.com/impact/sustainable-commerce/

C16. Signoff

C-FI

(C-FI) Use this field to provide any additional information or context that you feel is relevant to your organization's response. Please note that this field is optional and is not scored.

C16.1

(C16.1) Provide details for the person that has signed off (approved) your CDP climate change response.

	Job title	Corresponding job category
Row 1	Chief Executive Officer	Chief Executive Officer (CEO)

SC. Supply chain module

SC0.0

(SC0.0) If you would like to do so, please provide a separate introduction to this module.

SC0.1

(SC0.1) What is your company's annual revenue for the stated reporting period?

	Annual Revenue
Row 1	9795000000

SC1.1

(SC1.1) Allocate your emissions to your customers listed below according to the goods or services you have sold them in this reporting period.
