EMSISOFT
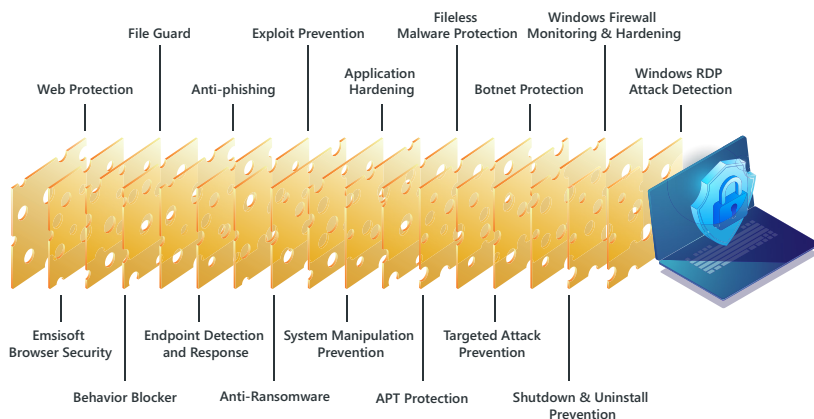

Emsisoft Anti-Malware Home

Emsisoft Anti-Malware Home offers unparalleled cybersecurity to homes and home offices, blending advanced protection capabilities with user-friendly functionality. It's a comprehensive defense system against modern malware, ransomware, phishing, and other digital threats.

Multiple Layers of Protection

Each layer works in concert to provide a comprehensive shield for your digital assets.

Web Protection · File Guard · Anti-phishing · Exploit Prevention · Application Hardening · Fileless Malware Protection · Botnet Protection · Windows Firewall Monitoring & Hardening · Windows RDP Attack Detection

Emsisoft Browser Security · Behavior Blocker · Endpoint Detection and Response · Anti-Ransomware · System Manipulation Prevention · APT Protection · Targeted Attack Prevention · Shutdown & Uninstall Prevention

Web Protection & Browser Security

Browser security is critical in the Emsisoft protection strategy. It ensures safe browsing by proactively blocking access to malicious websites. This crucial protection layer is particularly effective against credential phishing and malware. It scans and evaluates web content in real-time, offering an immediate response to emerging threats and ensuring your online activities are always secure.

Real-time File Guard

The file guard continuously scans all downloaded and modified files in real-time. This guard is particularly adept at detecting and neutralizing new and evolving threats, ensuring all your files are safe and uncompromised.

Behavior Blocker

The Behavior Blocker is an advanced tool for monitoring system processes. It identifies and alerts you to any suspicious or abnormal behavior, providing a crucial layer of defense against new and sophisticated threats that might bypass traditional detection methods.

Anti-Ransomware

Our Anti-Ransomware layer employs custom-built behavioral monitoring to preemptively stop ransomware attacks. By detecting actions like unauthorized file encryption, it intervenes before ransomware can lock down your data.

"

Great protection at a great price. Emsisoft has never let me down.

"

Joe B., Emsisoft customer

Convenient Cloud-Based Management Console

The Emsisoft Management Console provides a unified dashboard accessible via any web browser, allowing easy oversight of your home's cybersecurity. It offers a clear view of all your devices' protection status, ensuring complete control.

Real-Time Monitoring and Alerts

Stay constantly informed with the console's real-time monitoring and instant alerts on security issues, enabling you to respond quickly to potential threats whether you're at home or on the road.
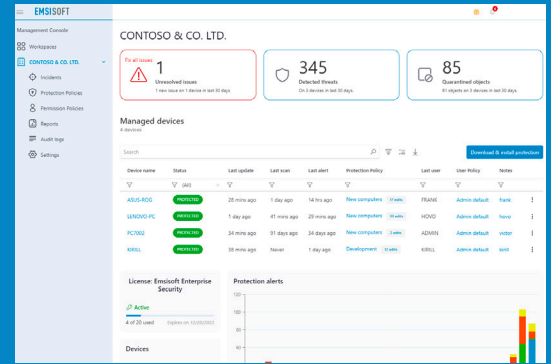

Mobile App for On-the-Go Management

Manage your home's cybersecurity effortlessly from your mobile device with our user-friendly app. This adds convenience and flexibility, allowing you to maintain security oversight wherever you are.

User-Friendly Interface for Easy Operation

The console's intuitive interface simplifies cybersecurity management, making it accessible for users of all technical levels. It's designed for easy navigation and hassle-free operation.

Seamless Integration and Updates

Regular updates to the console integrate the latest cybersecurity advancements, keeping your home defense system up-to-date. This ensures your protection is always armed with the most advanced tools against cyber threats.
