# **ANGOLA**

Region: Sub-Saharan Africa

Income Category: Lower Middle Income

Human capital – knowledge, skills, and good health – empowers people to achieve their potential and drives economic growth. This brief tracks progress by Angola in building and using human capital. The Human Capital Complementary Indicators offer a snapshot of human capital investments at four stages of the lifecycle. The figures show the latest available data, benchmarked against regional averages. The figures also report progress over the previous 5 years.

#### **EARLY CHILDHOOD**

- Neonatal mortality rate. The neonatal mortality rate is **26** per 1,000 live births (2022), compared to 29 in 2017. The indicator is higher than the regional average.
- **DTP vaccination rate, third dose.** In 2023, **54%** of infants received the third dose of the diphtheria, tetanus and pertussis vaccine, compared to 63% in 2018. The indicator is below the regional average.
- **Prevalence of anemia in children.** In 2019, **62%** of children ages 6–59 months had anemia, compared to 61% in 2015. The indicator is higher than the regional average.

## **SCHOOL AGE**

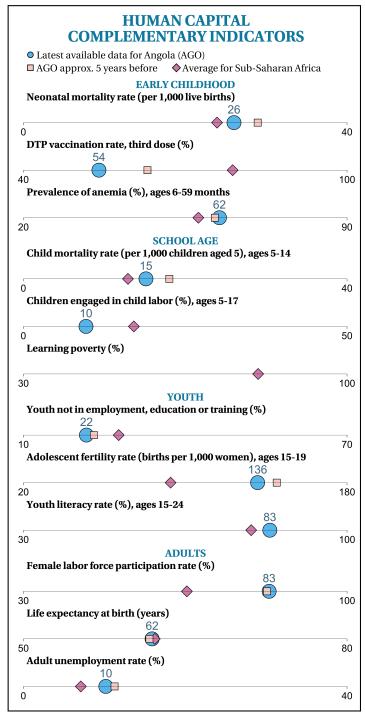

- Child mortality rate. The mortality rate for children ages 5-14 is 15 per 1,000 children aged 5 (2022), compared to 18 in 2017. The indicator is higher than the regional average.
- Children engaged in child labor. The share of children (ages 5-17) who are engaged in economic activities is 10% (2016). The indicator is below the regional average.
- Learning poverty. Internationally comparable data on this indicator is not available for Angola. The regional average for this indicator is 81%.

# **YOUTH**

- Youth not in employment, education or training. In 2021, 22% of youth (ages 15-24) were not in employment, education or training, compared to 23% in 2019. The indicator is lower than the regional average.
- Adolescent fertility rate. The number of births for every 1,000 women ages 15-19 is 136 (2022), compared to 145 in 2017. The indicator is above the regional average.
- Youth literacy rate. The share of youth (ages 15-24) who are literate is 83% (2022). The indicator is higher than the regional average.

### **ADULTS**

- Female labor force participation rate. Female labor force participation as a percentage of the female working-age population (ages 25+) is 83% (2023). This remains unchanged since 2018. The indicator is higher than the regional average.
- Life expectancy at birth. Life expectancy at birth is **62** years (2022). This remains unchanged since 2017. The indicator is similar to the regional average.
- Adult unemployment rate. Unemployed adults as a share of the adult labor force (ages 25+) is 10% (2023), compared to 11% in 2018. The indicator is higher than the regional average.

Note: Missing symbols indicate internationally comparable data are not available to generate the corresponding statistic.
