

RUSSIAN FEDERATION

Region: Europe and Central Asia
Income Category: High Income

Human capital – knowledge, skills, and good health – empowers people to achieve their potential and drives economic growth. This brief tracks progress by the Russian Federation in building and using human capital. The Human Capital Complementary Indicators offer a snapshot of human capital investments at four stages of the lifecycle. The figures show the latest available data, benchmarked against regional averages. The figures also report progress over the previous 5 years.

EARLY CHILDHOOD

- **Neonatal mortality rate.** The neonatal mortality rate is 2 per 1,000 live births (2022), compared to 3 in 2017. The indicator is lower than the regional average.
- **Participation rate in organized learning.** In 2019, 93% of children one year younger than the official primary school entry age participated in an organized learning program. This remains unchanged since 2015. The indicator is above the regional average.
- **DTP vaccination rate, third dose.** In 2023, 97% of infants received the third dose of the diphtheria, tetanus and pertussis vaccine. This remains unchanged since 2018. The indicator is higher than the regional average.

SCHOOL AGE

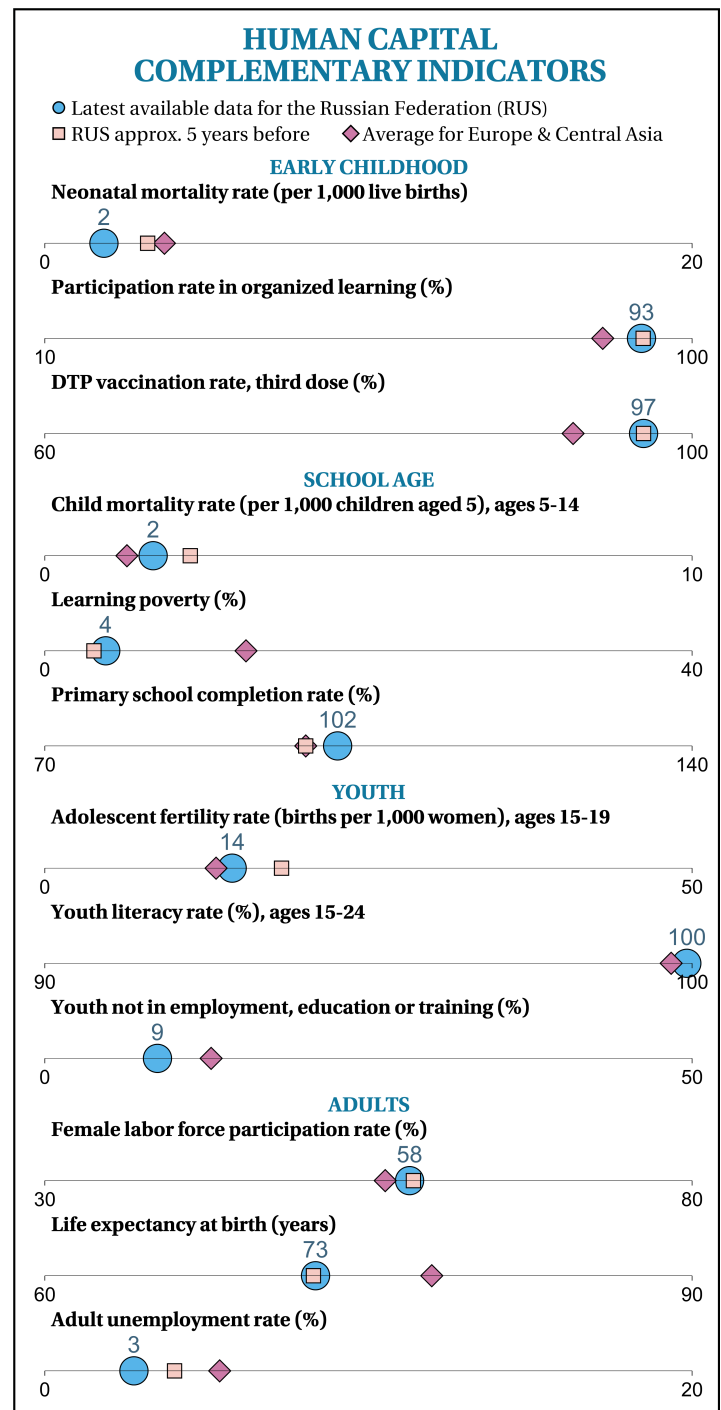

- **Child mortality rate.** The mortality rate for children ages 5-14 is 2 per 1,000 children aged 5 (2022). This remains unchanged since 2017. The indicator is higher than the regional average.
- **Learning poverty.** In 2021, 4% of children could not read and understand a simple text, by age 10, compared to 3% in 2016. The indicator is below the regional average.
- **Primary school completion rate.** The primary school completion rate is 102% (by the official entrance age of the last grade) (2019), compared to 98% in 2015. The indicator is higher than the regional average.

YOUTH

- **Adolescent fertility rate.** The number of births for every 1,000 women ages 15-19 is 14 (2022), compared to 18 in 2017. The indicator is higher than the regional average.
- **Youth literacy rate.** The share of youth (ages 15-24) who are literate is 100% (2021). The indicator is similar to the regional average.
- **Youth not in employment, education or training.** In 2023, 9% of youth (ages 15-24) were not in employment, education or training. The indicator is lower than the regional average.

ADULTS

- **Female labor force participation rate.** Female labor force participation as a percentage of the female working-age population (ages 25+) is 58% (2023). This remains unchanged since 2018. The indicator is higher than the regional average.
- **Life expectancy at birth.** Life expectancy at birth is 73 years (2022), compared to 72 in 2017. The indicator is below the regional average.
- **Adult unemployment rate.** Unemployed adults as a share of the adult labor force (ages 25+) is 3% (2023), compared to 4% in 2018. The indicator is lower than the regional average.

Note: Missing symbols indicate internationally comparable data are not available to generate the corresponding statistic.
