You are here

» **Cigarette butts** are the most common garbage found on our beaches. Please dispose of them properly because creatures often mistake them for food.

» **Lift rocks and logs carefully** and replace them gently. Small animals live underneath.

» **Watch where you step.** Explore tidepools carefully and avoid stepping on creatures. Barnacles are living creatures too.

» **Never take shells home.**

» **Keep dogs on leash** at all times.

» After your fun at the beach, **please take all garbage with you.**

Thanks for **respecting** my home!
