DIGITAL HEALTH:

Using evidence-based technologies to achieve equitable, accessible and affordable health care for all.

Bernardo MARIANO
CIO for World Health Organization

Today's
'digital health' is
tomorrow's
health care

- Universal Health Coverage
- Address some of the greatest challenges of health systems.

World Health
Organization

- Achieve the Sustainable Development Goal 3 – Health4All
- Reduce inequalities, instead of becoming another reason people are left behind.
- Ensure evidence-based technologies are scaled in the most effective and sustainable way.

- Ethics And Good Governance
- Accessibility
- Affordability

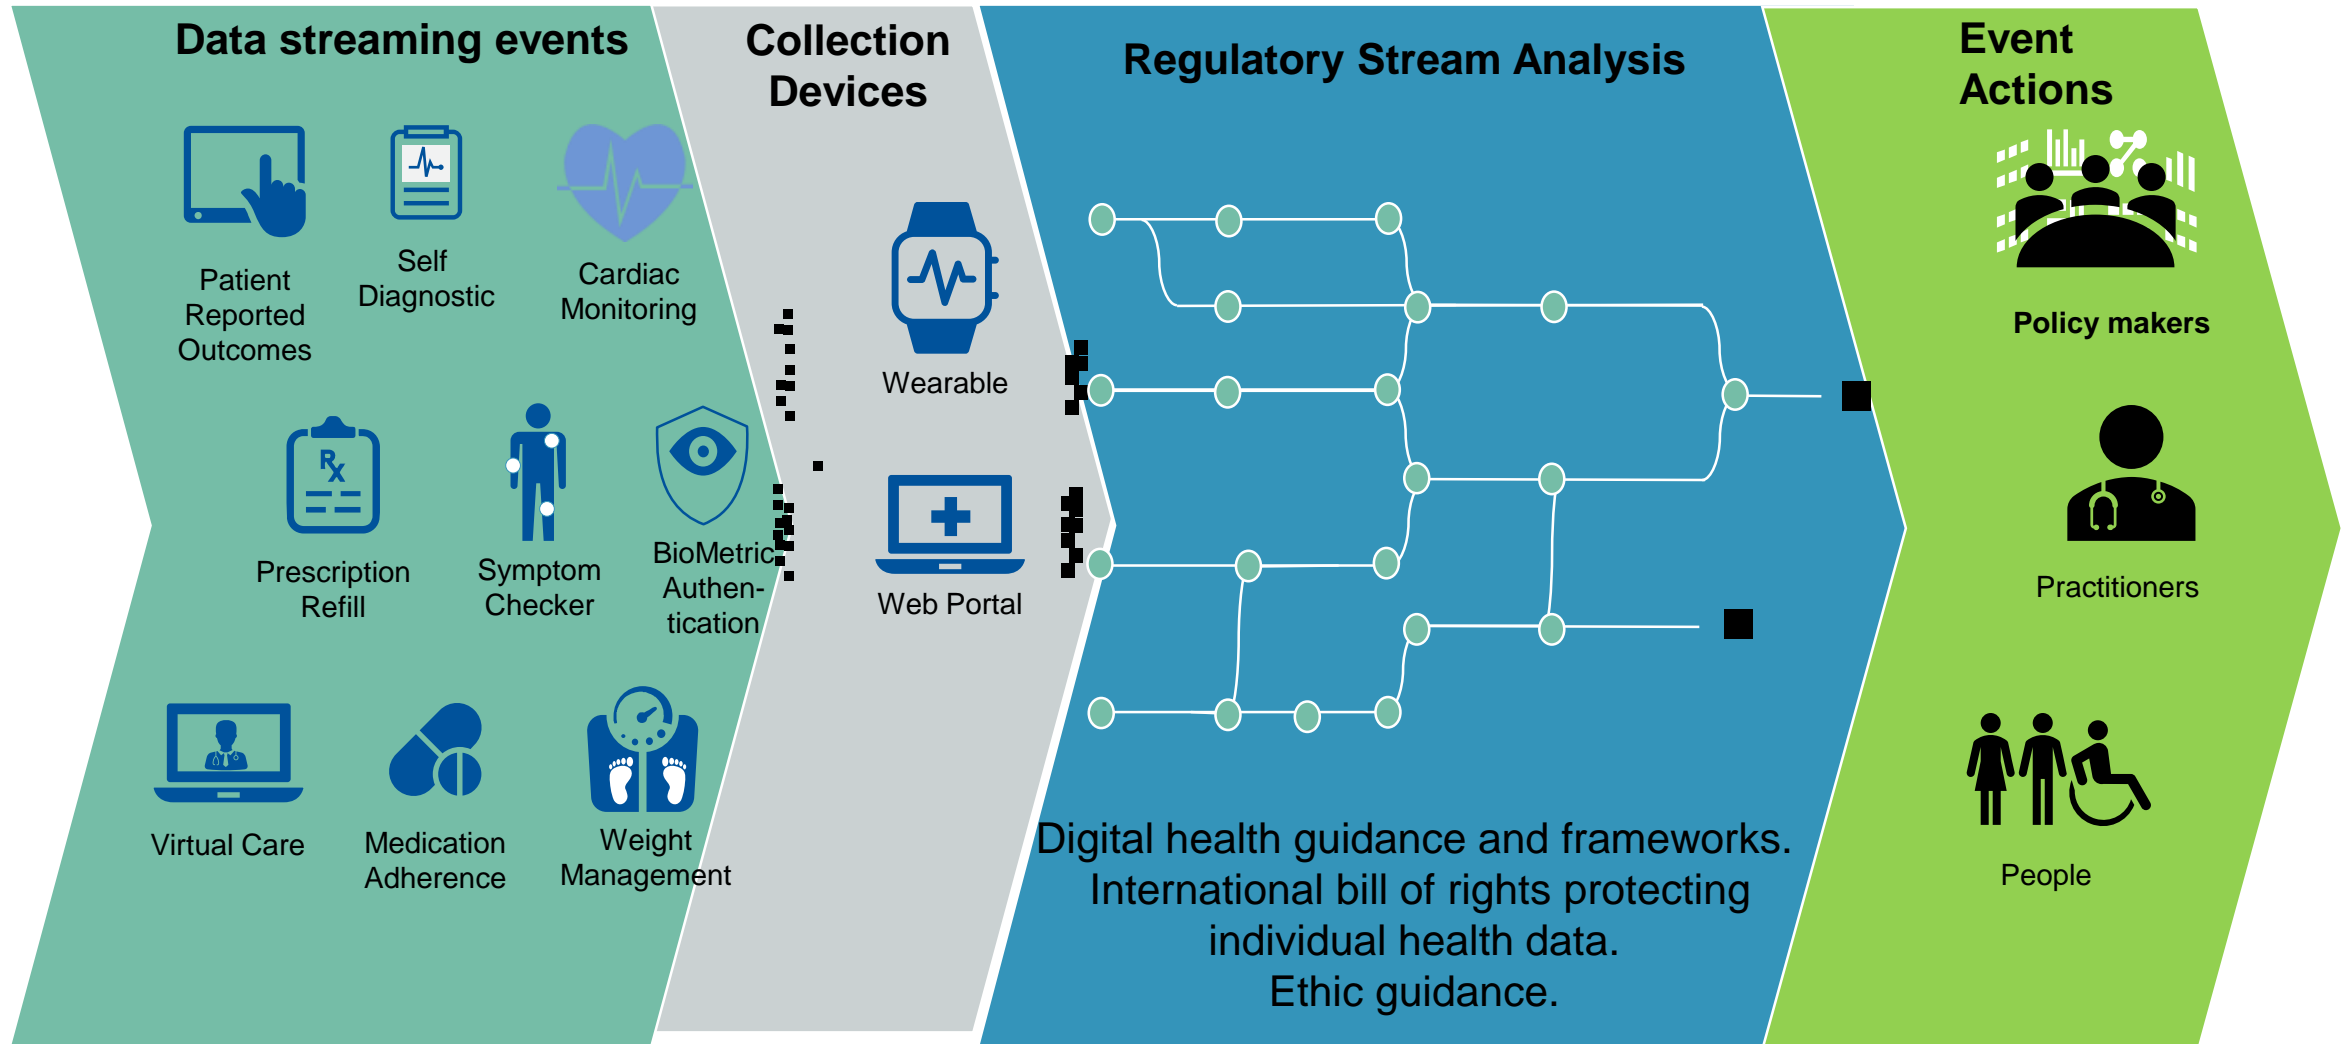

- Aligns with country needs
- People-centric
- Steer technology towards egalitarian solutions

- Policy-makers
- Practitioners
- People

Value Creation through data streaming and regulatory processes in health care

We must ensure the
Digital Health
revolution is safe,
sustainable
and leaves no one
behind.
