

The Deloitte logo is positioned in the top left corner. It features the word "Deloitte" in a bold, white, sans-serif font, followed by a small green dot. The background of the slide is a dark, futuristic tunnel with a glowing green circle at the end and vertical light beams on the walls.

**Deloitte.**

## Economic Outlook

Dr Edoardo Palombo, Economist

# Global outlook

# Global inflation and interest rates have been rising, but the worst is over

We have not seen this level of high inflation and high interest rates since the 1990s

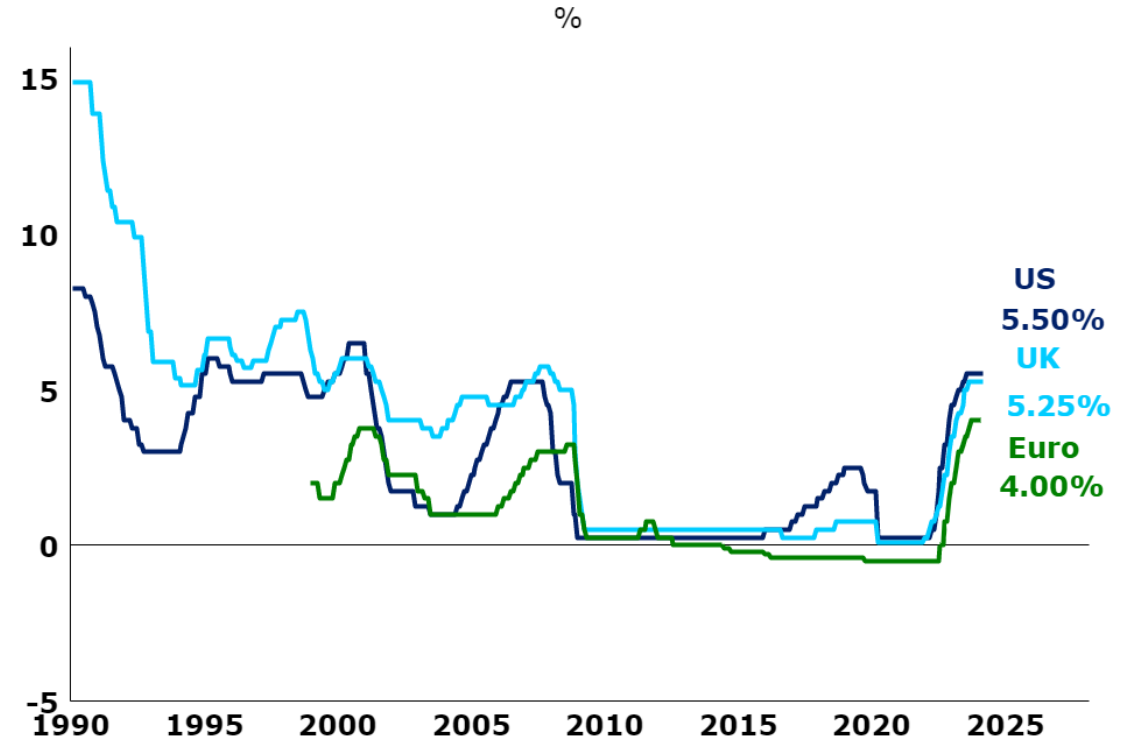

Inflation in US, UK & euro area hit multi-decade highs ...

## Consumer price inflation

... which forced central bankers' hand

## Central Bank interest rates

# Lower energy prices and smoother supply chains have brought down inflation

Despite interest rate rise, inflation has fallen due to lower energy prices and more elastic supply chains

Energy prices have come down from the post-Ukraine invasion peak ...

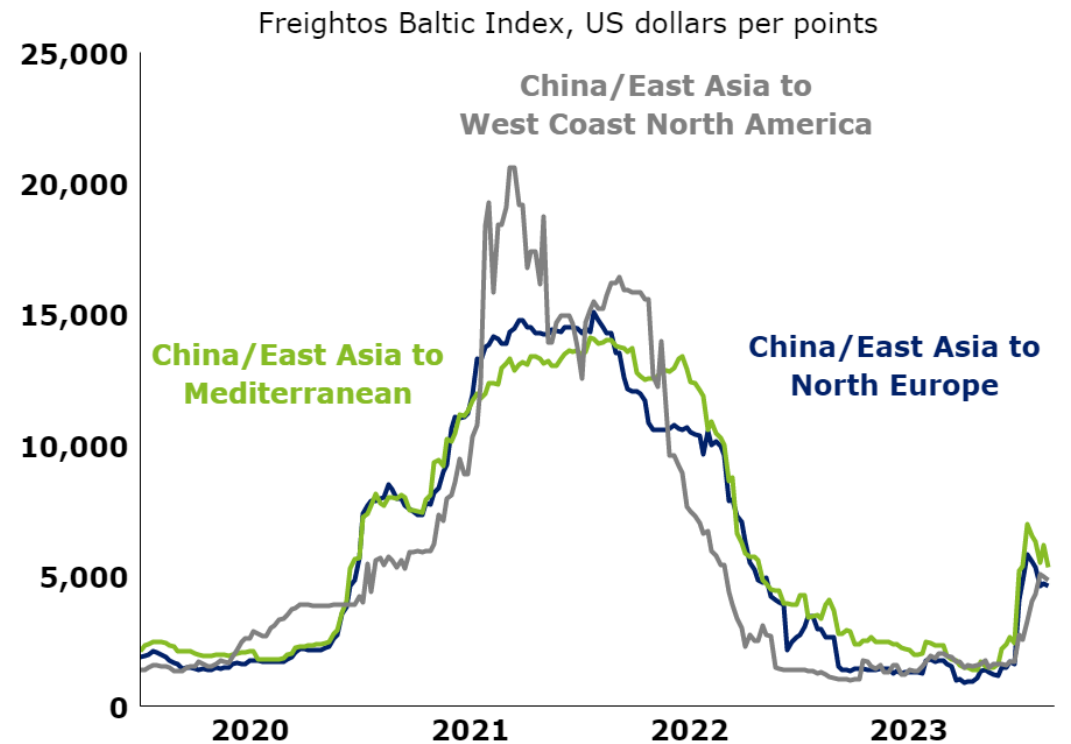

## Energy prices

Source: LSEG Datastream

... and supply chains are faring much better, despite recent turmoil in the Middle East

## Container freight index

Source: LSEG Datastream

# Despite the positive news on inflation, growth in advanced economies is slowing down

Higher prices and interest rates are starting to erode demand, especially in the UK and the Euro area

Growth in advanced economies slowed down this year ...

## Composite purchasing manager indices

Values above 50 indicate expansion

Source: LSEG Datastream

... but it has been supported by emerging economies

## GDP forecasts for selected countries

IMF, % annual growth

Source: LSEG Datastream

# The slowdown in China may be good news for inflation but not much else

Slow growth in China is putting downward pressure on inflation but is hitting export markets and creates new risks

## China's unprecedented slow down

## China's deflationary problem

## Contagion risk from real estate

**UK outlook**

# The UK entered a mild recession and recovery will be weak in 2024

The economy has been more resilient than forecasts, but the UK entered what we forecast to be the mildest recession in modern history

UK growth to flatline until mid-2024 in base case...

Year	2023	2024f	2025f
GDP ann. %	0.1	0.1	1.3

... thanks to a strong services sector

Source: LSEG Datastream

# Inflation and interest rates have peaked faster than expected and interest rate

The pandemic and energy price shocks have been digested by economy and now inflation is falling, but not prices

Inflation has been falling faster than expected ...

... meaning that Bank rate expectations are now lower

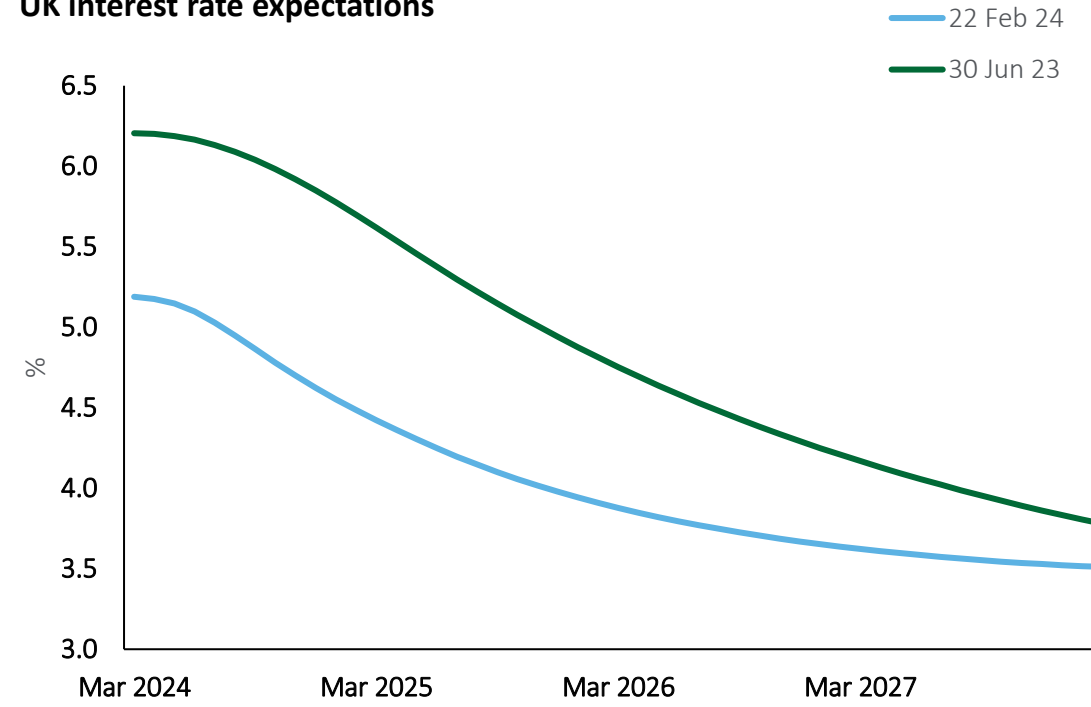

## UK headline and core inflation

YoY % growth

Source: LSEG Datastream

## UK interest rate expectations

Source: Bank of England, updated 27/11/2023

# A resilient labour market has meant that inflation is falling without a deep recession

Higher interest rates have cooled down the demand for labour but firms have not been shedding workers, meaning that the labour market is still quite tight with wages now outpacing inflation

Firms have pared back vacancies and hours ...

### UK labour hours and job vacancies

... but unemployment is still historically low

### UK wage growth and unemployment

# UK chancellor used a brighter outlook from OBR to ease fiscal policy

Higher growth and lower inflation and interest rates have given the UK chancellor some headroom; however, the fiscal plan still relies on heavy departmental cuts and an optimistic outlook

Headline NICs tax rate cut and fuel duty frozen...

... but the tax burden still to rise

Office for Budget Responsibility

## Spring Budget policy package

-  2p cut in employee National Insurance Contributions and other changes costing £10.7 billion by 2028-29
-  1 year fuel duty freeze costing £3.1 billion in 2024-25
-  Tax rises including on e-cigarettes, carbon imports and non-doms raising £6.6 billion by 2028-29
-  Public sector productivity funding (focused on NHS) costing £900m-a-year from 2025-26 to 2027-28

**What does this mean for corporates?**

# UK Business optimism rebounding in the second half of 2023

Despite the UK entering a recession, corporate are more optimistic going forward

CFOs optimistic has risen to above average levels...

... but this a reflection of large corporates and not SMEs

**Chart 1. Business optimism**

Net % of CFOs who are more optimistic about the financial prospects of their business than three months ago

- **Sentiment among UK CFOs rose** for the second consecutive quarter and is running at well above average levels.
- Though subdued relative to long-term measures, **corporate risk appetite has risen** to an 18-month high.
- On balance, **CFOs are optimistic** about an improvement in their own companies' prospects in 2024.
- These findings may seem **at odds with recent economic news**, particularly a contraction in Q3 GDP and forecasts of sluggish UK growth in 2024.
- The large corporates represented in the survey panel are generally **better able to manage periods of stress** than smaller and medium-sized businesses (SMEs).

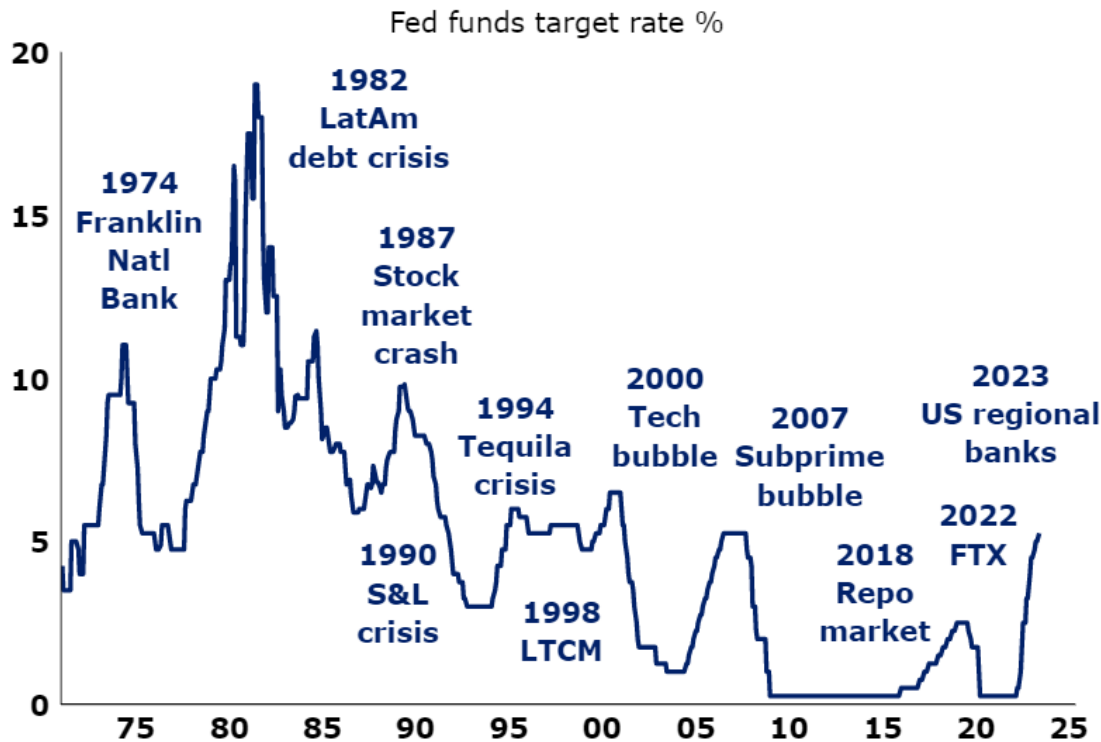

# Interest rates in advance economies have reached pre-GFC levels

Higher interest rates have tightened financial conditions generating risks and central banks need to balance inflation and growth with financial stability.

Hiking cycles always stress financial markets...

... but so far regulation has kept stress down

## Financial crisis and the Fed's hiking cycle

Source: Refinitiv Datastream; upper limit of the Fed funds target range shown

## UK and US Financial Stress Index

Index reflecting the level of stress in financial markets

Source: Deloitte UK, Economics and Markets Team & Kansas City Fed

# Higher financial stress is tightening credit for corporates

Higher borrowing costs make corporate financing much harder, especially through bank borrowing

Credit is more costly and much less available...

... making corporate fall out of love with debt

**Chart 4. Cost and availability of credit**

Net % of CFOs reporting credit is costly and credit is easily available

**Chart 7. Corporate financing**

Net % of CFOs who rate the following sources of funding for UK corporates as very or somewhat attractive

# The US and the Euro area are also seeing lower credit demand

As the Fed and the ECB increased rates and bank tighten credit conditions, corporates in the US and EU are scaling back demand for credit

As interest rates have risen, credit demand fell...

... but there are signs of a recovery as markets expect cuts

## US corporate credit demand

## Demand for credit in Euro area

# UK corporates insolvencies have risen but mainly due to small businesses so far

Higher interest rates and the War in Ukraine have increased the cost base for many businesses, causing energy-intensive and over-leveraged companies to suffer

## Higher corporate costs

## Rising insolvencies

## Lenders expect defaults to rise further

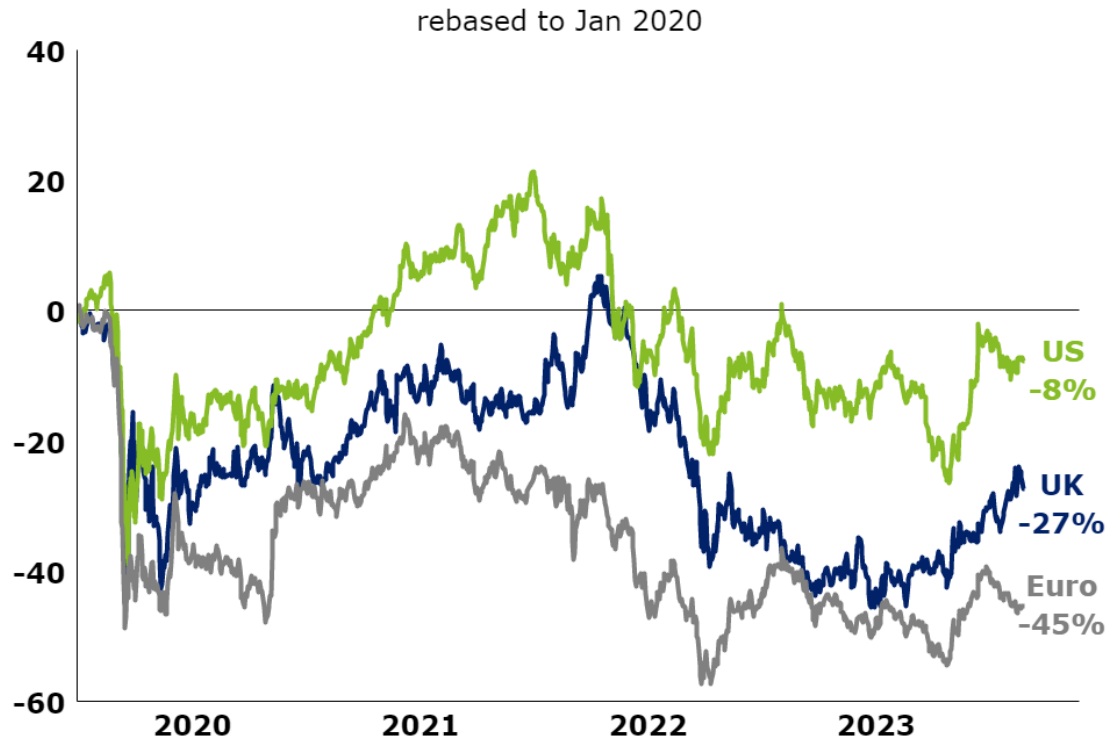

# Global Commercial Real Estate is also adjusting to a new normal

Along with higher interest rates, CRE is dealing with a shift in working and living patterns post-pandemic

Commercial Real Estate has been underperforming ...

... as WFH is becoming the new norm

## Commercial REIT

Source: LSEG Datastream

## Paid Full Days Worked from Home per week (April-May 2023)

# Inflationary environment has also tightened the labour market

Although the labour market is starting to show signs of slack, corporates have faced difficulties in hiring and retention in one of the tightest labour markets in memory

Corporate have lost the appetite for hiring...

... due to rising wage expectations and costs

**Chart 6. Outlook for corporate hiring**

Net % of CFOs who expect UK corporates' hiring to increase over the next 12 months

**Chart 7. Wage expectations**

CFOs' median reported increase in average wages in their business over the past 12 months and their expectation for the next 12 months

# All these pressures are pushing corporates to be more defensive

Even if the UK does not enter a recession, most corporates feel and behave as if they are in one

Corporates are scaling back investment and retrenching...

... to reduce costs, increase cashflow and deleverage

**Chart 11. Expansionary and defensive strategies\***

Arithmetic average of the % of CFOs who rate expansionary and defensive strategies as a strong priority for their business in the next 12 months

\* Expansionary strategies are introducing new products/services or expanding into new markets, expanding by acquisition and increasing capital expenditure. Defensive strategies are reducing costs, reducing leverage and increasing cash flow.

**Chart 10. Corporate priorities in the next 12 months**

% of CFOs who rate each of the following as a strong priority for their business in the next 12 months

# While inflationary worries are not the priority anymore, new risks have emerged

**Chart 9. Risk to business posed by the following factors**

Weighted average ratings on a scale of 0-100 where 0 stands for no risk and 100 stands for the highest possible risk

## Weak recovery and geopolitics top risks

- **Geopolitics** remains on top of CFOs' worry list, likely due to the conflict in Israel and Gaza.
- There is also increased anxiety about **poor productivity/weak competitiveness** in the UK economy
- **Higher energy prices or disruption to supply is seen as the third biggest risk** but remains well below the levels seen in the second half of last year.
- **Concerns about labour shortages have ticked up, having** fallen in the previous two quarters.

# Summary

# To sum up...

Key takeaways and risks to look out for

## Outlook

---

- 1 Inflation and interest rate have peaked
- 2 Advanced economies and China to drag down global growth
- 3 UK to stagnate late 2024

## Upside

---

- 1 Pandemic and energy shocks are in the past
- 2 A resilient labour market supported consumption
- 3 Emerging markets to provide global growth

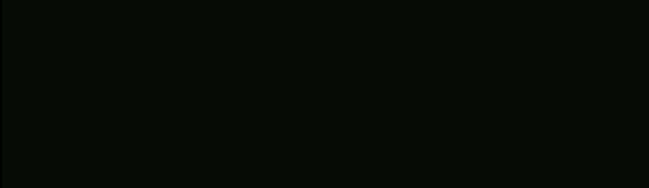

## Downside

---

- 1 Geopolitical conflict reignites inflation
- 2 Financial stress and labour markets could worsen
- 3 China's slowdown brings down advanced economies
