

# Construction

**Construction sites can be one of the most hazardous work environments. Many workers are often operating in urban areas and on smaller sites where machinery, vehicle movements and members of the general public all need to be considered.**

To ensure everyone's safety, prominent and clear messaging is of paramount importance on and around building sites.

To discuss your signage requirements, please call our team on 01621 828882.

## Scaffolding Signs

Cost effective and easy to fit scaffolding signs are the perfect solution for when normal sign fixing is impractical. Being lightweight but rigid, the signs are made of 4mm Correx, using pre-cut tabs and slots the sign will remain secure in all weather conditions.

Remove your scaffolding sign from the packaging

Fold the top along the pre-pressed lines and wrap around scaffold pole

Insert tabs into the pre-cut slots to secure in place

# Traffic Signage

**As more vehicles take to the roads, now more than ever there is a need for clear, uncluttered and prominent signage.**

The Department of Transport estimate that over 35 million vehicles use the UK road network and many are now moving away from conventional transport and choosing to travel on two wheels. In light of this, we have now extended our range of rear vehicle warning signs to help all road users remain safe on the highways.

To discuss your signage requirements, please call our team on 01621 828882.

## CE Certified Traffic Signs

Road traffic signs must conform to The Traffic Signs Regulations and General Directions 2002. The signs on this page fully conform to this legislation.

The reflective material used on these signs fully conforms to BS EN 12899-1:2007, which has replaced BS 873 parts 5 and 6. These are supplied in 3mm Aluminium composite with channel for fixing. This material has little scrap value and therefore acts as a theft deterrent.

Protective Overlay Film can be overlaminated on any traffic sign for extra sign face protection. CE certification is required for use on public highways. For private land CE certified signs are not required.
