**11. DOL/DCMWC REIMBURSEMENT STANDARDS**

- 11a. **For Home O2 Delivery equipment:** requires a pO2 value of 60 mmHg or less on room air during a chronic state with corresponding pCO2 and pH values. *If the ABG is done while the patient is on O2, the pO2 standard = 80 mmHg for all oxygen equipment (See 11e).* All medical evidence to support your request will be considered.  
 If the patient is homebound or non-ambulatory, or if other circumstances related to his/her condition prevent the sample from being analyzed within 30 minutes, the prescribing physician may submit a narrative rationale explaining the circumstances and substantiate the medical necessity for the item or service prescribed.
- 11b. **Hospital Bed/Mattress:** must be justified by PFT results indicating an FEV1 equal to or less than 40% of predicted, or chronic hypoxia (pO2 of 55 mmHg or less). PFT – Test results with tracings and flow volume loop must be attached. ABG – Test strip must be attached.
- 11c. **Prescriptions for home care:** must include objective test results or comparable clinical data, explanation why the patient is homebound, and a specific schedule of services to be rendered, including the total number and frequency of prescribed visits. Indicate the type of medical professional (PA, RN, LPN, RT) providing care. Use Item 12, below, and/or attach separate sheet.
- 11d. **Wheelchair** is not a commonly covered item. Requests must include medical support data and will be evaluated individually. Data must support the wheelchair need because of a severe pulmonary impairment.
- 11e. **ALL CMN supportive test results:** must be dated 2 months or less prior to prescription for services. Recertification services for home nursing care and equipment must be reviewed yearly or at the expiration date. PFT – Test results with tracings and flow volume loop must be attached. ABG – Test strip must be attached.

**NOTE:** Prescription for indefinite services or those without required objective test data will be returned for specific information. If your request is rejected because your patient's medical condition does not meet DOL reimbursement requirement standards, you may submit other medical evidence to support your prescription request. All evidence will be considered.
