What is Reputational Information?

- “Information about an actor’s past performance that helps predict the actor’s future ability to perform or to satisfy the decision-maker’s preferences”
- Examples:

Unmediated	Mediated
<ul style="list-style-type: none"> • Word of mouth • Recommendation letters/job references 	<ul style="list-style-type: none"> • Credit scores • Investment ratings • Consumer product reviews/ratings

Why Reputational Information Matters

- The market's invisible hand is predicated on consumers rewarding good producers and punishing poor ones
 - Reputational information = invisible hand of the invisible hand

Reputational Information Regulation

<p><u>Stimulate Supply</u></p> <ul style="list-style-type: none"> • Immunizations (ex: 47 USC 230) • Mandatory disclosure • Whistleblower laws 	<p><u>Suppress Supply</u></p> <ul style="list-style-type: none"> • Publication liability • Privacy laws • Mandatory non-disclosure
<p><u>Stimulate Demand</u></p> <ul style="list-style-type: none"> • Mandatory consideration 	<p><u>Suppress Demand</u></p> <ul style="list-style-type: none"> • Anti-discrimination laws

Two Puzzles

- Heterogeneity of reputational systems
 - Why?
 - Tuning regulatory dial/relying on third-order reputation
- Systematic undersupply problem?
 - Most reputational information is non-public
 - Social net benefit of disclosure $>$ private net benefit
 - But how much reputational info does the market require?
