

integration and other data on cellular direction finding technologies. After an initial installation and familiarization period, the Coast Guard plans to evaluate a designated platform outfitted with the communications technology for a period of one week.

We anticipate the Coast Guard's contributions under the proposed CRADA will include the following:

(1) Develop the Demonstration Pilot Assessment Plan to meet the objectives of the CRADA with a diverse set of real-life mission scenarios.

(2) Provide the pilot demonstration support in and around Charleston, SC.

(3) Coordinate Pilot demonstration from onboard a USCG cutter.

(4) Collaborate with non-Federal partners to prepare demonstration documentation including equipment assessments, final report(s), and briefings.

We anticipate that the non-Federal participant's contributions under the proposed CRADA will include the following:

(1) Assist the R&D Center in the development and drafting of all CRADA documents, including the pilot demonstration assessment plan, equipment assessments, final report(s), and briefings.

(2) Provide and maintain the direction finding equipment to ensure the system is usable.

(3) Secure, with R&D Center assistance, Special Temporary Authority (STA) to employ the equipment within the desired frequency bands.

(4) Provide technical support, training and maintenance throughout the period of performance to ensure maximum availability and utility of the networks.

The Coast Guard reserves the right to select for CRADA participants all, some, or no proposals submitted for this CRADA. The Coast Guard will provide no funding for reimbursement of proposal development costs. Proposals and any other material submitted in response to this notice will not be returned. Proposals submitted are expected to be unclassified and have no more than five single-sided pages (excluding cover page, DD 1494, JF-12, etc.).

The Coast Guard will select proposals at its sole discretion on the basis of:

(1) How well they communicate an understanding of, and ability to meet, the proposed CRADA's goal; and

(2) How well they address the following criteria:

(a) Technical capability to support the non-Federal party contributions described; and

(b) Resources available for supporting the non-Federal party contributions described.

Currently, the Coast Guard is considering TriaSys Technologies Corp for participation in this CRADA. This consideration is based on the fact that TriaSys Systems has demonstrated its technical ability as the developer, manufacturer, and integrator of cellular direction finding equipment. However, we do not wish to exclude other viable participants from this or future similar CRADAs.

The USCG's intent to enter in a potential CRADA with TriaSys Corp is based on market research and visits to vendors with advertised expertise in this unique application of technology in the maritime environment for Search and Rescue. The research includes employment of their antennas, equipment and graphical user interface (GUI) to establish direction and geo-location of cellular phones in an open-ocean environment. Specifically, the equipment will provide both a Line of Bearing (LOB) and a Global Positioning System (GPS) location to a cellular phone in a search and rescue scenario. The equipment will be setup in locations with use in the open ocean environment. A Pilot Demonstration schedule has been proposed in which TriaSys Systems will provide their equipment. The Coast Guard Research and Development Center (R&D Center) will prepare a Pilot Demonstration Assessment Plan and TriaSys Systems will operate the equipment for exploratory development over a one week period to collect information on suitability, reliability, maintenance requirements, and ease of use.

This is a technology assessment effort. The goal for the Coast Guard of this CRADA is to better understand the advantages, disadvantages, required technology enhancements, performance, costs, and other issues associated with cellular direction finding technologies. Special consideration will be given to small business firms/consortia, and preference will be given to business units located in the U.S. This document is issued under the authority of 5 U.S.C. 552(a).

Dated: November 14, 2017.

**Bert N. Macesker,**

*Executive Director, Acting Commanding Officer, U.S. Coast Guard Research and Development Center.*

**DEPARTMENT OF HOMELAND SECURITY**

**U.S. Customs and Border Protection**

**Accreditation of Intertek USA, Inc. (Baytown, TX), as a Commercial Laboratory**

**AGENCY:** U.S. Customs and Border Protection, Department of Homeland Security.

**ACTION:** Notice of accreditation of Intertek USA, Inc. (Baytown, TX), as a commercial laboratory.

**SUMMARY:** Notice is hereby given, pursuant to CBP regulations, that Intertek USA, Inc. (Baytown, TX), has been accredited to test petroleum and certain petroleum products for customs purposes for the next three years as of August 30, 2016.

**DATES:** Intertek USA, Inc. (Baytown, TX) was approved, as a commercial laboratory as of August 30, 2016. The next triennial inspection date will be scheduled for August 2019.

**FOR FURTHER INFORMATION CONTACT:** Dr. Justin Shey, Laboratories and Scientific Services Directorate, U.S. Customs and Border Protection, 1300 Pennsylvania Avenue NW., Suite 1500N, Washington, DC 20229, tel. 202-344-1060.

**SUPPLEMENTARY INFORMATION:** Notice is hereby given pursuant to 19 CFR 151.12, that Intertek USA, Inc., 8500 West Bay Road MS #20A, Baytown, TX 77523 has been accredited to test petroleum and certain petroleum products for customs purposes, in accordance with the provisions of 19 CFR 151.12. Intertek USA, Inc., is accredited for the following laboratory analysis procedures and methods for petroleum and certain petroleum products set forth by the U.S. Customs and Border Protection Laboratory Methods (CBPL) and American Society for Testing and Materials (ASTM):

| CBPL No.    | ASTM   | Title                                                                                      |
|-------------|--------|--------------------------------------------------------------------------------------------|
| 27-48 ..... | D 4052 | Standard Test Method for Density and Relative Density of Liquids by Digital Density Meter. |

Anyone wishing to employ this entity to conduct laboratory analyses should request and receive written assurances from the entity that it is accredited by the U.S. Customs and Border Protection to conduct the specific test requested. Alternatively, inquiries regarding the specific test this entity is accredited to perform may be directed to the U.S. Customs and Border Protection by calling (202) 344-1060. The inquiry may also be sent to [CBPGaugersLabs@cbp.dhs.gov](mailto:CBPGaugersLabs@cbp.dhs.gov).
