## ALL-IN-ONE COATING

### WATER BASED

Is a high quality pure acrylic based primer and topcoat all-in-one suitable for interior and exterior Iron and Steel surfaces. This product has excellent adhesion, water resistance and hiding power properties.

**Steel Cladd All-In-One Coating** is a convenient, DTM (Direct to Metal) system that performs the function of a primer and topcoat. The quick drying coating can be applied directly to mild or stainless steel, galvanised or wrought iron, or aluminium. A unique rust inhibitor provides superior rust-preventing and anti-corrosive properties.

- Saving on labour, cost and time
- Excellent surface penetration ensures superior adhesion
- Corrosion and weathering protection on new or rusted surfaces, preventing further deterioration of surfaces
- Durable and long lasting protection with colour that wont fade

## STEEL CLADD QD BRIGHT ALUMINIUM

### SOLVENT BASED

Is a high quality, quick drying heat reflecting coating. This product is primarily used to protect Galvanised Iron Roofs, Steel Fencing, Post and Gates and on other substrates where a durable silvery finish is required.

## STEEL CLADD QD ENAMEL

### SOLVENT BASED

Is a quick drying enamel for the decoration of all interior and exterior steel surfaces where a durable gloss finish is required.
