

# US/UK World Magnetic Model - Epoch 2020.0

## Geomagnetic Longitude and Latitude

**Geomagnetic Coordinates**  
Miller Cylindrical Projection  
Contour interval: 5 degrees  
— Geomagnetic longitude  
— Geomagnetic latitude  
— Zero lines

☼ Position of Dip Poles

**Blackout Zones**  
Horizontal Field (H) Strength:  
■ 0-2000 nT (Unreliable Zone)  
■ 2000-6000 nT (Caution Zone)
