

US/UK World Magnetic Model - Epoch 2020.0

Annual Change North Component (X)

Annual Change North Component (X_SV)
 Miller Cylindrical Projection
 Contour interval: 5 nT/year
 Positive (north) change
 Negative (south) change
 Zero change

Position of Dip Poles

Blackout Zones
 Horizontal Field (H) Strength:
 0-2000 nT (Unreliable Zone)
 2000-6000 nT (Caution Zone)
