

Repair and Service

MUELLER FIELD OPERATIONS, INC.

MUELLER

Collaborative Risk Mitigation

Equipment downtime can threaten your safety, schedule, culture, and profitability. As your equipment ages or your process evolves, Mueller Field Operations, Inc. specializes in the repair, alteration, and integrity inspection of process systems. With certifications and proven experience in ASME, API, 3A, and BPE, our team is a safe, credible, and accountable resource for the food, dairy, beer, beverage, water, biopharmaceutical, and chemical industries.

From concept to site implementation, we manage the entire process through efficient communication, covering all aspects of project execution while reducing risk to your organization.

Reactive Field Solutions

Our teams are accustomed to traveling by field service trucks packed with tools or by plane to reach your site efficiently. Specialty trained and mobile, our crews support your facility with reactive expertise to minimize disruption to your process system.

Our tank integrity program provides customers a longevity plan for their equipment. With an inspection report in your hands, sustainability and return on investment discussions can be quantified.

Services Offered

- Heat transfer and agitation design and repair

PAUL MUELLER COMPANY

PAUL MUELLER, OUR FOUNDER

At Paul Mueller Company, we are united by a belief that the only quality that matters is quality that works for life. With every piece of processing equipment we build, our goal is to have lasting impact. This collective vision has led us from a small sheet metal shop to a global supplier of heating, cooling, processing, and storage solutions. Our equipment allows farmers, brewers, food producers, and engineers to keep their products fresh and their inventory strong. No matter what the industry, our equipment is built to sustain businesses and their manufacturing processes, making an impact across the globe.
