

Export Compliance Matrix

This is the Salesforce export compliance matrix. It is a list of our products and features with respective Export Control Classification Numbers (ECCNs) and eligible license exception information, per the United States Department of Commerce, Bureau of Industry and Security, Export Administration Regulations. Salesforce does not publish Export Control Classification Numbers or EAR99 designations for software delivered only as a service ("SaaS"), in accordance with the treatment of SaaS under the current Export Administration Regulations. Some Salesforce products may be eligible for consideration as "published software," as defined in 15 CFR 734.7 of the Export Administration Regulations.

All information on this matrix is strictly a recommendation to the user and should be used in conjunction with the Export Administration Regulations when classifying Salesforce products and services for export purposes.

Salesforce makes no representation or warranty as to the accuracy or reliability of the classifications listed in this export compliance matrix. Any use of such classifications by the user, is without recourse to Salesforce and is at the users' own risk. You are responsible for ensuring that use of the software is in compliance with the U.S. Export Administration Regulations and other applicable export control regulations. Salesforce is in no way responsible for any damages whether direct, consequential, incidental, or otherwise, suffered by the user as a result of using or relying upon such classifications, for any purpose whatsoever.
