

# Managed Access Control

Deliver ultimate security, centralized management, and amplified visibility for your organization with a cloud-based managed access control solution. ACaaS can support you in simplifying operations, enhancing flexibility and protection, and having synchronized, actionable data.

## OVERVIEW

### Managed access control for your business

**Legacy solutions are no longer enough to safeguard your business. Eliminate disparities with ACaaS.**

Get up to date with the latest technologies that can protect your organization from the numerous threats menacing your employees, visitors, assets, and property. Access Control as a Service (ACaaS), a cloud-based technology, offers these key capabilities and empowers your security team with unique tools to manage all aspects of your access control system successfully. Particularly for entities with multiple, geographically dispersed locations, centralization and standardization of the access control systems is critical to deliver the ultimate level of security.

Whether you are in charge of a single location or multiple sites, Security 101® can provide you with the benefits of a managed access control system, freeing you and your team from day-to-day system administration.

## BENEFITS

### Top benefits of managed access control

**You need an access control solution that is secure, flexible, scalable, and that adapts to your constant growth.**

- **Freedom**  
A cloud-based or hybrid managed access control system is the ideal solution corporations of any size need in order to dramatically enhance their ability to secure staff, assets, and property.
- **Reliability**  
When using a managed access control system, it is competently administered by our expert and seasoned security professionals who will help you manage doors and permissions automatically 24/7/365.
- **Simplicity**  
With ACaaS employees are able to use cards, biometric, or smartphone credentials to gain access to each building in a simple, comfortable process.
- **Scalability**  
Our system is vastly scalable, allowing security teams and administrators to easily add new doors or even locations as they grow. Moreover, it offers increased redundancy and protection.
- **Cost savings**  
With managed access control services, your business will be able to reduce the likelihood of expensive false alarms, eliminate the need for re-keying and changing locks, improve response times, and have access to critical data, which is necessary to face threats appropriately.
- **Peace of mind**  
The appropriate managed access control system can take a lot of stress off of you and give you peace of mind.

NATIONAL | GLOBAL ACCOUNTS

## Let Security 101 become your **access control system administrator**
