

Steelplast CC Established 2010

Steelplast CC is the leading Supplier of the complete range of German **Quality Engineering Plastic**. Steelplast cc has been established since 2010.

With **over 21 years' experience** in engineering plastics we have been specialists from the very beginning.

Growing with the market, we have organized the company to meet the demands of a modern, globalized economy. **Flexibility, integrity, cooperation** – this is the core of our guidelines.

Construction – Micron Plastic sheeting

Suppliers of all quality engineering plastics and construction materials.

We supply material for the lining of:
Chutes, hoppers, bins, bunkers, silos,
railcars, dust collectors, cyclones & many
more.

Visit our website for more information:
www.steelplastsa.com

Flexible, heavy duty plastic sheeting for the construction and building industry, paint projects, agriculture applications and equipment covers. We can manufacture from 50 – 1000 microns.

Concrete

When it comes to concrete flooring, you can use a **damp-proof underlay** that acts as **waterproofing** and **prevents rising moisture**. This kind of plastic sheeting, laid under the flooring, **improves the curing of concrete** and **prevents contamination** and unhealthy living conditions.

Roofing

We also supply **roof sheeting**, which is specially manufactured for use under tiles and acts as a **dust barrier**, while adding **waterproofing**. Roof sheeting also **prevents updrafts from lifting your tiles** and helps **protect your ceilings**.

Builder

Our builder sheeting is used in the construction industry as a **damp-proof** course. A horizontal layer of builders sheeting is laid in the walls as a barrier to **resist moisture rising up** through the structure and causing damage. The advantage of our plastic sheeting is that it has **excellent puncture-** and **tear-resistant properties**, while it **won't perish, crack or decay**.

Plastic Sheeting Manufacture

We are a plastic sheeting manufacturer who practices **strict quality controls**. We use **industry-leading European machinery**, which ensures **even thickness, weights** and **durability**. This means your plastic sheets are manufactured to the **highest standards**, giving you the **best possible product**.

Looking for a Plastic sheeting supplier? Look no further than Steelplast CC. We will provide you with **premium quality plastic sheeting** for all your needs – whether you need roof sheeting or plastic sheets for any other purpose.

Our **polyethylene sheeting** is produced in a range of widths and thickness according to your requirements, as well as centrefold sheets that open up to double the width. We can supply plastic sheeting in large roll form or on smaller re-wound 30m rolls. Our plastic sheets are available in recycled- and virgin plastic – in black or smoky.

Other products and services

Suppliers of:

1. Nylon
2. Polypropylene
3. Ertalyte (PET)
4. Acetal (POM)
5. Vesconite
6. HDPE
7. UHMW-PE

Other Services:

1. Bulk material handling
2. Polystyrene
3. We manufacture flexible heavy duty plastic sheeting for the construction and building industry, paint projects, agriculture applications and equipment covers. We can manufacture from 30 – 1000 microns

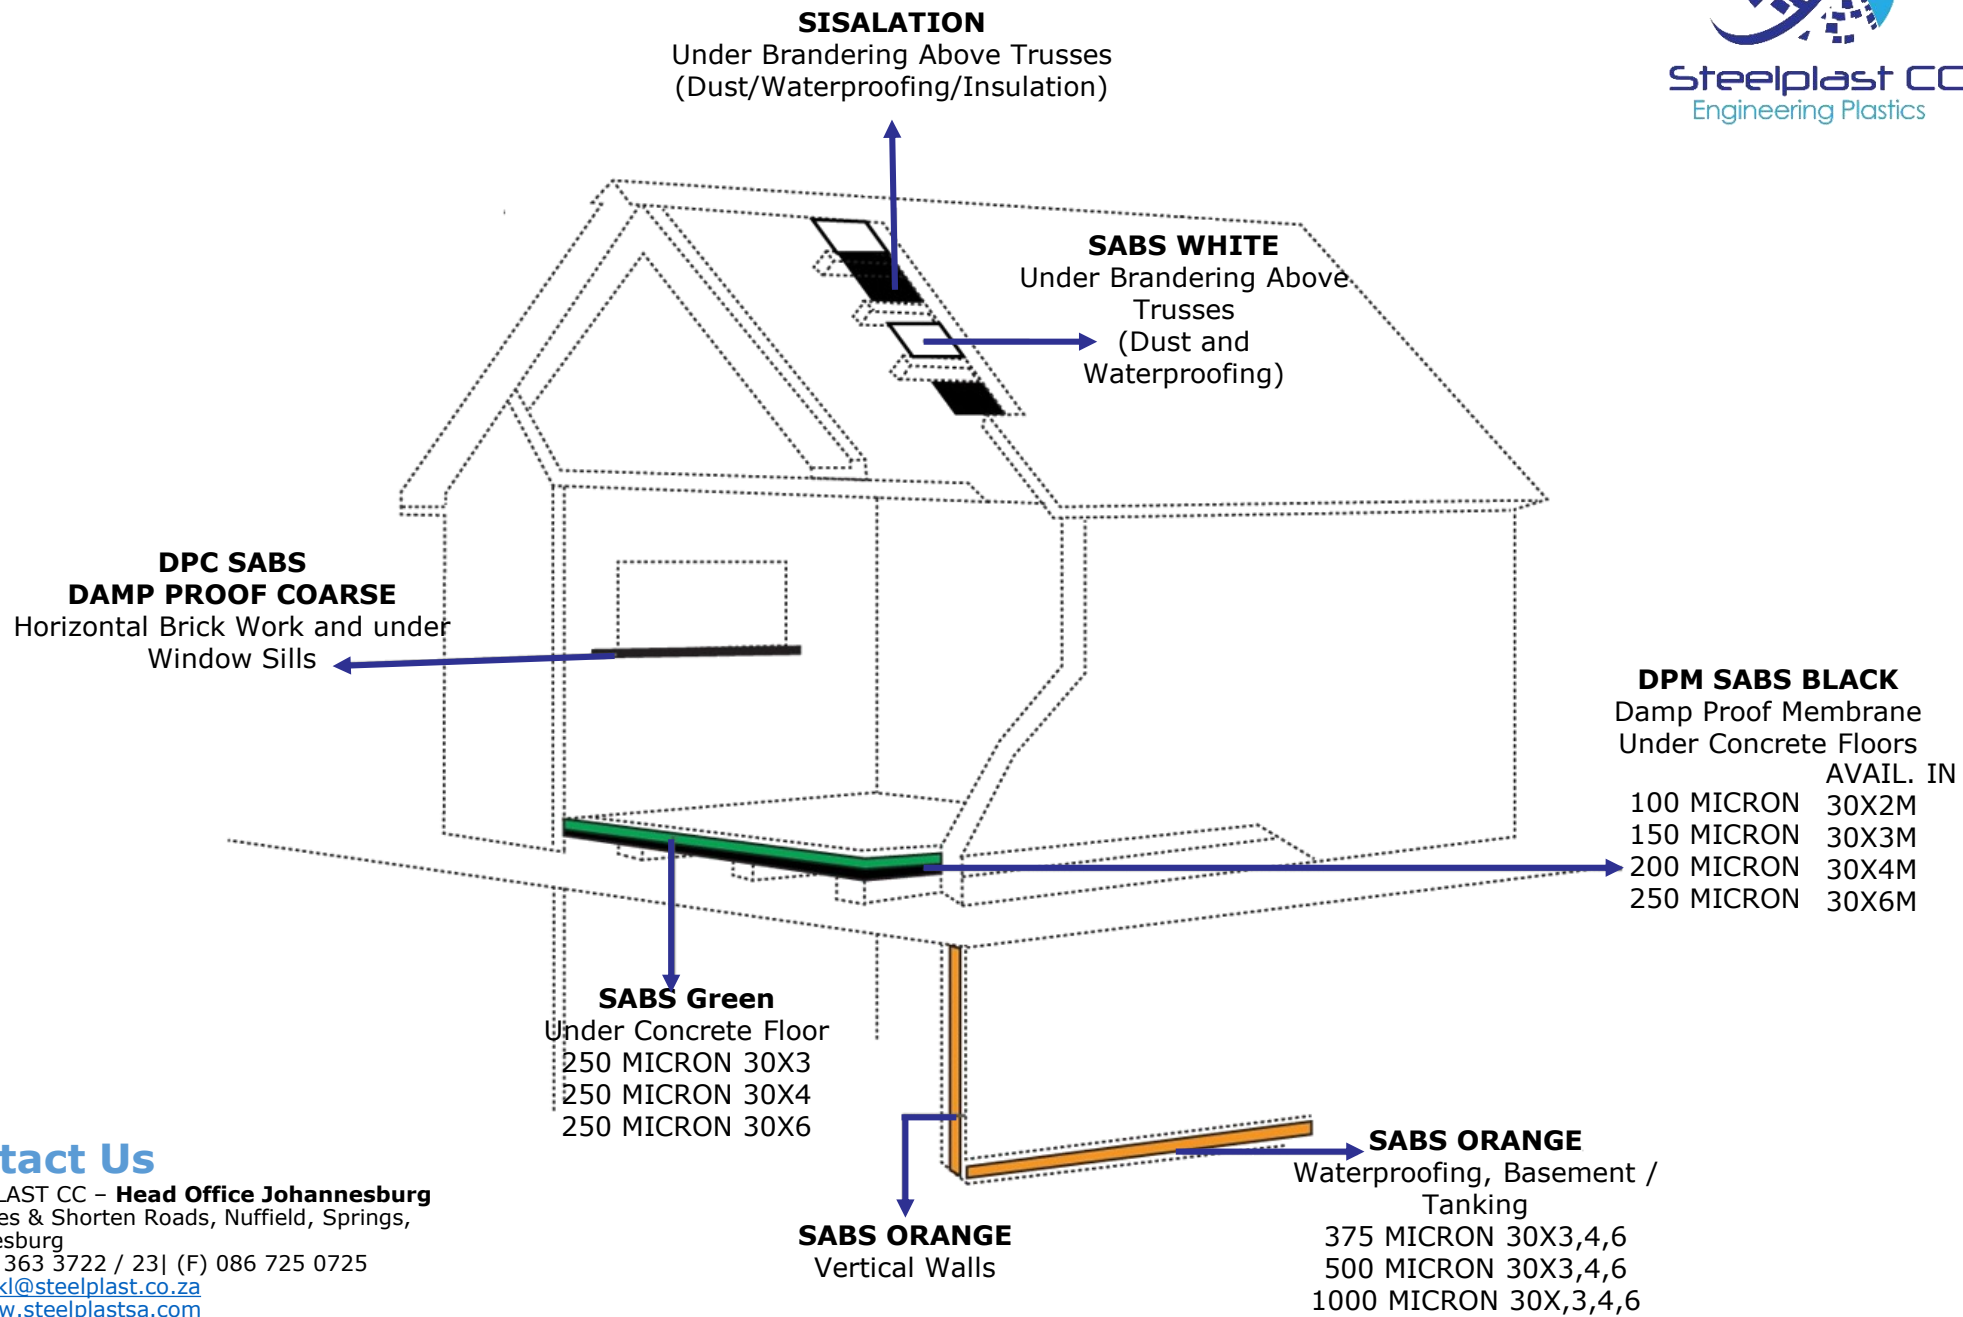

Key clients

- Kusile Power Station
- Stefanutti Stocks Civils
- South African Mint Company
- SAM Joint Venture
- Coca Cola
