

This file contains the open source licenses for the following open source components in the VZ Cloud Mac client:

1. AFNetworking v1.3
 2. FMDB v 2.1
 3. FormatterKit v 1.3.1
 4. CocoaLumberjack v 1.8.0
 5. CDEvents v 1.2.1
 6. SQLite 3
-

1. AFNetworking v1.3

<http://cocoadocs.org/docsets/AFNetworking/1.3.1/>

Copyright (c) 2011–2016 Alamofire Software Foundation (<http://alamofire.org/>)

2. FMDB v 2.1

<http://cocoadocs.org/docsets/FMDB/2.1/>

If you are using FMDB in your project, I'd love to hear about it. Let Gus know by sending an email to gus@flyingmeat.com.

And if you happen to come across either Gus Mueller or Rob Ryan in a bar, you might consider purchasing a drink of their choosing if FMDB has been useful to you.

Finally, and shortly, this is the MIT License.

6. SQLite 3

<https://www.sqlite.org/>

All of the code and documentation in SQLite has been dedicated to the public domain by the authors. All code authors, and representatives of the companies they work for, have signed affidavits dedicating their contributions to the public domain and originals of those signed affidavits are stored in a firesafe at the main offices of Hwaci. Anyone is free to copy, modify, publish, use, compile, sell, or distribute the original SQLite code, either in source code form or as a compiled binary, for any purpose, commercial or non-commercial, and by any means.

The previous paragraph applies to the deliverable code and documentation in SQLite - those parts of the SQLite library that you actually bundle and ship with a larger application. Some scripts used as part of the build process (for example the "configure" scripts generated by autoconf) might fall under other open-source licenses. Nothing from these build scripts ever reaches the final deliverable SQLite library, however, and so the licenses associated with those scripts should not be a factor in assessing your rights to copy and use the SQLite library.

All of the deliverable code in SQLite has been written from scratch. No code has been taken from other projects or from the open internet. Every line of code can be traced back to its original author, and all of those authors have public domain dedications on file. So the SQLite code base is clean and is uncontaminated with licensed code from other projects.
