ABOUT US

Your feature accent walls are meant to have character, beauty, and sophistication which we deliver with our luxurious Acoustic Wood Slat Wall Panels. They provide acoustic sound absorbing benefits along with elegance and warm wood comfort. Made from solid real wood mounted on sturdy acoustic felt, we carry Walnut, Oak & Acacia wood.

Installation is made easy for your walls or ceilings. Slat Wood panels come with colored screws matching the felt and each acoustic panel measures 94.5" x 12" with 9mm black felt. For superior sound absorption use 2" furring strips with Rockwool Insulation in between.

The wall panels are for interior use and can be used for residential and commercial applications. Please note that images and actual product may differ slightly in color due to different lighting sources and also screen displays. Samples are available for purchase to provide an actual look and feel.
