

WMG Statement Regarding AI Technologies

Warner Music Group Corp. (WMG) believes that machine learning and artificial intelligence (AI) technologies have creative potential for artists and songwriters. However, it is imperative that all uses and implementations of machine learning and AI technologies respect the rights of all those involved in the creation, marketing, promotion, and distribution of music.

All parties must obtain an express license from WMG to use (including, but not limited to, reproducing, distributing, publicly performing, ripping, scraping, crawling, mining, recording, altering, making extractions of, or preparing derivative works of) any creative works owned or controlled by WMG or to link to or ingest such creative works in connection with the creation of datasets, as inputs for any machine learning or AI technologies, or to train or develop any machine learning or AI technologies (including by automated means). These creative works include all sound recordings, audiovisual recordings, musical compositions (including lyrics), literary works, and any associated metadata, artwork, and graphic images owned or controlled by WMG.

All parties must obtain an express license from WMG and any other rights holders to use the name, image, likeness, and/or voice of any WMG artists and/or songwriters in connection with any machine learning or AI technologies.

To the extent that Article 4 of the EU directive 790/2019 or similar laws in other jurisdictions apply to creative works owned or controlled by WMG, WMG reaffirms that, in the absence of an express license permitting the uses referenced above, we have reserved and continue to reserve all our rights.

We will take any necessary steps to prevent the infringement or other violations of our artists' and songwriters' creative works and rights.

If you have any questions, please reach out to our team at Alinquiries@wmg.com. The team can also speak to you about obtaining the licenses that you require.
